

Archives of Mechanics

Contents of issue 1 vol. 73

- 3 A. E. ABOUELREGAL, A. M. ZENKOUR, *Magnetothermoelastic vibrations on a viscoelastic microbeam subjected to a laser heat source*
- 27 T. LEWIŃSKI, *Optimum design of elastic moduli for the multiple load problems*
- 67 X. WANG, P. SCHIAVONE, *Uniform stress field inside a non-parabolic open inhomogeneity interacting with a mode III crack*
- 83 M. MUCHA, B. WCISŁO, J. PAMIN, *Simulation of Lueders bands using regularized large strain elasto-plasticity*

Archives of Mechanics

Contents of issue 2 vol. 73

- 121 X. ZHANG, S. LIANG, S. SHAO, J. YU, *A quadrature-free Legendre polynomial approach for the fast modelling guided circumferential wave in anisotropic fractional order viscoelastic hollow cylinders*
- 153 J. STEMPKA, Ł. KUBAN, A. TYLISZCZAK, *Impact of a discretization scheme on an autoignition time in LES of a reacting droplet-laden mixing layer*
- 175 S. MOHAN, S. KUNDU, K. GHOSHAL, J. KUMAR, *Numerical study on two dimensional distribution of streamwise velocity in open channel turbulent flows with secondary current effect*
- 201 P. NIEGODAJEW, A. DRÓŹDŹ, W. ELSNER, *Application of the diagnostic plot in estimation of the skin friction in turbulent boundary layer under an adverse pressure gradient*

Archives of Mechanics

Contents of issue 3 vol. 73

- 219 X. WANG, P. SCHIAVONE, *A screw dislocation located outside, inside or on the interface of a parabolic elastic inhomogeneity*
- 237 D. X. TUNG, *Wave propagation in nonlocal orthotropic micropolar elastic solids*
- 253 C. Y. WANG, *Ponding on an inflated tube and the membrane trough*
- 267 A. BOGUSLAWSKI, K. WAWRZAK, *Absolute instability of double annular jets: local stability analysis*
