Caltech Thesis

Characteristics:

A repository of full-text dissertations of doctoral, engineering, master's, and undergraduate students from the California Institute of Technology (Caltech). Most of the items in Caltech THESIS are text dissertations, but some may also include programs, maps, videos, etc. The repository is continuously updated.

The database deposits dissertations in the following fields:

- Aeronautics, astronomy, astrophysics
- Applied mathematics
- Applied mechanics
- Applied physics
- Bioengineering, biophysics, biochemistry, biology
- Chemical engineering, chemistry
- Civil engineering
- Computer science
- Engineering
- Control systems
- Electrical engineering, power engineering
- Environmental sciences
- Geology
- Materials science
- Mechanical engineering
- Humanities

Search:

The database can be searched for papers by author's name, promoter, year of publication, subject area (option), type of dissertation, name of the team working on a given research topic (research group), recently added papers, ORCID number (option available in advanced search).
