

CERN Dokument Server (CDS)

Characteristics:

The service offers access to electronic versions of particle physics publications. Indexes preprints, articles, PhD theses, multimedia, e-learning modules, books, journals, conference proceedings, CERN reports.

Search:

The database can be searched in a simple way by typing any search term or in an advanced way by searching publications by author name, title, report number, year of publication, and full-text documents.

In addition, the database can be searched by the following collections:

- articles and preprints
- books and conference materials
- presentations, discussions
- journals and reports
- multimedia
- CERN series (project reports, annual reports)
- CERN departments
- CERN accelerators
- CERN experiments
- CERN projects
- International Cooperation
