

TABLE OF CONTENTS

PREFACE	7
SYMBOLS	8
1. SPC IN QUALITY ENGINEERING	9
2. ELEMENTS OF PROBABILITY CALCULUS AND MATHEMATICAL STATISTICS USED IN STATISTICAL PROCESS CONTROL	16
2.1. Introduction to mathematical statistics	16
2.2. Definitions of basic concepts of probability calculus and mathematical statistics used in statistical process control	17
2.3. Data presentation in SPC	25
2.4. Trust ranges of statistical parameters	27
2.5. Distributions of random variables	29
2.5.1. Characteristic of random variables	29
2.5.2. Distributions of discrete random variable	30
2.5.3. Distributions of continuous random variable	32
2.6. Random variable normality testing	35
3. PRODUCTION PROCESS STABILITY AND CAPABILITY ANALYSIS	36
3.1. Introduction to SPC	36
3.2. Requirements for production processes from quality point of view	39
3.3. Process regulation with control charts	40
3.3.1. Construction basics and types of control charts	40
3.3.2. Classic control charts	49
3.3.3. Sequential charts	60
3.3.4. Adaptative charts	68
3.3.5. Multidimensional 7^2 Hotelling chart	68
3.3.6. Charts for non-normal distributions	72
3.4. Process capability	73
3.5. Production process stability and capability analysis	86
4. MEASUREMENT SYSTEMS STABILITY AND CAPABILITY ANALYSIS FOR SPC USE	95
4.1. Requirements for measurement tools and systems	95
4.1.1. Resolution	95
4.1.2. Uncertainty	96

4.1.3. Accuracy	97
4.1.4. Repeatability	97
4.1.5. Reproducibility	98
4.1.6. Stability	99
4.1.7. Linearity	99
4.2. Methodology of stability and capability analysis for measurement systems	100
4.3. Measurement uncertainty	100
4.3.1. Uncertainty and measurement error	100
4.3.2. Estimation of uncertainty of geometrical characteristics	105
4.3.3. Measurement uncertainty and tolerance range	110
4.4. Procedure 1 of measurement system valuation	112
4.5. Procedure 2 of measurement system validation (R&R method)	117
4.6. Procedure 3 of measurement system validation	124
5. SIX SIGMA METHODOLOGY	129
6. SPC IN COMPUTER AIDED QUALITY MANAGEMENT (CAQ)	139
7. SPC SUPPORTING TOOLS AND TECHNIQUES	143
7.1. Problem analysis tools in quality engineering	143
7.2. Ishikawa diagram	144
7.3. Pareto diagram	146
7.4. Flow chart	148
VOCABULARY	150
REFERENCES	154
