

Contents

Solid Particle Movement Simulation in a Quiescent Container Based on Discrete Element Method Using CFDEM	1
Seyyedmahdi Ostadosseyini, Abdolmajid Mohammadian, and Abolghasem Pilechi	
A Central Finite Volume Surface Gradient Method for the Two-Layer Shallow Water Equations with Rigid Lid	25
Rony Touma and Ralph Lteif	
Compressible Enstrophy Transport for Flow in a Low-Pressure Turbine with Unsteady Wakes Impinging at the Inflow	59
Aditi Sengupta	
Improving the Cooling Efficiency of Microchips by Vapor Chamber	87
Kirill Delendik, Tatiana Baranova, Andrei Chorny, Natalia Kolyago, Olga Voitik, and Yulia Zhukova	
A Comparative Study of Correlation-Based Transition Models for Aerodynamics in CFD Code NSMB	115
Abderahmane Marouf, Marianna Braza, and Yannick Hoarau	
Exact Riemann Solution for a Homogeneous Equilibrium Model with Four Equations	133
Abdelmjid Qadi El Idrissi	
A Comparison of $k - \varepsilon$—Type Turbulence Models for Prediction of Inclined Dense Jets	185
Xinyun Wang and Abdolmajid Mohammadian
