Preface

v

PART ONE MATHEMATICS AND SCIENCE

1 ALGEBRA	3
A. Definition	3
B. Conversion—Independent and Dependent Variables	4
C. Factoring	5
D. Quadratic Equations	6
E. Combining Exponents	8
F. Scientific Notation	9
G. Simultaneous Equations	10
H. Determinates	11
I. Determinates and Simultaneous Equations	12
J. Logarithms	13
K. Laws of Logarithms	13
2 PROBABILITY	16
A. Definition	16
B. Joint Probability	17
C. Mutually Exclusive Events	18
D. Repeated Trials	20
E. Binomial Distribution	21
F. Normal Distribution	23

CONTENTS

3 TRIGONOMETRY	26
A. Pythagorean Theorem	26
B. Sine and Cosine	28
C. Tangent, Cotangent, Secant, Cosecant	30
D. Complementary Angles	32
E. Radians	34
F. Inverse Trigonometric Functions	35
G. Laws of Sines and Cosines	36
H. Rule of Similar Triangles	38
4 ANALYTIC GEOMETRY	40
A. Definition	40
B. Distance Between Two Points	41
C. Loci	42
D. Equation of a Straight Line	44
E. The Slope of a Straight Line	45
F. The Circle	47
G. Other Second-Degree Polynomials	49
5 DIFFERENTIAL CALCULUS	51
A. Definition	51
B. Slope of a Curved Line	52
C. Differentiation of Polynomial Terms	55
D. Differentiation of Algebraic Expressions	57
E. Related Rates	58
F. Implicit Differentiation	60
G. Partial Differentiation	61
H. Maximum and Minimum	63
I. Differentiation of Trigonometric Functions	64
J. Differentials	65
6 INTEGRAL CALCULUS	68
A. Definitions	68
B. The Area Under a Curved Line	71
C. Integration by Parts	73
D. Partial Fractions	75
E. Areas, Volumes, and Moments	76
F. Differential Equations	78
7 WAVE THEORY	82
A. Application	82
B. Doppler Effect	83
C. Refraction	85

CONTENTS

8 CHEMISTRY	87
A. Atomic Theory	87
B. The Periodic Table	90
C. Molecules	91
D. The Reaction Equation	93
E. Oxidation-Reduction	94
F. Acid-Base Neutralization	95
G. Solutions	99
H. Electrolysis	98
9 GAS LAWS	99
A. The Perfect Gas Law	99
B. Changes of State	100
 PART TWO ENGINEERING FUNDAMENTALS	
	103
10 COMBUSTION	105
A. Introduction	105
B. Stoichiometric Combustion of Hydrocarbons	107
C. Combustion in Air	108
D. Afternoon Problem Set—Combustion	109
11 THERMODYNAMICS	111
A. Introduction	111
B. The First Law of Thermodynamics	113
C. Specific Heat	116
D. The Open System	118
E. The Second Law of Thermodynamics	120
F. Equations of State	122
G. The Perfect Gas Law as an Equation of State	123
H. Equations of State for Real Gases	125
I. Equations of State for Two-Phase Fluids	126
J. Vapor Cycles	129
K. Afternoon Problem Set—Thermodynamics	131
12 FLUIDS	135
A. Introduction	135
B. Hydrostatics	137
C. Buoyancy	140
D. Fluid Kinematics	141
E. Fluid Viscosity	145
F. Friction Energy	146

CONTENTS

G. Hydrodynamics	149
H. Afternoon Problem Set—Fluids	151
13 HEAT TRANSFER	154
A. Conduction	154
B. Convection	157
C. Radiation	159
D. Afternoon Problem Set—Heat Transfer	160
14 STATICS	163
A. Introduction	163
B. Vector Addition	166
C. Moments and Couples	169
D. Centroids, Centers of Gravity, and Moments of Inertia	171
E. Trusses	175
F. Afternoon Problem Set—Statics	179
15 KINEMATICS AND DYNAMICS	182
A. Introduction	182
B. Kinematics	184
C. Relative Kinematics	186
D. Vector Multiplication	189
E. Forces	192
F. Centrifugal Force	194
G. Impulse and Momentum	196
H. Energy	198
I. Afternoon Problem Set—Kinematics and Dynamics	201
16 MECHANICS OF MATERIALS	204
A. Introduction	204
B. Hook's Law and Deformation	207
C. Poisson's Ratio	209
D. Thermal Expansion	209
E. Pipes and Pressure Vessels	211
F. Rivet Joints	213
G. Shafts	215
H. Stresses in Beams	216
I. Deflection of Beams	220
J. Columns	222
K. Afternoon Problem Set—Mechanics of Materials	224

CONTENTS

17 ELECTRICITY	227
A. Introduction	227
B. Electrical Work	228
C. Resistance	230
D. Batteries	231
E. Resistance Networks	233
F. Magnetism	235
G. Electromagnetic Induction	239
H. Capacitance	243
I. Alternating Current	246
J. Ohms Law Applied to AC Circuits	250
K. Complex Notation	253
L. Three-Phase Power	256
M. Resonant Circuits	259
N. Afternoon Problem Set—Electricity	262
18 ENGINEERING ECONOMICS	266
A. Costs and Revenue	266
B. Depreciation	270
C. Time Value of Money	273
D. Payments and Annuities	275
E. Probabilistic Costs and Payments	278
F. Afternoon Problem Set—Engineering Economics	279
INDEX	283
