Zbigniew Cywiński

Bill Addis (Ed.): Physical Models — Their Historical and Current Use in Civil and Building Engineering Design Ernst & Sohn, Berlin 2021-01-14 3

Peter Breuer, Tadeusz Chmielewski, Piotr Górski

Dynamic Response of the Stuttgart TV Tower Measured by Classical Instruments and GPS Technology 7

Paweł Grzegorz Kossakowski

Relocation of a Historic Building at the Old Norblin Factory in Warsaw 39

Czesław Machelski, Leszek Korusiewicz

Contact Interaction between Corrugated Steel Shell and the Soil Backfill Determined based on the Measurements of Shell Deformations 57

Włodzimierz Andrzej Bednarek

An Influence of a Generated Track Intentional Irregularity on a Static Work of a Railway Track 81

Dominik Logoń

The Effect of Limit Values of Siliceous Fly Ash Content on the Durability of Concrete Structures in Relation to Exposure Classes 99

Janusz Sobieraj, Dominik Metelski, Paweł Nowak

The View of Construction Companies' Managers on the Impact of Economic, Environmental and Legal Policies on Investment Process Management 111

Jarosław Malesza, Czesław Miedziałowski

Analytical Models Tracing Deformation of Wood-Framed Walls During Vertical Transport 131

Shaowei Duan, Xinglong Liu, Jian Yuan, Zhifeng Wang

Pseudo-Static Test of Steel-Glulam Composite Beam-to-Column Exterior Joints 147

Grzegorz Wrzesiński

Anisotropy of Soil Shear Strength Parameters Caused by the Principal Stress Rotation 163

Wojciech Terlikowski, Martyna Gregoriou-Szczepaniak, Ewa Sobczyńska Kacper Wasilewski

Advantages of Using 3D Scanning in the Survey of Architectural Monuments on example of Archaeological Sites in Egypt and Russia 189

Abdul Chalid

Effect of the Ground Granulated Blast Furnaceslag on the Pore Structure of Concrete 203

Andrzej Brzeziński, Tomasz Dybicz

Possibility of Big Data Application for OD-matrix Calibration in Transport Demand Models 215

Łukasz Szarek, Zbigniew Kłedyński

Censored Random Variable as a Form of Coping with Missing Data in Studying the Leachability of Heavy Metals from Hardening Slurries 233

Marcin Górski, Aleksander Kozłowski

Behaviour of Hot-Rolled Purlins Connected with Sandwich Panels 249

Edyta Bernatowska, Lucjan Ślęczka

Numerical Study of Block Tearing Failure in Steel Angles Connected by One Leg 269

Hubert Anysz, Monika Podworna, Nabi Ibadov, Kunibert Lennerts, Kostiantyn Dikarev

Hybrid Predictions of the Homogenous Properties' Market Value with the Use of ANN 285

Mariusz Maslak, Michał Pazdanowski

Time-to-Failure Forecast for Corroded Shell of Above-Ground Steel Tank Used to Store Liquid Fuels 303

Marian Antoni Giżejowski, Radosław Bronisław Szczerba, Zbigniew Stachura, Marcin Daniel Gajewski

Buckling Resistance of Quasi-Straight H-Section Beam-Columns under Unequal End Moments 323

Yun Sun, Yaojie Guo

Analysis of Temperature-Field and Stressfield of Steel Plate Concrete Composite Shear Wall in Early Stage of Construction 351

Hanna Michalak, Paweł Przybysz

Subsoil Movements Forecasting Using 3D Numerical Modeling 367

Xuan Loi Nguyen, Li Wu, Khanh Tung Nguyen, Quang Anh Bui, Huy Hoang Nguyen, Hoang Phuong Luu

Research on Launching Technology of Shield Tunnel in Ho Chi Minh Metro Line 1 387

Marek Chalecki, Grzegorz Jemielita

Stability and Vibrations of Micrononhomogeneous Plate Band Resting on Elastic Subsoil 403

Damian Szczech, Renata Kotynia

Effect of Shear Reinforcement Ratio on the Shear Capacity of GFRP Reinforced Concrete Beams 425

Alessandro Severino, Giuseppina Pappalardo, Salvatore Trubia

Safety Evaluation of Turbo Roundabout Considering Autonomous Vehicles Operation 439

Alessandro Calvi, Stanisław Gaca, Tomasz Kamiński, Mariusz Kieć, Mikołaj Kruszewski

Guidelines for the Use of Non-Standard Road Signs — Polish Experiences 461

Ryszard Chmielewski, Leopold Kruska, Ryszard Rekucki, Kamil Sobczyk

Experimental Investigation of Dynamic Behavior of Silty Sand 481

Ivana Barišić, Matija Zvonarić, Ivanka Netinger Grubeša, Sanja Šurdonja

Recycling Waste Rubber Tyres in Road Construction 499

Lam Ngoc Nguyen

Structuration Investigation of Fast-Setting Self Leveling Underlayment Based on Ettringite Binder 513

Sami Mohammed Ayyad, Omar Asad Ahmad

The Use of Sand Columns in the Reinforcement of Weak Layers in Road Engineering 527

Przemysław Krystosik

On the Columns Buckling Length of Unbraced Steel Frames with Semi-Rigid Joints 539

Marta Puculek, Adam Liphardt, Piotr Radziszewski

Evaluation of the Possibility of Reduction of Highly Modified Binders Technological Temperatures 557

Omar Asad Ahmad, Sami Mohammed Ayyad

Secondary Treated Wastewater as a Concrete Component and its Impact on the Basic Strength Properties of the Material 571

Wojciech Drozd, Marcin Kowalik

Technical and Cost Comparison of Selected Technologies for Energetic Conversions of Renewable Energy Sources 585

X.J. Zhang, H.M. An

Analysis of Positive Elevation Effect and Prediction of Vibration Velocity of Bench Blasting Vibration 599

Salvatore Cafiso, Alessandro Calvi, Carmelo D'Agostino, Mariusz Kieć, Gianmarco Petrucci, Piotr Szagała

Application and Comparison of Different Methods for Traffic Conflict Analysis — Case Study on 2+1 Roads 619

Marian Antoni Giżejowski, Anna Maria Barszcz, Zbigniew Stachura

Elastic Flexural-Torsional Buckling of Steel I-Section Members Unrestrained Between End Supports 635

Salam Salman Chiad Alharishawi, Nagham Rajaa, Lina Abdulsalam Shihab

Shear Stresses of Hollow Lightweight Concrete Beams Made with Wood Waste 657

Dawid Kisala, Kazimierz Furtak

Deflections of Steel Plate-Concrete Composite Beams in the Light of Experimental Studies 673

Jerzy Paślawski, Tomasz Rudnicki

Agile/Flexible and Lean Management in Ready-Mix Concrete Delivery 689

Piotr Nowotarski, Jerzy Paślawski, Patrick Dallasega

Multi-Criteria Assessment of Lean Management Tools Selection in Construction 711

CONTENTS – SPIS TREŚCI

Marian Giżejowski, John Papangelis In memory of the late Professor Nicholas Snowden Trahair	5
Artur Piekarczyk, Przemysław Więch, Krzysztof Kuczyński, Ryszard Walentyński Experimental and computational approaches to the evaluation of double corrugated arch structures. A review of the latest advancements	7
Mohamed Alwaeli Use of granulated lead-zinc slag as replacement of fine aggregate in structural concrete; compressive strength and radiation shielding study	37
Magdalena Kozieln-Woźniak, Marta Fafara, Łukasz Łukaszewski, Eliza Owczarek, Marcin Gierbienieś Life cycle assessment of composite straw bale technology in residential buildings in the context of environmental, economical and energy perspectives — case study	49
Anna Adamczak-Bugno, Aleksandra Krampikowska Impact of operating conditions on the strength and frequency of destruction of fibre-cement composites	67
Andrzej Ambroziak Load capacity of steel-aluminium brackets under static and cyclic laboratory tests	85
Krzysztof Wilde, Dawid Bruski, Stanisław Burzyński, Jacek Chrościelewski, Łukasz Pachocki, Wojciech Witkowski On analysis of double-impact test of 1500-kg vehicle into w-beam guardrail system	101
Eligiusz Mieloszyk, Anita Milewska, Sławomir Grulkowski Safety at railway level crossings and Vision Zero	117
Szczepan Woliński Multi-faced assessment of structural safety	133
Michał Grodecki Numerical modelling of gabion retaining wall under loading and unloading	155
Tomasz A. Lutomirski, Marta Lutomirska Variability of statistical parameters of resistance for reinforced concrete columns with circular cross-section	165
Grzegorz Kacprzak, Paweł Pietrzykowski, Želimir Veinović Liquid consistency of organic soils under the bridge construction	181
Roman Trach, Mieczysław Połoński, Petro Hrytsiuk Decision making in choosing a network organizational structure in integrated construction projects	195
Sebastian Biel Concept of using the BIM technology to support the defect management process	209
Cheng Heping, Yao Wenchu Application of comprehensive reinforcement technology in high-rise building	231
Grzegorz Mazurek Effect of filler type on non-linear viscoelastic characteristics of asphalt mastic	247
Marek Pawlik, Magdalena Kycko, Konrad Zakrzewski Hyperloop vehicles spacing control challenges and possible solutions	261
Joanna Zięba, Lidia Buda-Ożóg, Izabela Skrzypczak Multi-stage analysis of reliability of an example masonry construction	275
Elżbieta Pilecka, Jakub Zięba, Dariusz Szwarkowski Analysis of the behaviour of the high and steep slope of a road made through waste under the influence of rainfall	293

Bartłomiej Szewczyk, Grzegorz Śladowski, Kamil Ratoń Impact of decision model structure on the selection of a telecommunications tower footing reinforcement alternative	309
Kostiantyn Protchenko, Fares Zayoud, Marek Urbański Shear strength testing of basalt-, hybrid-, and nano-hybrid fibre-reinforced polymer bars	323
Piotr Koziol, Rafał Pilecki Nonlinear double-beam system dynamics	337
Sławomir Czarnecki, Tomasz Lewiński Vibrations of bars including transverse shear deformations and warping due to torsion	355
Marcin Koniorczyk, Dalia Bednarska, Alicja Wieczorek, Piotr Konca Freezing of fully and partly saturated cement paste	383
Roman Trach, Marzena Lendo-Siwicka, Katarzyna Pawluk, Mieczysław Połoński Analysis of direct rework costs in Ukrainian construction	397
Krzysztof Zima Integrated analysis of costs and amount of greenhouse gases emissions during the building lifecycle	413
Jacek Gołaszewski, Małgorzata Gołaszewska Properties of mortars with Calcium Sulfoaluminate cements with the addition of Portland cement and limestone	425
Marcin Gajzler Supporting the technical management of residential buildings in the process of their exploitation	437
Ewelina Kania, Grzegorz Śladowski, Elżbieta Radziszewska-Zielina, Bartłomiej Sroka, Bartłomiej Szewczyk Planning and monitoring communication between construction project participants	455
Paweł Falaciński, Zbigniew Kledyński Impact of acid aggressiveness on the filtration resistance of hardening slurries with an addition of fluidized-bed fly-ash	475
Muhammad Nadeem, Muhammad Akbar, Li Xiaoqing, Pan Huali, Ou Guoqiang, Azka Amin Investigation of the settlement prediction in soft soil by Richards Model: based on a linear least squares-iteration method	491
Xianghui Deng, Yiyuan Liu, Rui Wang Investigating freeze-proof durability of air-entrained C30 recycled coarse aggregate concrete	507
Ahmed Hazim Abdulkareem, Saadoon Eyada, Nabeel Mahmood Improvement of a subgrade soil by using EarthZyme and cement kiln dust waste	525
Yanfeng Li, Jihe Zhao, Ying Xiong, Qinghe Wang Experimental and theoretical research on large-diameter rock-socketed pile embedded depth	537
Janusz Sobieraj, Dominik Metelski, Paweł Nowak PMBok vs. PRINCE2 in the context of Polish construction projects: Structural Equation Modelling approach	551
Kexin Zhang, Tianyu Qi, Xingwei Xue, Yanfeng Li, Zhimin Zhu Research on reinforcement technology of existing double-way curved arch bridge	581
Kexin Zhang, Tianyu Qi, Xingwei Xue, Yanfeng Li, Zhimin Zhu Study on sling replacement of concrete filled steel tube arch bridge	597
Emilian Szczepański, Marianna Jacyna, Roland Jachimowski, Rostislav Vašek, Karol Nehring Decision support for the intermodal terminal layout designing	611
Yanfeng Li, Ying He, Longsheng Bao, Baoyun Sun, Qinghe Wang Numerical and theoretical research on spatial shear lag effect of self-anchored suspension bridge steel box girder	631
Jianjun Shi, Huaming An, Xin We Application of projection pursuit regression model for blasting vibration velocity peak prediction	653
Rafał Kuszyk, Anna Siemińska-Lewandowska Subsidence trough asymmetry calculations in twin tube TBM tunnelling	675

Tomasz Siwowski, Henryk Zobel, Thakaa Al-Khafaji, Wojciech Karwowski FRP bridges in Poland: state of practice	5
Szymon Firlag, Artur Miszczuk, Bartosz Witkowski Analysis of climate change and its potential influence on energy performance of building and indoor temperatures, part 1: Climate change scenarios	29
Xiong Liangxiao, Chen Haijun, Xu Zhongyuan, Yang Changheng Numerical simulations of horizontal bearing performances of step-tapered piles	43
Grzegorz Kacprzak, Tomasz Daktera, Andrzej Stańczyk, Urszula Tomczak, Seweryn Bodus, Michał Werle An application of reinforced concrete vaulted slabs and rafts in deep excavation works	61
Michał Bakalarz, Paweł Kossakowski, Wiktor Wciślik Influence of soil backfill parameters on culvert load capacity with accordance to Eurocodes and Sundquist-Pettersson calculating method	77
Aleksandra Radziejowska, Anna Sobotka Assessment of large-panel prefabricated buildings in the social aspect of sustainable construction	93
Piotr Zieliński Effect of reclaimed asphalt shingles addition on asphalt concrete dynamic modulus master curves	109
Agnieszka Leśniak, Monika Górka Pre-design cost modeling of facade systems using the GAM method	123
Michał Bakalarz Load bearing capacity of laminated veneer lumber beams strengthened with CFRP strips	139
Damian Mrówczyński, Tomasz Gajewski, Tomasz Garbowski Application of the generalized nonlinear constitutive law in 2D shear flexible beam structures	157
Andrzej Flaga, Renata Klaput, Łukasz Flaga, Piotr Krajewski Wind tunnel model tests of wind action on the chimney with grid-type curtain structure	177
Hubert Anysz, Paweł Włodarek, Piotr Olszewski, Salvatore Cafiso Identifying factors and conditions contributing to cyclists' serious accidents with the use of association analysis	197
Aleksander Duda, Tomasz Siwowski Waste tyre bales in road engineering: an overview of applications	213
Wiesław Krzymień Notes on the tests and vibration properties of hospital elevated helipad structures	231
Leszek Szojda, Łukasz Kapusta Numerical analysis of the influence of mining ground deformation on the structure of a masonry residential building	243
Grzegorz Straż, Artur Borowiec Evaluation of the unit weight of organic soils from a CPTM using an Artificial Neural Networks	259
Mateusz Dudek, Janusz Rusek, Krzysztof Tajduś, Leszek Slowik Analysis of steel industrial portal frame building subjected to loads resulting from land surface uplift following the closure of underground mines	283
Roman Jaskulski, Piotr Dolny, Yaroslav Yakymchko Thermal and mechanical properties of lightweight concrete with waste copper slag as fine aggregate	299
Cezary Kraśkiewicz, Artur Zbiciak, Anna Al Sabouni-Zawadzka Laboratory tests of resistance to severe environmental conditions of prototypical under sleeper pads applied in the ballasted track structures	319
Anna Monika Skłodowska, Monika Mitew-Czajewska The influence of electronic detonators on the quality of the tunnel excavation	333

Marcin Chybiński, Łukasz Polus Experimental and numerical investigations of laminated veneer lumber panels	351
Anna Starczyk-Kolbyk, Leopold Kruska Use of the EVM method for analysis of extending the construction project duration as a result of realization disturbances – case study	373
Julia Wróblewska, Robert Kowalski, Michał Głowacki, Bogumiła Juchnowicz Bierbasz Application of ultrasonic pulse velocity test to concrete assessment in structures after fire	395
Jinliang Zhang, Qiuxiang Huang, Chao Hu, Zhiqiang Wang Experimental investigation into material characteristics of pea gravel	415
Ireneusz Baic, Wiesław Koziol, Artur Miros Dependence of extraction and production of construction aggregates on selected indicators of economic development in Poland	437
Zbigniew Łukasik, Aldona Kuśmińska-Fijałkowska, Jacek Kozyra, Sylwia Olszańska An analysis of acoustic climate of an area situated near the expressway, which is a part of international route North-South running through central Europe	455
Sławomir Bajkowski, Marta Kiraga, Janusz Urbański Engineering forecasting of the local scour around the circular bridge pier on the basis of experiments	469
Iwona Szer, Jacek Szer, Monika Kaszubska, Jakub Miszczuk, Bożena Hoła, Ewa Błazik-Borowa, Marek Jabłoński Influence of the seasons on construction site accidents	489
Maciej Kruszyna Investment challenges pertaining to the achievement of the goals of the Mobility Policy based on the analysis of the results of traffic surveys in Wrocław	505
Tomasz Wiczenbach, Tomasz Ferenc Tensile validation tests with failure criteria comparison for various GFRP laminates	525
Aleksandra Radziejowska The assessment of the social performance of residential buildings	543
Yanfeng Li, Tianyu Guo, Longsheng Bao, Fuchun Wang Determination of force in single cable plane prestressed concrete polygonal line tower cable-stayed bridge based on minimum bending energy	565
Zhao Fang, Ping Yan Influence of vertical ground motion on seismic responses of triple friction pendulum interlayer isolation structures	581
Huaming An, Yushan Song, Deqiang Yang Experimental study of the effect of rock blasting with various cutting forms for tunnel excavation using physical model tests	599
Sahar Ali Ismail, Wassim Raphael, Emmanuel Durand, Fouad Kaddah, Fadi Geara Analysis of the structural response of Beirut port concrete silos under blast loading	619
Maciej Klosak, Michał Grazka, Leopold Kruska, Wojciech Mocko Perforation analysis of S235 steel sheets up to 573 K using experimental and numerical methods	639
Akram A. Rmdan Amer, Mohd Mustafa Al Bakri Abdullah, Liew Yun Ming, Ikmal Hakem A. Aziz, Muhammad Faheem Mohd Tahir, Shayfull Zamree Abd Rahim, Hetham A.R. Amer Experimental investigation of chopped steel wool fiber at various ratio reinforced cementitious composite panels	661
Radosław Bąk, Janusz Chodur, Nikiforos Stamatiadis Type II dilemma zone at high-speed signalized intersections in Poland	673
Andrzej Więckowski Correct concrete load-bearing capacity and time limitations for the automatic implementation of monolithic reinforced ceilings	687
Seyedkazem Seyedbrahimi, Alireza Mirjalili, Abolfazl Sadeghian Identification and prioritization of factors influencing the increase in construction costs of building investments using factor analysis	705

CONTENTS – SPIS TREŚCI

Krzysztof Żółtowski Cable-stayed bridges. Basic static schemes	5
Salam Salman Chiad Alharishawi, Nagham Rajaa, Aqeel Raheem Jabur Experimental investigation of using recycled glass waste as fine aggregate replacement in concrete	27
Kazimierz Jamroz, Sławomir Grulkowski, Krystian Birr, Łukasz Jeliński, Marcin Budzyński Risk assessment for tram traffic on tramway bridges	39
Wacław Celadyn An investigation of the potential of dematerialization to reduce the life cycle embodied energy of buildings	59
Hai Cao Dynamic splitting tensile performance of new and old concrete after high temperature treatment	79
Giovanni Leonardi, Rocco Palamara, Federica Suraci 3D Finite element model of a blast load in a tunnel	91
Michał Gołębiewski, Barbara Pietruszka Risk of interstitial condensation in outer walls made of hemp-lime composite in Polish climatic conditions	107
Katarzyna Sieńkowska, Lidia Buda-Ożóg Influence of random character of reinforcement cover in bending elements	123
Izabela Wójcik-Grząba Extended Force Density Method for cable nets under self-weight. Part I — Theory and verification	139
Grzegorz Prokopski, Andriy Huts, Vitaliy Marchuk The use of granite dust as an effective filler of concrete mixtures	159
Bartosz Kawecki Guidelines for FEM modelling of wood-CFRP beams using ABAQUS	175
Marian Gwóźdź Fire reliability of system aluminium-glass partitions	193
Konrad Walotek, Joanna Bzówka, Adrian Ciołczyk Influence of addition of shredded rubber waste on deformability of binder-bound anthropogenic material mixtures	207
Paulina Szrywer, Joanna Wachnicka, Wojciech Kustra, Orazio Pellegrino Study on the prevalence of mobile phone use by car drivers — the case of Poland	225
Mariusz Szóstak Planning the time and cost of implementing construction projects using an example of residential buildings	243
Yao Lu, Dejian Li, Che Yao, Zhen Li Fine optimization of rigid frame bridge parameters based on the genetic algorithm	261
Andrzej Ambroziak, Sławomir Dobrowolski Case study of water vapour transmission properties of EPDM façade membranes	273
Piotr Jaśkowski, Sławomir Biruk, Michał Krzemiński Proactive scheduling of repetitive construction processes to reduce crews idle times and delays	287
M. Yasir Khan, Abdul Baqi, Rehan Sadique Thermal and acoustic behavior of energy saving wall panel	303
Tadeusz Urban, Michał Goldyn, Łukasz Krawczyk Strengthening of RC slabs against punching shear in theory and practice	317

Agnieszka Pękala, Filip Puch Influence of environmental factors on physical and mechanical characteristics of the opoka-rocks	337
Witold Bogusz, Tomasz Godlewski, Anna Siemińska-Lewandowska Parameters used for prediction of settlement trough due to TBM tunnelling	351
Meng Liu, Quansheng Sun, Haitao Yu, Jianxi Yang, Tongzhou Zhang Static and dynamic test analysis of a 12-years old 14,000-ton cable-stayed bridge used swivel construction technology	369
Maja Kepniak, Piotr Woyciechowski Influence of sand substitution with waste lime powder on the concrete carbonation	383
Ghadah Ghassan Masood, Hadeel Ammar Mohammed, Hanan Adnan Hassan Afaj, Mohammed Yousif Fattah Behavior of flexible pavement on swelling subgrade soil reinforced with geogrid	393
Marcin Niedośpiał Assessment of stresses in reinforcement in the area of joints in composite steel-concrete slabs	403
Romanika Okraszewska, Karolina Kijewska, Joanna Wachnicka, Miroslava Mikusova Evaluating the convenience and safety effects of bicycle lanes in Gdańsk	415
Arkadiusz Węglarz, Paweł Gilewski Risk analysis in the environmental impact assessment of building construction innovations	433
Anh Thu Thi Phan, Ngoc Thi Huynh Generating 3D point-cloud based on combining adjacent multi-station scanning data in 2D laser scanning: A case study of Hokuyo UTM 30Lx	451
Grzegorz Dzierżanowski, Krzysztof Hetmański Optimal design of archgrids: the second-order cone programming perspective	469
Agung Prihantoro, Albert Eddy Husin Value increase of jetty project based on system dynamics	487
Ali Imron, Albert Eddy Husin Value engineering and lifecycle cost analysis to improve cost performance in green hospital project	497
Jerzy Pasławski, Tomasz Rudnicki Flexible design of Park-and-Ride facility in the city center proximity	511
Czesław Miedzialowski, Leonas Ustinovichius Modelling of the spatial structure of longwall buildings with large-scale quasi finite elements and applying the method in the interaction issues with subsoil — with regard to their implementation in stages	527
Cezary Kraśkiewicz, Przemysław Mossakowski, Artur Zbiciak, Anna Al Sabouni-Zawadzka Experimental identification of dynamic characteristics of a track structure influencing the level of noise emission	543
Grzegorz Bartnik, Rafał Kuszyk, Małgorzata Superczyńska Strengthening of the soft soil loaded with heavy construction traffic based on dilatometer tests	559
Mariola Książek-Nowak, Marek Ozimek The use of multi-criteria assessment to select a general contractor for a development investment	573
Yonggang Wang, Xianyu Luo Analyzing rear-end crash severity for a mountainous expressway in China via a classification and regression tree with random forest approach	591
Krzysztof Błażejowski, Magdalena Złotowska, Roman Nagórski, Paweł Tutka The influence of highly modified asphalt binder on pavement fatigue life prediction — selected problems	605
Anna Maria Rakoczy Fatigue safety verification of riveted steel railway bridges using probabilistic method and standard S-N curves	625
Krzysztof Nazar, Jan Słyk Algorithmically aided management of structure modularity at the design and execution stage	643
