D. LEHSER-PFEFFERMANN, A. HAMMAN, AND F.U. RÜCKERT: Location-optimized aerodynamic rotor design studies and development of small wind turbines.....	3
J. POLANSKY AND S. SCHMELTER: Implementation of turbulence damping in the OpenFOAM multiphase flow solver interFoam	21
R. BONDYRA, J. PRZYTULSKI, AND K. DOMINICZAK: Development of last stage blade of 13K215 turbine intermediate pressure module	45
A. RUSANOV, V. SUBOTIN, V. SHVETSOV, R. RUSANOV, S. PALKOV, I. PALKOV, AND M. CHUGAY: Application of innovative solutions to improve the efficiency of the LPC flow part of the 220 MW NPP steam turbine.....	63
S.M. LORYŚ AND M. ORKISZ: Neural network approach to compressor modelling with surge margin consideration	89
R.C. NAYAK, M.K. ROUL, AND P.D. ROUL: Design and development of smokeless stove for a sustainable growth	109
K. RUP: Calculation of the heat power of a tube heat exchanger	127
E. DOBKIEWICZ-WIECZOREK: Cooling water flow influence on power plant unit performance for various condenser configurations setup	141
W. ZIMA AND G. OJCZYK: Combustion of wood pellets in a low-power multi-fuel automatically stoked heating boiler	169
S.N. AHMAD AND O. PRAKASH: Thermal performance evaluation of an earth-to-air heat exchanger for the heating mode applications using an experimental test rig	185

Contents

W. KRYŁOWICZ, J. KARCZEWSKI, AND P. SZUMAN: Simulation of control of lowpower-output steam turbines	3
M.L. CANTEROS AND J. POLANSKY: Study of the heat pump for a passenger electric vehicle based on refrigerant R744	17
I.K. ILIEV, T. KOWALCZYK; H.K. BELOEV, A.K. TERZIEV, K.J. JESIONEK, AND J. BADUR: An innovative method for waste heat recovery from flue gas treatment system through an additional economizer	37
P. SZYMAŃSKI AND D. MIKIELEWICZ: Challenges in operating and testing loop heat pipes in 500–700 K temperature ranges	61
T. OCHRYMIUK, M. BANASZKIEWICZ, M. LEMAŃSKI, T. KOWALCZYK, P. ZIÓLKOWSKI, P.J. ZIÓLKOWSKI, R. HYRZYŃSKI, M. STAJNKE, M. BRYK, B. KRASZEWSKI, S. KRUK-GOTZMAN, M. FROISSART, AND J. BADUR: Fluid solid interactions – a novelty in industrial applications	75
K. DAGHSEN, D. LOUNISSI, AND N. BOUAZIZ: A universal model for solar radiation exergy accounting: Case study of Tunisia	97
C. DI NUCCI, D. CELLI, P. FISCHIONE, AND D. PASQUALI: Classical irreversible thermodynamics versus extended irreversible thermodynamics. The role of the continuity equation	119
H. KHARKWAL AND S. SINGH: Effect of serrated circular rings on heat transfer augmentation of circular tube heat exchanger	129

Contents

P. TRAWIŃSKI: Turbine stage expansion model including internal air film cooling and novel method of calculating theoretical power of a cooled stage	3
R. WYCZÓLKOWSKI, D. STRYCHALSKA, AND V. BAGDASARYAN: Correlations for the thermal conductivity of selected steel grades as a function of temperature in the range of 0–800°C	29
B. STANEK, Ł. BARTELA, D. WĘCEL, AND S. RULIK: An experimental study on parabolic trough collector in simulated conditions by metal-halide solar radiation simulator	47
E.H. MALEKSHAH, W. WRÓBLEWSKI, K. BOCHON, M. MAJKUT, AND K. RUSIN: Experimental analysis on unsteady characteristics of sheet/cloud cavitating Venturi flow under the effect of dissolved air	63
R. LASKOWSKI, A. SMYK, R. JURKOWSKI, J. ANCE, M. WOŁOWICZ, AND N. UZUNOW: Selected aspects of the choice of live steam pressure in PWR nuclear power plant	85
M. WITEK AND F. UILHOORN: Impact of hydrogen blended natural gas on linepack energy for existing high pressure pipelines	111
R.K. THAPA, V.S. BISHT, P. BHANDARI, AND K.S. RAWAT: Numerical study of car radiator using dimple roughness and nanofluid	125
J. SZYMBORSKI AND D. KARDAŚ: Novel model for emptying of a self-pressurised nitrous oxide tank	141

Contents

I.K. ILIEV, H.I. BELOEV, D.I. ILIEVA, AND J. BADUR: A novel method for calculating greenhouse gas emissions from the combustion of energy fuels	3
P. DEKA AND A. SZŁĘK: Thermal energy storage in buildings: Opportunities and challenges	21
D. KARDAŚ, I. WARDACH-ŚWIĘCICKA, AND A. GRAJEWSKI: Partially transient one-dimensional thermal-flow model of a heat exchanger, upwind numerical solution method and experimental verification	63
I.A. ABDULGHAFOR AND M.J. MNATI: Design of thermoelectric radiant cooling – photovoltaic panels system in the building	85
O. BENBRIKA, A. BENSENOUCI, M. TEGAR, AND K.R.A. ISMAIL: Thermodynamic assessment of thermochemical cycle for hydrogen production based on water decomposition with binary copper chlorine couple	109
J. KARWACKI, R. KWIDZINSKI, AND P. LEPUTA: Performance analysis and PCM selection for adsorption chiller aided by energy storage supplied from the district heating system	135
