Oleg KROL, Volodymyr SOKOLOV3 Selection of worm gearing optimal structure for machine rotary table	3
Imed FARAH, Abdelouahab REZAIGUIA, Ahcene MOUASSA, Laefer DEBRA, Salah GUENFOUD11 Free vibration analysis of multi-span orthotropic bridge deck with rubber bearings	11
Mariusz BANASZKIEWICZ32 Concept of advanced lifetime monitoring system for steam turbines	32
Abdelhamid BOUROUHO, Abdelilah JILBAB, Chafik NACIR, Ahmed HAMMOUCH31 Classification of cardiovascular diseases using dysphonia measurement in speech	31
Viktor OROBEY, Oleksii NEMCHUK, Oleksandr LYMARENKO, Varvara PITERSKA, Liliia LOHINOVA39 Taking account of the shift and inertia of rotation in problems of diagnostics of the spectra of critical forces mechanical systems	39
Oleksandr OSTAPCHUK, Valeriy KUZNETSOV, Włodzimierz KRUCZEK, Vitaliy KUZNETSOV, Dmytro TSYPLENKOV45 Analysis of the neutral grounding modes influence on the reliability characteristics of local systems with renewable energy sources	45
M'hamed BIRAME, Sid Ahmed BESSEDIK, Mohamed Fouad BENKHORIS57 Detection of partial rotor bar rupture of a cage induction motor using least square support vector machine approach	57
Tarek KHOUALDIA, Abdelaziz LAKEHAL, Zoubir CHELLI, Kais KHOUALDIA, Karim NESSAIB65 Optimized multi layer perceptron artificial neural network based fault diagnosis of induction motor using vibration signals	65
Adam MAŃKA, Andrzej HEŁKA, Anna KULA75 Analysis of the possibility of using non-calibrated noise measurement systems (smartphones) for machine diagnostics	75
Krzysztof ROCZEK, Adrian KROL, Marek FIDALI, Tomasz ROGALA85 A hybrid diagnostic system of main drive of industrial press line	85
Paweł FABIŚ93 DME as a fuel for SI engines cars	93
Mohcine CHAJDI, Ahmed ADRI, Khalid EL BIKRI, Rhali BENAMAR101 Analysis of the associated stress distributions to the nonlinear forced vibrations of functionally graded multi-cracked beams	101

Contents

Abdelmalek ELHADI, Salah AMROUNE, Moussa ZAOUI, Barhm MOHAMAD, Ali BOUCHOUCHA.....	3
Experimental investigations of surface wear by dry sliding and induced damage of medium carbon steel	
Daniel MOKRZAN, Julia MILEWICZ, Grzegorz M. SZYMAŃSKI, Sławomir SZRAMA.....	11
Vibroacoustic analysis in the assessment of the technical condition of the aircraft airframe composite elements	
Khaled BELHOUCHE, Abdelhafid BAYADI, Nadjim ALTI, Lyamine OUCHEN.....	21
Effects analysis of the pollution layer parameters on a high-voltage porcelain cylindrical insulator using response surface methodology	
Federico BIANCHI, Luca PETRUCCI, Lorenzo SCAPPATICCI, Alberto GARINEL, Lorenzo BIONDI, Marcello MARCONI	29
Comparison between finite elements simulation of residual stress and computer vision measurements in a welding TIG process	
Jerzy ŁUKASIK.....	39
Relation between pre-warning time and actual train velocity in automatic level crossing signalling systems at level crossings	
Tomasz STOECK.....	47
Analytical methodology for testing common rail fuel injectors in problematic cases	
Messaouda Benbitour KHENNANE, Slimane BOUGHALI, Djamel BECHKI, Layachi ZAGHBA, Amor FEZZANI, Idriss Hadj MAHAMMED.....	53
Experimental performance characterization and economic efficiency of 16.28 KWP grid-tied PV systems in semi-arid climate	
Andrzej STANIEK.....	67
Identification of rock bolt length in situ conditions	
Mustafa Baqir HUNAIN, Basim A. ABASS, Jaafar Musa AKHUDAIR.....	75
Experimental and numerical studies of fatigue properties of carbon/glass fiber/epoxy hybrid composites enhanced with nano TiO ₂ powder	
Dmitry O. BATRAKOV, Angelika G. BATRAKOVA, Sergey N. URDZIK, Vadim R. DANIELYAN.....	85
Nondestructive diagnostics and detection of subsurface cracks in non-rigid pavements with GPR	
Basim Ajeel ABASS, Mushrek A. MAHDI.....	97
Effect of micro protrusions on the performance of elliptical journal bearings operating with couple stress lubricant	
Khadidja BOUALLAG, Rabah DJEKIDEL, Sid Ahmed BESSEDIK	105
Optimization of induced voltage on buried pipeline from HV power lines using grasshopper algorithm (GOA)
