	Page
FOREWORD	5
Clause	
1 General	7
1.1 Scope and object	7
1.2 Normative references.....	7
2 Definitions	9
3 Measurements.....	15
3.1 Introduction	15
3.2 General conditions.....	15
3.3 Description of test signals	17
4 Video signal measurement.....	19
4.1 Distortion measurements using test lines	19
4.2 Distortion measurements not feasible with test lines.....	23
4.3 Noise measurements	25
5 Measurement methods on the data signal	29
5.1 Bit error rate	29
5.2 Eye diagram	29
5.3 Equivalent degradation measurement	29
5.4 Operating margin.....	31
Tables	
1 Definition of signal No. 1, line 312.....	33
2 Definition of signal No. 2, line 623.....	33
3 Definition of signal No. 3, line 624.....	35
4 Definition of signal No. 4, line 311.....	35
5 Definition of signal No. 5, line 1	37
6 Definition of signal No. 6, line 313.....	37
Figures	
1 Hypothetical reference chain notional block diagram	39
2 Eye diagram for the duobinary signal	41
3 Test signal No. 1, line 312	43
4 Test signal No. 2, line 623	45
5 Test signal No. 3, line 624, positive polarity.....	47
6 Test signal No. 4, line 311	49
7 Test signal No. 5, line 1	49
8 Test signal No. 6, line 313	51
9 Rosman chart.....	53
10 A mask for the response to a shaped step	55
11 Unified random noise weighting filter for D2-MAC.....	57
12 Theoretical bit error ratio as a function of S/N (unweighted 1 V/5 MHz bandwidth)	59
Annexes	
A Relation between baseband measurements and RF measurements.....	61
B Relations between subjective quality assessment and the objective measurement of parameters	85
