ARIANTA - Polish Scientific and Professional Electronic Journals

Characteristics:

Arianta is a bibliographic database, recording data on Polish Scientific and Professional Electronic Journals. The database contains links to about 4500 journal titles providing full texts, abstracts, or tables of contents on their websites.

The database indexes the following data on Polish electronic journals:

- Title of the journal and its previous titles
- Web address of the journal
- ISSN number
- Information on indices: Impact Factor, ERIH, and MEiN scores
- Information on when the journal is published
- Name of the publisher
- Frequency of publication of issues
- Subject area
- Information about other databases indexing the journal in question (including AGRO, BazTech, BazEkon, BazHum, Current Contents, Directory of Open Access Journals, Science Citation Index Expanded).

Search:

Searching in the database is possible by journal title, ISSN number, publisher name, subject area, frequency of journal publication, name of indexing database. It is possible to limit the search to academic or professional journals, abstract and full-text, print and online, or online only. In addition, the search can be refined in terms of parametric indicators such as Impact Factor, Index Copernicus, ERIH or MEiN scores.
