Preface ix

INTRODUCTION

Introduction	
E. Macnair	3
Comments	11

COMPUTER MODELING

Simulation of Power Plant Condenser Performance by Computational Methods: An Overview	
B. J. Davidson and M. Rowe	17
Potential Problem Areas in Simulating Condenser Performance	
G. M. Brickell	51
Heat Rejection System Optimization	
D. L. Vrable	63
Modeling of the Gas/Vapor Phase Flow	
D. Butterworth	75
Comments	83

NONCONDENSABLE GASES

Modern Developments in Marine Condensers: Noncondensable Gases: An Overview	
D. Chisholm	95
Noncondensable Gas Removal in Closed Cycle OTEC Plants	
W. L. Owens	143
Condensation in the Presence of Noncondensing Gases	
J. W. Rose	151
A Designer's Approach to Surface Condenser Venting and Deaeration	
R. L. Coit	163
Comments	181

VAPOR SHEAR AND CONDENSATE INUNDATION

Vapor Shear and Condensate Inundation: An Overview

T. Fujii **193**

Combined Effects of Vapor Shear and Inundation in Tube Bundles

D. M. Eissenberg **225**

Additional Observations on Vapor Shear and Condensate Inundation

Y. R. Mayhew **229**

The Inclusion of Wall Temperature and Drainage Effects in Condensation Theory

A. A. Nicol **259**

Inundation without Vapor Shear

D. Butterworth **271**

Comments **279**

ENHANCEMENT

The Use of Enhanced Surface Geometries in Condensers: An Overview

R. L. Webb **287**

Enhancement on Vertical Fluted Surfaces

J. W. Michel **325**

Condensation Enhancement: Applications to Refrigerant Condensers

K. E. Starner **345**

The Effect of Noncondensable Gases on Enhanced Surface Condensation

J. Cunningham **353**

Comments **367**

FOULING

Fouling of Heat Transfer Surfaces: An Overview

J. G. Knudsen **375**

Effects of Fouling and Related Comments on Marine Condenser Design

J. Taborek **425**

Fouling: Typical Experimental Results and Observations

E. Macnair **431**

The Impact of Fouling on Condenser Design and Operation

W. L. Adamson **439**

Comments **445**

APPENDIX: SUMMARY AND DISCUSSION

Computer Modeling
B. J. Davidson **451**

Noncondensable Gases
D. Chisholm **453**

Vapor Shear and Condensate Inundation
Y. R. Mayhew **455**

Enhancement
R. L. Webb **457**

Fouling
J. G. Knudsen **459**

Open Discussion **461**

Participants **485**

Index **489**
