

CERN Dokument Server (CDS)

Characteristics:

This service provides access to electronic versions of publications in the field of particle physics. It indexes preprints, articles, dissertations, multimedia, e-learning modules, books, journals, conference materials, and CERN reports.

Search Functionality:

The database can be searched using a simple keyword-based method or through an advanced search by author name, title, report number, publication year, and full-text documents.

Additionally, the database can be browsed by the following collections:

- Articles and preprints
- Books and conference materials
- Presentations and discussions
- Journals and reports
- Multimedia
- CERN series (project reports, annual reports)
- CERN departments
- CERN accelerators
- CERN experiments
- CERN projects
- International collaborations
