

# Table of Contents

Foreword.....	xxix
Introduction.....	1
<b>Part I Configuration Manager Overview and Concepts</b>	
<b>1 Configuration Management Basics</b>	<b>7</b>
Ten Reasons to Use Configuration Manager .....	8
The Evolution of Systems Management .....	9
Hurdles in the Distributed Enterprise .....	10
The IT Automation Challenge .....	10
Configuration “Shift and Drift” .....	11
Lack of Security and Control .....	11
Timeliness of Asset Data .....	12
Lack of Automation and Enforcement .....	12
Proliferation of Virtualization and Cloud Computing .....	12
Lack of Process Consistency .....	13
The Bottom Line .....	13
Systems Management Defined .....	14
Microsoft’s Strategy for Service Management .....	15
Microsoft’s Dynamic Systems Initiative .....	16
IT Infrastructure Library and Microsoft	
Operations Framework .....	19
Total Quality Management: TQM .....	24
Six Sigma .....	24
Service Management Mastery: ISO 20000 .....	24
Optimizing Your Infrastructure .....	25
Overview of Microsoft System Center .....	29
Reporting in System Center .....	30
Operations Management .....	31
Service Management .....	31
Protecting Data .....	32
Virtual Machine Management .....	32
Deploy and Manage in the Cloud .....	33
Orchestration and Automation .....	33
Cloud-Based Configuration Monitoring .....	34
Endpoint Protection .....	34
The Value Proposition of Configuration Manager .....	34
Summary .....	35

<b>2 Configuration Manager Overview</b>	<b>37</b>
The History of Configuration Manager .....	37
Systems Management Server 1.x .....	38
Systems Management Server 2.0 .....	38
Systems Management Server 2003 .....	39
System Center Configuration Manager 2007 .....	41
System Center 2012 Configuration Manager .....	42
Terminology in Configuration Manager .....	42
Site Hierarchy .....	43
Site .....	44
Site Systems .....	46
Senders .....	48
Addresses .....	49
Configuration Manager Discovery Types .....	49
Configuration Manager Agent .....	50
Configuration Manager Console .....	51
Collections .....	52
Queries .....	52
Alerts .....	53
Status System .....	53
Managing Applications .....	54
Content Management .....	57
Software Update Management .....	59
Compliance Settings .....	59
BITS .....	59
Software Metering .....	60
Network Access Protection .....	60
BranchCache .....	61
Reporting .....	61
What's New in This Version .....	62
64-Bit Site System Requirements .....	62
User-Centric Management .....	62
Applications and Packages .....	63
Hierarchy Changes .....	63
New Configuration Manager Console .....	64
Enhancements to BITS .....	64
Application Catalog .....	64
Extended Mobile Device Management .....	65
Management Point Enhancements .....	65
Boundary Changes .....	65
Fallback Site .....	66
Centrally Managed Client Settings .....	66

Role-Based Administration .....	66
Backup and Recovery .....	66
Collection Changes .....	67
Client Health Status Enhancements .....	68
Compliance Settings Changes .....	68
Remote Control Improvements .....	69
Hardware Inventory Improvements .....	69
Power Management Improvements .....	70
Software Updates Improvements .....	72
Improved End User Experience .....	73
Content Library .....	73
Operating System Deployment .....	73
Distribution Point Changes .....	74
System Center 2012 Endpoint Protection Integration .....	75
Feature Dependencies of System Center 2012	
Configuration Manager .....	75
Summary .....	77
<b>3 Looking Inside Configuration Manager</b>	<b>79</b>
Design Concepts .....	80
Active Directory Integration .....	81
Schema Extensions .....	81
Additional Active Directory Benefits .....	90
A WMI Primer .....	91
WMI Feature Set and Architecture .....	91
Inside the WMI Object Model .....	95
Managing WMI .....	98
Looking Inside the CIMV2 Namespace .....	103
WMI in ConfigMgr .....	111
ConfigMgr Client Namespaces .....	111
Hardware Inventory Through WMI .....	112
Additional Client Operations Through WMI .....	116
WMI on ConfigMgr Servers .....	120
Components and Communications .....	124
Inside the ConfigMgr Database .....	133
ConfigMgr Tables and Views .....	133
Using SQL Server Management Studio .....	134
Viewing Detailed Process Activity .....	138
SQL Replication Crash Course .....	146
Configuration Manager Database Replication .....	148
File-Based Replication .....	154
Summary .....	157

**Part II Planning, Design, and Installation**

<b>4 Architecture Design Planning</b>	<b>161</b>
Developing the Solution Architecture	161
Establishing Business Requirements	162
Assessing Your Environment	163
Planning for Licensing	165
Hierarchy Planning	167
Configuration Manager Sites	167
Planning Your Hierarchy Structure	169
Planning Boundaries and Boundary Groups	170
Choosing Client Discovery and Installation Methods	172
Defining Your Client Architecture	174
Planning for User-Centric Management	178
Planning Content Management	178
Planning for Infrastructure Dependencies	180
Active Directory Considerations	180
Planning Certificate Services	183
Site Planning	186
Site Servers and Site Systems Planning	186
Capacity Planning	188
Developing the Server Architecture	189
Planning for Solution Scenarios	190
Software Update Planning	190
Planning for Internet-Based Clients	193
Out of Band Management Planning	195
Testing and Stabilizing Your Design	197
The Proof of Concept	198
The Pilot Deployment	204
Summary	204
<b>5 Network Design</b>	<b>205</b>
Understanding Your Network	206
Configuration Manager Data Flow	206
Intrasite Server Communications	208
Communications with SQL Server	208
Communications Using RPC	209
Communications Using SMB	209
Replication of Deployment Content Refresh Data	213
Site System Communications Using HTTP and HTTPS	214
Other Server Communications	214

Client to Server Communications	214
Client Ports and Protocols	215
Reasons for Changing Ports	215
Initial Communication	221
Identifying and Contacting the Client's Assigned Site	222
Client Protocols	222
Planning for Network Access Protection	224
Site-to-Site Communications	225
Database Replication	225
File-Based Replication	226
Data Priorities	227
Fast Network and Slow Network Boundaries	227
Use of BITS	229
BITS Versions for ConfigMgr Clients	230
Modifying BITS Functionality Through Group Policy	231
Modifying BITS Functionality Within ConfigMgr	232
Comparative Advantages of Group Policy and ConfigMgr	
Settings for BITS	233
Systems with Multiple Interfaces and File Integrity Checking	233
ConfigMgr and BranchCache	234
Server and Site Placement	236
Deploying Servers to Support Internet-Based Clients	237
Using a Dedicated Site for Internet Clients	238
Allowing Site-to-Site Communications Across an	
Inner Firewall	239
Having a Site Span the Internal Network	
and Perimeter Network	240
Using Web Proxies and Proxy Enrollment Points	240
Intermittently Connected Users	241
Network Discovery	241
Discovering Network Topology	243
Topology and Client Discovery	245
Discovering Topology, Client, and Client Operating Systems	245
Troubleshooting ConfigMgr Network Issues	246
Network Configuration Issues	247
Basic Connectivity Problems	247
Name Resolution Issues	248
Blocked or Unresponsive Ports	249
Timeout Issues	250
Identifying Network Issues Affecting ConfigMgr	250
Summary	259

<b>6</b>	<b>Installing System Center 2012 Configuration Manager</b>	<b>261</b>
Configuring Pre-Installation Requirements	261	
Windows Components	262	
Supported SQL Server Requirements	263	
Validating and Configuring Active Directory Requirements	265	
Windows Server Update Services	265	
Prerequisite Checker	265	
Using the Prerequisite Files Downloader	269	
Performing Site Installations	270	
Installing the Central Administration Site	271	
Installing Primary Sites	278	
Installing Secondary Sites	288	
Installation Validation	294	
Site Properties	296	
Initial Configuration	296	
Installing Optional Site Systems	301	
Uninstalling Sites	309	
Uninstalling Primary Sites	309	
Uninstalling Secondary Sites	312	
Uninstalling a Full Hierarchy	314	
Troubleshooting Site Installation	315	
Summary	316	
<b>7</b>	<b>Migrating to System Center 2012 Configuration Manager</b>	<b>317</b>
About Migration	318	
Migration Background and Introduction	318	
Migration, Not an Upgrade	319	
Planning the Migration	320	
Central Site and Hierarchy Concepts in 2012	320	
About Site Mode	321	
What Is Migrated	321	
What Is Not Migrated	323	
Pre-Migration Activities	324	
Coexistence Considerations	327	
Migrating Your Configuration Manager Infrastructure	327	
Site Servers and Site Roles	328	
Security Considerations	332	
Boundaries and What's Changing	337	
Performing the Migration	338	
Migrating Features and Objects	338	
Migrating by Feature and Dependencies	338	
Migration Dependencies Configuration	339	

Configuring the Active Source Site .....	343
Configuring Child Sites for Data Gathering .....	345
Migration Jobs .....	347
Shared Distribution Points .....	366
Migration Clean Up .....	367
Migrating Reports .....	369
Legacy Reports .....	369
SSRS Reports .....	369
Custom Reports .....	369
Client Migration and Methods .....	370
Background and Client Migration Concepts .....	370
Client Migration Strategies for Your Network .....	371
Troubleshooting Migration Issues .....	371
Summary .....	372
 <b>Part III Configuration Manager Operations</b>	
<b>8 The Configuration Manager Console</b> .....	<b>375</b>
Console Highlights .....	376
Touring the Console .....	376
Configuration Manager Console Panes .....	377
Configuration Manager Console Bars .....	378
Backstage .....	378
ConfigMgr Workspaces .....	379
Assets and Compliance Workspace .....	380
Software Library Workspace .....	380
Monitoring Workspace .....	381
Administration Workspace .....	383
Console Node Details .....	384
Console Deployment .....	388
Console Placement .....	389
Supported Platforms .....	389
ConfigMgr Console Prerequisites .....	390
Installation Using the ConfigMgr Setup Wizard .....	391
Unattended Console Installation .....	394
Role-Based Administration .....	395
Introducing the “Show Me” Behavior .....	395
Behind the Scenes .....	397
The Three States of Interaction .....	397
Connecting to a Site .....	398
Recent Connections .....	398
Clearing Recent Connections .....	398
Personalizing the Console .....	400

The In-Console Alert Experience .....	401
Viewing Alerts .....	401
Managing Alerts .....	402
Configuring Alerts .....	403
Subscribing to Alerts .....	404
Configuration Manager Service Manager .....	404
Initiating the Configuration Manager Service	
Manager Console .....	406
Operating the Configuration Manager Service	
Manager Console .....	407
Security Considerations .....	408
SMS Provider Permissions .....	409
DCOM Permissions .....	409
WMI Permissions .....	409
Troubleshooting Console Issues .....	411
Console Logging .....	411
Verify Security .....	412
Connectivity Issues .....	416
Common Problems with the ConfigMgr Console .....	416
Summary .....	417
<b>9 Configuration Manager Client Management</b> .....	<b>419</b>
Discovery .....	419
Active Directory Forest Discovery .....	420
Active Directory Group Discovery .....	422
Active Directory User Discovery .....	424
Active Directory System Discovery .....	426
Heartbeat Discovery .....	427
Network Discovery .....	429
Manually Importing Clients into ConfigMgr .....	431
ConfigMgr Client Requirements .....	432
Hardware Dependencies .....	432
Software Dependencies .....	433
Supported Platforms .....	433
ConfigMgr Client Installation .....	435
Manual Installation .....	435
Installing with Logon Scripts .....	441
Client Push .....	442
Group Policy .....	447
Software Update Point .....	448
Client Approval .....	449

Blocking and Unblocking Clients.....	450
Automatically Upgrading the Client.....	450
Troubleshooting Client Installation.....	451
Client Assignment.....	453
Client Health.....	454
Client Settings.....	459
Defining Priority.....	461
Background Intelligent Transfer Device Settings.....	461
Client Policy Device Settings.....	463
Compliance Settings Device Settings.....	463
Computer Agent Device Settings.....	464
Computer Restart Device Settings.....	466
Endpoint Protection Device Settings.....	466
Hardware Inventory Device Settings.....	467
Network Access Protection (NAP) Device Settings.....	470
Power Management Device Settings.....	471
Remote Control Device Settings.....	471
Software Deployment Device Settings.....	476
Software Inventory Device Settings.....	477
Software Metering Device Settings.....	479
Software Updates Device Settings.....	481
State Messaging Device Settings.....	482
User and Device Affinity Settings.....	482
Using the Resource Explorer.....	483
Wake On LAN.....	484
WOL Prerequisites.....	484
Two Types of WOL.....	485
Configuring WOL.....	486
Using WOL.....	487
Summary.....	488
<b>Part IV Software and Configuration Management</b>	
<b>10 Managing Compliance</b>	<b>491</b>
New and Improved in System Center 2012	
Configuration Manager.....	493
Configuring Compliance Settings.....	493
Configuration Items and Baselines.....	495
Configuration Items.....	496
Configuration Baselines.....	512
Compliance Evaluation.....	517
Versioning.....	519
Configuration Packs.....	521

Exporting Configuration Items and Baselines .....	522
Compliance Authoring .....	523
Compliance Strategy .....	525
Reporting .....	526
On-Demand Results .....	527
Alerting .....	527
Remediation .....	528
Troubleshooting .....	529
Summary .....	531
<b>11 Packages and Programs</b>	<b>533</b>
About Packages, Programs, Collections, Distribution Points, and Deployments .....	534
Packages .....	534
Programs .....	534
Collections .....	535
Distribution Points .....	535
Deployments .....	536
Combining the Use of Packages, Programs, Collections, and Deployments .....	536
Creating a Package .....	536
Creating a Package from the Package Definition Wizard .....	537
Package Properties .....	543
Creating a Package with the New Package Wizard .....	559
Custom Packages .....	562
Repackaging Software .....	562
Avoiding Common ConfigMgr Software Packaging Issues .....	563
Program and Package Properties .....	563
Testing, Testing, Testing .....	563
Summary .....	564
<b>12 Creating and Managing Applications</b>	<b>565</b>
ConfigMgr Applications Overview .....	566
About Applications .....	566
About Deployment Types .....	567
About Detection Methods .....	569
About User Device Affinity .....	569
About Creating Applications .....	571
Creating a Windows Installer (MSI)-Based Application .....	571
Application Properties .....	576

Creating Deployment Types .....	591
Creating a Windows Installer-Based Deployment Type .....	592
Creating an Application Virtualization Deployment Type .....	595
Creating a Script-Based Deployment Type .....	599
Creating Detection Methods .....	602
Detection Methods for Windows Installer Applications .....	602
Other Detection Methods .....	604
Custom Script Detection Methods .....	607
Managing and Creating Global Conditions .....	610
Device Global Conditions .....	611
User Global Conditions .....	612
Custom Global Conditions .....	612
More About Managing Applications .....	617
Adding Dependencies .....	617
Managing Revision History .....	619
Exporting and Importing Applications .....	620
Superseding Applications .....	621
Retiring and Deleting Applications .....	622
Package Conversion Manager .....	623
Summary .....	626
<b>13 Distributing and Deploying Applications</b> .....	<b>627</b>
Creating and Managing Collections .....	628
Direct Rule .....	630
Query Rule .....	631
Include Rule .....	634
Exclude Rule .....	634
About Incremental Updates .....	634
User Collections Versus Device Collections .....	635
About Distribution Points .....	635
Installing Distribution Points .....	637
Distribution Point Groups .....	640
Associating Collections with Distribution	
Point Groups .....	641
Sending Content to Distribution Points .....	642
Monitoring Distribution Point Status .....	642
Updating Content on Distribution Points .....	645
Refreshing Content on Distribution Points .....	646
Removing Content from Distribution Points .....	646
Validating Content .....	647
Using BranchCache .....	647
Preferred Distribution Points .....	648

Prestaging Content .....	648
Importing and Exporting Content .....	652
Troubleshooting Content Distribution .....	654
About the Content Library .....	654
Deploying Packages and Applications .....	654
End User Experience .....	660
Software Center .....	660
Application Catalog .....	662
Monitoring and Troubleshooting Deployments .....	665
Simulated Deployments .....	667
Summary .....	667
<b>14 Software Update Management</b> .....	<b>669</b>
What's New in 2012 .....	670
Planning Your Update Strategy .....	670
Incorporated Tools .....	672
The Windows Update Agent .....	673
Windows Software Update Services .....	673
Preparing for Software Updates with ConfigMgr .....	674
Prerequisites for Software Updates .....	674
Software Update Points .....	676
Client Settings .....	687
Group Policy Settings .....	689
Software Update Building Blocks .....	692
All Software Updates .....	692
Software Update Groups .....	696
Update Deployments .....	698
Update Templates .....	703
Deployment Packages .....	704
Automatic Deployment Rules .....	706
Maintenance Windows .....	708
Superseded Updates .....	711
The Software Updates Process in Action .....	711
Software Update Decisions, Design, and Workflow .....	714
Compliance Scanning .....	716
End User Experience and Interaction .....	717
Notifications .....	717
Updates and Software Center .....	718
Update Installation .....	720
System Restarts and Restart Notifications .....	721
Monitoring Software Updates .....	723
Individual Update Status .....	723

Update Deployment Status .....	723
Reporting .....	724
A Super-Quick Walkthrough .....	724
Troubleshooting Software Updates .....	725
WSUS and SUP .....	725
Downloading Updates .....	726
Client Update Scanning and Deployment .....	727
Beyond the Built-In Update Process .....	727
System Center Update Publisher .....	728
SCUP Installation .....	728
SCUP Configuration .....	729
Catalogs .....	733
Publications .....	735
Updates .....	735
Custom Updates .....	737
Rules .....	741
Quick Walkthrough .....	742
Using NAP to Protect Your Network .....	742
NAP Prerequisites .....	742
Agent Settings .....	744
System Health .....	744
Client Compliance .....	747
Remediation .....	748
Summary .....	748
<b>15 Mobile Device Management</b> .....	<b>751</b>
Planning for Mobile Device Management .....	752
Overview of Mobile Device Management .....	753
Light Management .....	753
Exchange Server Connector .....	754
Access Rules .....	762
Troubleshooting Light Management .....	764
Working with Devices .....	764
End User Experience .....	767
In-Depth Management .....	768
Public Key Infrastructure .....	771
Heartbeat Discovery .....	771
Mobile Device Management Site Roles .....	772
Client Settings .....	775
Enrolling Mobile Devices .....	779
Software Deployment .....	780

Compliance Settings .....	782
Reporting .....	782
Partner Extensibility .....	783
Summary .....	784
<b>16 Endpoint Protection</b>	<b>785</b>
Prerequisites for Endpoint Protection .....	787
Planning and Considerations .....	788
Creating Custom Client Settings and Antimalware Policies .....	788
Deciding from Where to Update and When .....	789
Deploying to a Test Collection First .....	789
Categorizing Client Remediation Status .....	790
Targeting Collections with Custom Antimalware Policy and Client Settings .....	790
Installing the Endpoint Protection Role .....	792
Configuring the SUP for Endpoint Protection .....	797
Configuring the SUP to Synchronize Definition Updates .....	797
Creating Auto Deployment Rules for Definition Updates .....	799
Working with Antimalware Policies .....	804
Understanding the Default Antimalware Policy .....	804
Creating Custom Antimalware Policy .....	807
Importing and Merging Antimalware Policies .....	808
Configuring Alerts for Endpoint Protection .....	809
Configuring Email Notification .....	810
Configuring Alerts for Device Collections .....	812
Configuring Alert Subscriptions .....	813
Configuring Custom Client Device Settings for Endpoint Protection .....	814
Deploying Endpoint Protection Custom Client Agent Settings .....	815
Monitoring Status in Endpoint Protection .....	816
Configuring Collections to Appear in Collection View .....	816
Security State View for the Selected Collection .....	816
Operational State View for Clients and Computers in the Selected Collection .....	818
Performing On-Demand Actions for Malware .....	819
Reporting in Endpoint Protection .....	820
Creating and Deploying Windows Firewall Policies .....	823
Understanding the Endpoint Protection Client .....	824
Installing the Endpoint Protection Client .....	827
Understanding Endpoint Protection Client Settings .....	827
Communication Between the Client and the Server .....	829

Automatic Removal of Antimalware Software .....	829
Removing the Endpoint Protection Client .....	830
Delivery of Definition Updates .....	830
Summary .....	831
<b>17 Configuration Manager Queries</b>	<b>833</b>
Introducing the Queries Node .....	834
Organizing the Query List Pane .....	835
Viewing Queries and Query Results .....	837
Creating Queries .....	838
WMI Query Language .....	838
Objects, Classes, and Attributes .....	839
ConfigMgr Query Builder .....	841
Criterion Types, Operators, and Values .....	846
Criterion Types .....	846
Operators .....	848
Values .....	850
Writing Advanced Queries .....	851
Limitations of Extended WQL in ConfigMgr .....	852
Utilizing the Date and Time Functions in WQL Queries .....	853
Examples of Advanced Queries .....	854
Converting WQL to SQL .....	857
Relationships, Operations, and Joins .....	858
Querying Discovery Data .....	860
Querying Inventory Data .....	861
Using Query Results .....	863
Exporting Query Results to a Text File .....	863
Importing and Exporting Queries Between Sites .....	863
Creating a Collection Based on Query Results .....	866
Status Message Queries .....	866
Viewing Status Messages .....	867
Creating Status Message Queries .....	868
Summary .....	870
<b>18 Reporting</b>	<b>871</b>
SQL Server Reporting Services Overview .....	871
Implementing SSRS .....	872
SQL Server Version Selection .....	872
Server Placement Options .....	872
SSRS Installation .....	873
SSRS Configuration .....	876

Backing Up SSRS .....	882
Reporting Best Practices .....	884
Interacting with Reports from the Console .....	885
Search Capability .....	885
Running Reports .....	886
Creating Subscriptions .....	887
Managing SSRS Report Security .....	890
Creating a Report .....	890
