BazTech

Characteristics:
The database contains bibliographic records with abstracts of publications from 771 Polish journals and scientific bulletins in the fields of engineering, technology, natural sciences, and environmental protection, published by Polish academic institutions. In total, the database indexes over 560,000 publications and is gradually evolving into a full-text database (with over 90% of journals available in full text).

The database includes the following types of documents:
• Articles from journal
• Publications from university and research institute presses
• Conference materials published in journals or the aforementioned institutional publications

Each article record includes: authors' names, article title in Polish and English, journal title (with a link to full texts), conference title, year, volume, page numbers, keywords and abstracts in Polish and English, language of publication, author affiliations and email addresses, reference lists, DOI number, and full-text access for journals whose publishers have granted licenses.

Each journal record includes: title, publisher's name, editorial office address, ISSN number, publication frequency, publisher's URL and email address, link to full texts (if available), MNiSW score, impact factor (IF), DOAJ listing, former or subsequent title, and information on subscriptions from libraries contributing to the database.

Chronological Coverage: Since 1998

Searching:
• Article search by title, author name, journal title, keywords, citations, year of publication, language, access type, or any other term
• Browsing by journal title, author name, keywords, publishers, or subscriber institutions (libraries that subscribe to journals and contribute to the database)
