COMMITTEE ON METROLOGY AND SCIENTIFIC INSTRUMENTATION

CONTENTS

He B., Zheng H., Ding S., Yang R., Shi Z. – A review of digital filtering in evaluation of surface roughness	217
Chen Y., Xu H., Yang W., Yang C., Xu K. – Rat robot motion state identification based on a wearable inertial sensor.....	255
Feng S., Cui J., Zhang Z. – Fault diagnosis method for an aerospace generator rotating rectifier based on dynamic FFT technology	269
Karpienko K., Marzejon M.J., Mazikowski A., Plucinski J. – Quasi-distributed network of low coherence-fiber-optic Fabry-Pérot sensors with cavity length-based addressing	289
Kowalski M.L., Grudzień A., Ciurapinski W. – Detection of human faces in thermal infrared images	307
Guerra M.G., Galantucci L.M., Lavecchia F., De Chiffre L. – Reconstruction of small components using photogrammetry: A quantitative analysis of the depth of field influence using a miniature step gauge	323
Szymczak C. – PIFA antenna for partial discharge detection in power Transformers	343
Su D., Cai X., Li Y., Zhao W., Zhang H. – New approach to spindle thermal extension measuring based on machine vision for the vertical machining centre	357
Geisler T., Manns M. – Layer thickness measurement of technically anodised Aluminium surfaces by using goniometric scattered light	371
Arkani M. – Observation probability estimation of dead-time models using Monte Carlo simulations	383
Gajdosik T., Kucera L., Gajdac I., Fric A., Markovic J. – Metrological equipment for verification and calibration of non-automatic weighing instruments – axle and crane weighing instrument	397

CONTENTS

He B., Ding S., Shi Z. – A comparison between profile and areal surface roughness parameters	413
Zhang S., Dubljevic S. – Trajectory determination for pipelines using an inspection robot and pipeline features	439
Gelany S. A., Mahmoud G. M. – An investigation on using the falling mass technique for dynamic force calibrations	455
Lee H.-H., Yoon K.-T., Choi Y.-M. – Checkweigher using an emfc weighing cell with magnetic springs and air-bearings	465
Xu P., Li R. J., Zhao W. K., Chang Z. X., Ma S. H., Fan K. C. – Development and verification of a high-precision laser measurement system for straightness and parallelism measurement	479
Popiołek-Masajada A., Frączek E., Burnecka E. – Subpixel localization of optical vortices using artificial neural networks	497
Pełczyński P., Szewczyk W., Bieñkowska M. – Single-camera system for measuring paper deformations based on image analysis	509
Jovanović J., Denić D. – NTC thermistor nonlinearity compensation using Wheatstone bridge and novel dual-stage single-flash piecewise-linear ADC	523
Sondej D., Szymanowski R., Szplet R. – Methods of precise determining the transfer function of picosecond time-to-digital converters	539
Halchenko V. Ya., Trembovetska R., Tychkov V. – Surrogate synthesis of frame eddy current probes with uniform sensitivity in the testing zone	551
Ren H., Takada T., Tanaka Y., Li Q. – An evaluation method of observable charge trap depth for the PEA method and its complementarity with the Q(t) method	565
Suproniuk M. – Modelling of changes in the resistivity of semi-insulating materials	581
Duarte Franco J. J., Villamizar Mora C. M., García Sánchez C. E. – Characterization of a static expansion standard for calibrating medium and high vacuum pressure gauges	593
