

Archives of Mechanics

Contents of issue 1 vol. 74

- 3 M.-Q. LE, *Molecular dynamics study of the fracture of single layer buckled silicon monosulfide and germanium selenide*
- 13 İ. ÇÖMEZ, Y. ALINIA, M. A. GÜLER, *The partial slip contact problem for a monoclinic coated half plane*
- 39 W. SOBIESKI, *An efficient method of tortuosity estimation*

Archives of Mechanics

Contents of issue 2-3 vol. 74

- 69 R. TIWARI, A. M. SAEED, R. KUMAR, A. KUMAR, A. SINGHAL, *Memory response on generalized thermoelastic medium in context of dual phase lag thermoelasticity with non-local effect*
- 89 V. H. NAM, V. M. DUC, C. V. DOAN, N. T. THANH XUAN, N. T. PHUONG, *Nonlinear postbuckling behavior of auxetic-core toroidal shell segments with Graphene reinforced face sheets under axial loads*
- 109 S. VIGDERGAUZ, *The stress-minimizing hole in a shear-loaded elastic plate at a given energy increment*
- 127 S. DE CICCIO, *Non-simple elastic materials with double porosity structure*
- 143 X. WANG, P. SCHIAVONE, *Uniformity of electroelastic field within a three-phase anisotropic piezoelectric elliptical inhomogeneity in anti-plane shear*
- 157 M. TURKYILMAZOGLU, *Bödewadt flow and heat transfer of dusty fluid with Navier slip*
- 173 S. DEBNATH, A. K. ROY, O. A. BÉG, *Reactive solute transport in blood flow through a permeable capillary*
- 201 T. SURESH, O. SZULC, P. FLASZYNSKI, *Aeroacoustic analysis based on FW-H analogy to predict low-frequency in-plane harmonic noise of a helicopter rotor in hover*

Archives of Mechanics

Contents of issue 4 vol. 74

- 251 T. H. NAM, I. PETRÍKOVÁ, B. MARVALOVÁ, *Numerical simulation of single- and multi-step shear stress relaxations of isotropic magnetorheological elastomer using fractional derivative viscoelastic models*
- 267 K. MAGNUCKI, E. MAGNUCKA-BLANDZI, L. WITTENBECK, *Bending of a generalized circular sandwich plate under a concentrated force with consideration of an improved shear deformation theory*
- 283 Z. TANG, W. YE, *Bounds of the effective elastic moduli of nanoparticle-reinforced composites based on composite sphere assemblage and interface stress model*
- 319 T. LEWIŃSKI, *On Cherkaev–Lurie–Milton theorem in the plane problems of linear elasticity*

Contents of issue 5 vol. 74

- 345 A. ABDUL-LATIF, F. ABED, CH. OUCIF, G. Z. VOYIADJIS, *Effect of various temperatures and strain-rates combinations on the thermomechanical behavior of 42CrMo steel*
- 373 D. X. TUNG, *The reflection and transmission of waves at interface between two nonlocal orthotropic thermoelastic halfspaces*
- 391 J. BALDONEDO, J. R. FERNÁNDEZ, R. QUINTANILLA, *On the fully discrete approximations of the MGT two-temperatures thermoelastic problem*
- 409 K. A. MIZERSKI, *Anisotropic turbulent viscosity and large-scale motive force in thermally driven turbulence at low Prandtl number*

Archives of Mechanics

Contents of issue 6 vol. 74

- 441 Z. ZHOU, M. YU, X. WANG, Z. HUANG, *Peridynamic analysis of 2-dimensional deformation and fracture based on an improved technique of exerting traction on boundary surface*
- 463 C.-P. WU, E.-L. LIN, *Free vibration analysis of porous functionally graded piezoelectric microplates resting on an elastic medium subjected to electric voltages*
- 513 R. BUSTAMANTE, K. R. RAJAGOPAL, *Applications of implicit constitutive theory for describing the elastic response of rocks and concrete*
- 549 M. GÜRBÜZ-ÇALDAĞ, E. ÇELİK, *Stokes flow in lid-driven cavity under inclined magnetic field*
