

Table of Contents

	Preface	i
1	<i>Maintenance Technology</i>	
	1.0 Machine Failure	1
	1.1 Maintenance Strategies	5
	1.2 Preventive Maintenance	5
	1.3 Predictive Maintenance	7
	1.4 Proactive Maintenance	13
	1.5 Root Causes of Failure	14
2	<i>Contamination Stability</i>	
	2.0 Contaminants	19
	2.1 Material Contaminants	20
	2.2 Contaminant Analysis	22
	2.3 Contaminant Exclusion Stability	28
	2.4 Fluid Filtration Stability	36
	2.5 Contaminant Level Reference State	48
	2.6 Component Contaminant Sensitivity	53
	2.7 Contamination Stability	59
3	<i>Leakage Stability</i>	
	3.0 Leakage	61
	3.1 Leakage Recognition	63
	3.2 Leakage Sources	68
	3.3 External Leakage Sites	70
	3.4 Internal Leakage Sites	92
4	<i>Fluid Chemical Stability</i>	
	4.0 Fluid Stability	99
	4.1 Stability Indicators	101
	4.2 Oxidation Stability	102
	4.3 Hydrolytic Stability	106
	4.4 Material Stability	108
	4.5 Anti-Rust/Corrosion Stability	112
	4.6 Radiation Stability	113
	4.7 Thermal Stability	115
	4.8 Lubricity Stability	117
	4.9 Antiwear Stability	118
	4.9 Infrared Spectral Stability	124
5	<i>Fluid Physical Stability</i>	
	5.0 Physical Properties	127
	5.1 Viscosity Stability	128
	5.2 Bulk Modulus	133
	5.3 Density/Specific Gravity Stability	137
	5.4 Surface Tension Stability	139
	5.5 Vapor Pressure/Volatility Stability	141
	5.6 Aeration Stability	142
	5.7 Water Content Stability	150
	5.8 Low Temperature Stability	153
	5.9 Obliteration Stability	154
	5.10 Dielectric Stability	155
	5.11 Heat Transfer Stability	158
	5.12 Particle Contamination Stability	160
	5.13 Flammability Stability	161
	5.14 Toxicity	165

6

Cavitation Stability

6.0	Cavitation Mechanics	169
6.1	Gaseous Cavitation	171
6.2	Vaporous Cavitation	172
6.3	Cavitation Overview	174
6.4	Reservoir Design Technology	176
6.5	Suction Line Hydraulics	178
6.6	Control Valve Effects	184
6.7	Cavitation in Actuators	187
6.8	Cavitation in Other Components	188
6.9	Cavitation Damage	189
6.10	Cavitation Inception	190

7

Temperature Stability

7.0	Temperature Extremes	193
7.1	Low Temperature Effects	194
7.2	High Temperature Effects	196
7.3	Cause of Overheating	207
7.4	Cures for Overheating	211
7.5	Heat Dissipation	212
7.6	High Temperature Overview	213

8

Wear Stability

8.0	Tribological Wear	217
8.1	Abrasion Wear	218
8.2	Adhesion Wear	223
8.3	Surface Fatigue Wear	228
8.4	Delamination Wear	233
8.5	Fretting Wear	237
8.6	Erosion Wear	241
8.7	Cavitation Wear	244
8.8	Corrosion Wear	247
8.9	Hydrogen-Induced Wear	251
8.10	Electrokinetic Wear	254
8.11	Radiation Wear	256

9

Mechanical Stability

9.0	Stability Factors	261
9.1	Mechanical Static Loads	262
9.2	Mechanical Dynamic Loads	267
9.3	Elastic Deflection	274
9.4	Elastic Buckling	275
9.5	Plastic Deformation	276
9.6	Material Creep	277
9.7	Material Fracture	278
9.8	Fatigue Fracture	279
9.9	Material Failure	282
9.10	Component Failures	283

10

The Proactive Approach

10.0	Maintenance Strategies	287
10.1	System Monitoring	289
10.2	Duty Cycle Severity	292
10.3	Conditional Failure Identification	295
10.4	Knowledge-Based Maintenance	296
10.5	System Diagnosis	298
10.6	Fluid System Diagnosis	300
10.7	System Prognosis	305
10.8	Prescriptive Action	305
10.9	Weak Points of Systems	306
10.10	Proactive vs. Reactive	312
10.11	Getting Started	315
10.12	Rewards of Proactive Maintenance	317

Bibliography	319
Index	333
