arXiv - electronic archive of preprints of scientific articles

Characteristics:

The database contains more than 2 million publications in physics, mathematics, computer science, biology and statistics. Most of the papers included in arXiv are published in peer-reviewed scientific journals. arXiv is a repository database, maintained on the Cornell University Library server.

Searching:

Searches in the database can be conducted within specific subject areas (physics, mathematics, quantitative biology, computer science, finance, statistics, electrical engineering, economics), limited to specific time periods and more specific subject headings. It is also possible to search the database by author name, title, ORCID number, DOI, abstract or full text.

Access: https://arxiv.org/

13.10.2022r.
