

Contents

Chapter 1	Executive overview of PLM	1
	1.1 Talking to a VP	1
	1.2 Short answers	2
	1.3 The need for PLM	3
	1.4 Implementing PLM	6
	1.5 Responsibility for PLM	7
	1.6 A new way of thinking	8
	1.7 PLM offers different benefits to different managers ...	12
	1.8 Be aware	13
 Chapter 2	 Introduction to PLM	 15
	2.1 PLM in the 21st century	15
	2.2 Lifecycle	17
	2.3 Product	20
	2.4 The many components of PLM	21
	2.5 The emergence of PLM	24
	2.6 Why PLM is important: Lifecycle problems to be resolved	27
	2.7 More lifecycle problems to resolve	29
	2.8 Why PLM is important: Product development	
	problems to resolve	34
	2.9 Why PLM is important: Opportunities to seize	35
 Chapter 3	 Progress depends on retentiveness	 37
	3.1 Reality check	37
	3.2 Engineering vision	40
	3.3 Engineering strategy and engineering plan	42
	3.4 Remembering the past	42
	3.5 Lessons learned	43
 Chapter 4	 The opportunities and benefits of PLM	 45
	4.1 Opportunities galore	45
	4.2 Benefits along the lifecycle	45
	4.3 Increasing revenues	46
	4.4 Cutting costs	47
	4.5 Other expressions of benefit	48
	4.6 Doing all these things better	49
	4.7 Managing that product data better	51

	4.8 Opportunity, benefit and response	52
	4.9 It's important. Be careful, it's easy to fail	53
Chapter 5	The rationale for PLM	55
	5.1 Many drivers for change	55
	5.2 More problems across the lifecycle	64
	5.3 Control isn't easy	65
	5.4 Finding some structure	67
	5.5 Sustainable development	67
	5.6 Customer involvement and the voice of the product ...	68
	5.7 Survival rules	69
Chapter 6	Different views of PLM	71
	6.1 The obvious benefits of PLM	71
	6.2 Different standpoint, different view	71
	6.3 The CEO	72
	6.4 Business planners	73
	6.5 Functional managers	74
	6.6 Marketing managers; manufacturing managers	74
	6.7 Engineering managers; product support managers ...	75
	6.8 The workers	76
	6.9 Application system vendors	77
	6.10 Service providers	78
Chapter 7	You start here – in the details of the PLM swamp	79
	7.1 The product lifecycle environment	79
	7.2 Product data and product workflow	82
	7.3 Product workflow	83
	7.4 An inefficient workflow	84
	7.5 Product data, the devil is in the details	86
	7.6 The link between product data and product workflow .	93
	7.7 At second glance	94
	7.8 Key management issues around product data and product workflow	95
Chapter 8	PLM has the answers	97
	8.1 PLM meets the requirements	97
	8.2 To do, and not to do	102
Chapter 9	Some components of PLM	105
	9.1 Product lifecycle activities	105
	9.2 Product	106
	9.3 Organisational structure	106
	9.4 Human resources in the product lifecycle	107
	9.5 Methods, techniques, practices, methodologies	108
	9.6 Processes	114
	9.7 System components in the lifecycle	115
	9.8 Slicing and dicing the systems	117

9.9	Interfaces	118
9.10	Information	119
9.11	Standards	119
9.12	Many components	120
Chapter 10	Uncoordinated incoherent improvement initiatives ..	121
10.1	Traditional management across the product lifecycle	121
10.2	Pressure for PLM	123
10.3	Improvement initiatives	124
10.4	So what do we do now?	126
10.5	PLM feasibility study	127
Chapter 11	Coherent vision, strategy, plan, resources, metrics	129
11.1	Some definitions	129
11.2	From vision to plan	132
Chapter 12	A company's PLM Vision	135
12.1	What is a PLM Vision?	135
12.2	Basic points about the PLM Vision	135
12.3	Where does the PLM Vision fit?	136
12.4	Metrics and the PLM Vision	137
12.5	Factors to consider when developing the PLM Vision .	140
12.6	The team creating the PLM Vision	140
12.7	The PLM Vision report	142
Chapter 13	The process of PLM Visioning	143
13.1	Thinking about Visions	143
13.2	In the absence of a PLM Vision	144
13.3	Reasons for developing the PLM Vision	145
13.4	The danger of underestimating Vision	146
13.5	Starting the Visioning process	148
13.6	Haziness of the Vision	155
Chapter 14	Structure for the PLM Vision	157
14.1	Slicing and dicing	157
14.2	Key areas	158
14.3	A draft Vision in words	159
14.4	One step clearer	160
14.5	Reality check	161
Chapter 15	A strategy to achieve the Vision	163
15.1	The PLM strategy	163
15.2	Military strategy	163
15.3	Lessons learned	165
15.4	American Civil War	166
15.5	France	167
15.6	The English Channel	168
15.7	Russia	169

15.8	The Pacific Ocean	170
15.9	Principles of military strategy	171
Chapter 16	Industrial strategies	173
16.1	Manufacturing strategy	173
16.2	Company strategy	175
16.3	Principles of strategy	176
16.4	Importance of strategy	177
Chapter 17	Principles for the PLM strategy	179
17.1	PLM principles	179
17.2	Focus on the product	180
17.3	Involve the customer, listen to product feedback	182
17.4	Remember the planet and mankind	184
17.5	Simple slim-line organisation	184
17.6	Highly-skilled people	185
17.7	Use of modern technology	186
17.8	Coherent PLM Vision, strategy and plan	188
17.9	Continually increase sales and quality, reduce time cycles and costs	188
17.10	Watch the surroundings	190
17.11	Maintain security	190
Chapter 18	Preparing for the PLM strategy	191
18.1	The PLM strategy	191
18.2	Structure	192
18.3	A company-specific strategy	192
18.4	PLM strategy and change strategy	193
18.5	A strategy, not a system, practice or initiative	194
Chapter 19	Developing a PLM strategy	195
19.1	A five-step process	195
19.2	First step: Collecting information	195
19.3	Current situation of the surrounding environment ...	202
Chapter 20	Strategy identification and selection	205
20.1	Identifying strategies	205
20.2	Strategy elements	206
20.3	Implications of strategy elements	209
20.4	Policies	211
20.5	Strategy analysis	212
20.6	Communicating the strategy	213
20.7	The PLM plan	214
Chapter 21	Change management for PLM	217
21.1	PLM calls for change	217
21.2	Equation for change	218
21.3	People	220
21.4	Communication	222

	21.5	Learning	223
	21.6	The reward system	224
	21.7	Incremental change	225
	21.8	Transformational change	226
	21.9	The change leader position	228
	21.10	Making change occur	230
Chapter 22		PDM, an essential enabler for PLM	233
	22.1	PDM systems	233
	22.2	The importance of PDM systems	234
	22.3	Top management involvement with PDM	235
	22.4	Resolving data issues	237
	22.5	A multi-user, multi-organisation environment	238
	22.6	A multi-application, file-based environment	239
	22.7	Multiple data definition	240
	22.8	Multiple representations of data	241
	22.9	Multiple versions	243
	22.10	Multiple relationships	244
	22.11	Meaning of data	245
	22.12	Long-life data	246
	22.13	Convincing arguments	247
Chapter 23		Reasons for implementing a PDM system	249
	23.1	Introduction	249
	23.2	Information management	251
	23.3	Reuse of information	256
	23.4	Workflow management	259
	23.5	Engineering change management	263
	23.6	Overall business performance improvement	266
	23.7	Resolution of business problems	267
	23.8	Functional performance improvement	269
	23.9	Better management of product development activities	271
	23.10	Automation of product development activities	274
	23.11	IS effectiveness improvement	277
	23.12	Infrastructure for effective product development	279
	23.13	Questions about the future role of PDM	281
Chapter 24		Forewarned is forearmed	285
	24.1	Introduction	285
	24.2	Reasons and replies	285
	24.3	Networking for PDM success	297
	24.4	Engineering change process	299
Chapter 25		Financial justification of PDM	305
	25.1	Introduction	305
	25.2	Time value of money	307
	25.3	Net Present Value	309
	25.4	Cost justification	310
	25.5	Identification of benefits	311

	25.6	Project calculations	313
	25.7	Potential problems	315
Chapter 26		FAQs about implementation and use	317
	26.1	Introduction	317
	26.2	What PDM functionality do we need?	318
	26.3	Who should we involve in PDM?	318
	26.4	How do I cost-justify PDM?	321
	26.5	Does PDM fit with Concurrent Engineering?	323
	26.6	How should I introduce PDM?	324
	26.7	Should we buy or make PDM?	326
	26.8	Should I outsource PDM?	327
	26.9	Recommendations for a PDM Project Manager	329
Chapter 27		Barriers to successful implementation of PDM	333
	27.1	Many potential barriers	333
	27.2	System	333
	27.3	People	334
	27.4	Project team	336
	27.5	Process	338
	27.6	Organisational structure	339
	27.7	Funding	341
	27.8	Information	342
	27.9	Installation	344
	27.10	Everyday use	345
Chapter 28		Examples of PDM implementation	349
	28.1	Introduction	349
	28.2	Electronics industry	349
	28.3	Automotive industry	353
	28.4	Engineering industry	357
	28.5	Aerospace industry	361
	28.6	Summary	365
Chapter 29		Maturity model for PDM	367
	29.1	Four stages of evolution	367
	29.2	A company at Stage 1	367
	29.3	A company at Stage 2	370
	29.4	A company at Stage 3	373
	29.5	A company at Stage 4	375
	29.6	A questionnaire	378
	29.7	Traditional or modern?	380
Chapter 30		The PDM project	383
	30.1	Introduction	383
	30.2	PDM project start-up	383
	30.3	The task at hand	385
	30.4	The need for models	386
	30.5	The environment of modelling	387

30.6	Preparing to select a PDM solution	388
30.7	Gathering management information	389
30.8	Information about the product development environment	390
30.9	User requirements	394
30.10	Reporting results	396
30.11	Identifying scenarios	396
30.12	Prototyping and benchmarking	397
30.13	Selecting a PDM solution	398
30.14	Business benefits	398
30.15	Organisational issues	400
30.16	PDM architectures	400
30.17	The implementation plan	400
30.18	Implementation and use of PDM	401
30.19	A long-haul project	404
30.20	Review	405
Chapter 31	PLM functionality and systems	407
31.1	PLM functionality	407
31.2	Vendors of PLM systems and components	409
31.3	Examples of PLM in use	410
Chapter 32	Future developments	417
32.1	PLM systems with more complete functionality	417
32.2	Lifecycle phase/gate	417
32.3	Product feedback	417
32.4	Product portfolio simulator	417
32.5	Standards, standards, standards	417
32.6	Product responsibility	418
32.7	Product audit	418
32.8	Joint industry activities	418
32.9	Products and the law	418
32.10	PLM model	419
32.11	Financing new products	419
32.12	Understandable PLM	419
Index		437
