

Charakterystyka platformy czasopism i książek Elsevier/Science Direct

National license 2024-2026

Content The national platform contains **4215 journals under a national license for the years 2024-2026** ([list of journals 2025](#)).

The national license also cover selected book packages available on the publisher `server ([list of book packages](#)) **1712 monographs** (from 2013 and 2014) and **803 volumes of books series or handbooks from 2011-2015**.

Elsevier journals and books are available on the Science Direct server and will ultimately be archived on the ICM server with unlimited national access rights.

NOTE!!!

In addition to the national license, the following collections were purchased in 2025:

- Environmental Science,
- Chemical Engineering,
- Energy,
- Material Science.

Searching

Simple – using a keywords with the option to narrow down the search results to document type, title, and year of publication, and to sort the search results by relevance or date of publication.

Advanced – allows for specific searches using search phrases and Boolean operators (AND, OR, NOT) and/or any keywords in search fields such as: year range, journal or books title, author, author affiliation, references, document type (e.g., review article, encyclopedia, book chapter, communicate, scientific report etc.,).

- [Search e-journals available under national licenses](#) (*including archival resources available under national licenses from publisher such as: Elsevier, Nature, Springer, Wiley – previously available on the INFPNA platform*) - using keywords, author`s name, date publication, language of publication, scientific discipline, etc., on the Virtual Science Library website (**Wirtualna Biblioteka Nauki**).
- [Browse the list of Open Access journals and books](#) -including by field or discipline.

Access

[Online](#)
