1	Introduction	1
	References	8
2	Structure and Applicability of Regulations.....	9
	2.1 Structure of Regulations.....	9
	2.2 Classification of Vehicles as Light-Duty and Heavy-Duty	13
	References	15
3	Type Approval of Light-Duty Vehicles in Terms of Emission of Pollutants.....	19
	3.1 Principles of Type Approval	19
	3.2 Type I Test	26
	3.2.1 Limit Values.....	26
	3.2.2 Measurement Method and Test Equipment.....	39
	3.3 Other Tests	54
	3.4 Approval Extension.....	61
	References	63
4	Type Approval of Heavy-Duty Vehicles for Emission of Pollutants	67
	4.1 Scope of Application and Rules of Type Approval.....	67
	4.2 Steady State Test and Transient Test	70
	4.2.1 Operation Cycles and Prescribed Limits	70
	4.2.2 Measurement Method and Test Equipment.....	78
	4.3 Verification of Off-Cycle Emissions.....	83
	4.4 Durability of Pollution Control Devices	85
	4.5 OBD Testing	86
	4.6 Other Tests	87
	References	89
5	Production and In-Service Conformity	91
	5.1 Verification of Production Conformity	91
	5.2 Verification of In-Service Conformity	91

5.3	Method for Determining Averaging Windows with the Use of Reference Work	94
5.4	Method for Determining Averaging Windows with the Use of Reference Carbon Dioxide Mass	95
	References	97
6	Measurements of Exhaust Emissions In-use Conditions.....	99
6.1	Testing Possibilities	99
6.2	Tests of Passenger Cars Fitted with Different Propulsion Systems	101
6.2.1	Conventional Drive Vehicles	101
6.2.2	Vehicles Fitted with Start/Stop Systems	112
6.2.3	Hybrid Vehicles	121
6.3	Tests of Heavy-Duty Vehicles	123
6.4	Tests of City Buses.....	130
6.5	Tests of Non-road Vehicles.....	134
6.5.1	Pick-Up Trucks and Tractors	134
6.5.2	Farming and Construction Machines.....	136
6.5.3	Rail Vehicles	141
6.5.4	Special-Purpose Vehicles	148
