

Spectroscopy with Lasers

Prof. Dr. W. Demtröder

Universität Trier-Kaiserslautern, Fachbereich Physik, Kaiserslautern

Contents

I.	Introduction	3
II.	Characteristic Features of Lasers as Spectroscopic Light Sources	5
III.	Spectroscopic Applications of Lasers	12
	1. Absorption Spectroscopy	12
	2. Fluorescence Spectroscopy	19
	3. Measurements of Exited-State Lifetimes	23
	4. Spectroscopic Investigations of Collision Processes	27
	5. Photochemistry and Laser Photolysis	32
	6. Raman Spectroscopy	41
	7. Light Scattering Observations	48
	8. Plasma Spectroscopy	51
	9. Chemical Microanalysis and Spectrophotometry	56
	10. Nonlinear Optics and Solid-State Spectroscopy	57
IV.	High-Resolution Spectroscopy Based on Saturation Effects	60
	1. Different Kinds of Saturation Effects	60
	2. Lamb Dip Spectroscopy	64
	3. Frequency Stabilization by Saturated Absorption	68
	4. Investigation of Collision Processes from Line Shape Measurements	70
V.	Spectroscopy of Laser Media	72
	1. Infrared and Submillimeter Wave Spectroscopy	72
	2. Excitation Mechanisms and Collision Processes in Gas Discharges	74
	3. Solid-State and Semiconductor Lasers	76
	4. Chemical Lasers	78
VI.	Conclusion	84
VII.	Zusammenfassung	86
VIII.	References	88
