

## CiteSeerX

### Characteristics:

CiteSeerX is a growing digital library and search engine focused primarily on scientific literature in computer science and information science. The repository includes publications related to data and metadata collection in databases, indexing of scientific articles and their citations, as well as software and tools essential for managing digital libraries and repositories. The database contains full-text articles along with abstracts, keywords, and citation information.

**Chronological Coverage:** Since 1999

### Search Functionality:

Searches can be conducted simply or through advanced options by title, author name, author affiliation, publication venue, subject terms, or any words appearing in the text. Searches can be further refined by publication year and minimum citation count.

**Access:** <https://citeseerx.ist.psu.edu>
