

## CiteSeerX

### Characteristics:

CiteSeerX is a growing digital library and search engine that focuses primarily on scientific literature in the fields of computer science and scientific information. The published works include the collection of data and metadata in databases, the indexing of scientific articles and their citations, and the software and tools that are essential for digital libraries and repositories. The database contains full texts of articles with their abstracts, keywords and citations.

**Chronological coverage:** since 1999

### Searching:

The database can be searched in a simple or advanced manner by title, author's name, author's affiliation, place of publication, subject headings, any words occurring in the text. The search can be limited in terms of the year of publication and the minimum number of citations of the publication concerned.

**Access:** <http://citeseerx.ist.psu.edu/index>
