

CONTENTS

SECTION 1

Units and Nomenclature	1
Propagation of Sound	7
Measurement of Sound	15
Noises s Scale and Ratings	29
Room Acoustics	37
Human Response and Hearing Protection	47
Legislation – Noise Regulations and Hearing Protection	55
Community Standards	61
Hearing Conservation	67

SECTION 2

Linear Vibration Theory	79
Multi-degree of Freedom Systems	95
Torsional Vibrations	103
Analysis Techniques	111
Human Response to Vibration	121
Whole Body Vibration	131

SECTION 3

Measurement Techniques	143
Sound Level Meters and Microphones	153
Environmental Noise Monitoring	163
Analysis Equipment and Signal Processing	167
Audiometry Equipment	173

SECTION 4

Vibration Measurement and Analysis Transducers and Pick-up Devices	179
Machinery Health Monitoring	193
Torsional Vibration Measurement	207
Modal Analysis	213

SECTION 5

Engine Noise	229
Gear Noise.....	239
Bearings	253
Gas Turbines	263
Noise on Construction Sites	269
Noise Cancellation Techniques.....	287
Noise From Fluid Power Systems	293

SECTION 6

Sound Insulation	303
Sound Absorption Materials	315
Noise in Air Distribution Systems	325
Fan Noise.....	341
Acoustic Glazing	351
Commercial Buildings.....	369
Noise in Domestic Buildings.....	373
Auditoria.....	383

SECTION 7

Machine Balance and Vibration	397
Vibration Isolation	407
Resilient Mounting of Structures	425
Vibration and Noise in Tools	437

SECTION 8

Legal Aspects of Noise and Vibration	447
--	-----

SECTION 9

Standards, Codes of Practice and Publications	459
---	-----

SECTION 10

Editorial Index	469
Advertisers Index.....	481
