

Contents

Preface	I
Contents	III
Electrospun nanofibrous filtration membranes for water purification application: Elif Gamze Aygün, Nagihan Okutan, Filiz Altay	1
Synthesis and properties of magnetic nanoparticles stabilized with nanogold shells: Katarzyna Bialik-Wąs, Bożena Tylińczak, Dorota Walczyk, Mieczysław Zaczek, Agnieszka Sobczak-Kupiec	11
Characterization of acrylic hydrogels containing chitosan and gold nanoparticles: Katarzyna Bialik-Wąs, Bożena Tylińczak, Magdalena Kulig, Anna Drabczyk, Dagmara Malina, Agnieszka Sobczak-Kupiec	17
Liquid crystallinity in polymers – liquid crystalline polyurethane elastomers: Artur Bukowczan, Edyta Hebda, Krzysztof Pielichowski	23
UV ageing of polyurethane foams modified by polyhedral oligomeric silsesquioxanes (POSS): Artur Bukowczan, Edyta Hebda, Joanna Pagacz, Jan Ozimek, Krzysztof Pielichowski	29
Effects of nanofillers on plant protein based bionanocomposites for food packaging applications: Turgay Çetinkaya, Filiz Altay	35
Melamine Diborate – a New, Ecological Source of Oligoetherols and Polyurethane Foams of Enhanced Thermal Stability and Low Flammability: Ewelina Chmiel, Jacek Lubczak.....	47
Metasilicic Acid – a New Source of Oligoetherols and Polyurethane Foams: Ewelina Chmiel, Jacek Lubczak.....	57
Synthesis of the urethane-styrene copolymers through SARA ATRP: Paweł Chmielarz, Piotr Król.....	65
Elastomeric materials reinforced with cellulosic fibres: K. Diakowska, A. Masek, M. Zaborski.....	73
Studies on chitosan/beetosan - based hydrogels modified with <i>Salvia officinalis</i> and bee pollen: Anna Drabczyk, Sonia Kudłacik, Katarzyna Bialik-Wąs, Bożena Tylińczak	81

Synthesis and physicochemical properties of acrylic hydrogels modified with starch: Anna Drabczyk, Bożena Tylińczak, Krzysztof Pielichowski	89
Unconventional cross-linking method of polychloroprene rubber: Anna Dziemidkiewicz, Martyna Pingot, Krzysztof Strzelec, Marian Zaborski	95
The influence of the initial pH on the sol-gel synthesis of resorcinol-formaldehyde gels: Katarzyna Z. Gaca, Ewa Szefer	101
Effect of composition and preparation conditions on mechanical properties of thermoplastic starch: F. Ivanič, I. Chodák	111
Polyurethane elastomers containing polyhedral silsesquioxanes. Thermal, mechanical and biological characterization: Małgorzata Jancia, Edyta Hebda, Krzysztof Pielichowski	117
Monitoring of photocopolymerization of trimethylolpropane triacrylate with glycidyl methacrylate using by fluorescence spectroscopy technique: Iwona Kamińska-Borek, Joanna Ortyl, Roman Popielarz	125
Molecular dynamics and thermal transitions in PDMS/CNTs nanocomposites: Panayiotis Ketikis, Stefanos Koutsoumpis, Liliane Bokobza, Dimosthenis Georgopoulos, Georgios Georgousis, Evangelia Kontou, Apostolos Kyritsis, Polycarpos Pissis	133
The study of properties of polyamide 610/microfibrillated cellulose nanocomposites: Paulina Konieczna, Agnieszka Leszczyńska, Krzysztof Pielichowski	143
Impact of POSS particles on morphology, thermal properties and molecular dynamics of polyurethane elastomers based on HDI: Stefanos Koutsoumpis, Konstantinos N. Raftopoulos, Jan Ozimek, Polycarpos Pissis, Edyta Hebda, Christine M. Papadakis, Krzysztof Pielichowski	151
Geometry of nanospun fibers: Kozłowski Marek	161
The effect of different additives on selected properties of polypropylene fibers: Vladimíra Krmelová, Maxim Puchnin, Iveta Papučová, Katarína Móricaová	169
Polyurethane cationomers modified by polysiloxane: Bożena Król, Kinga Pielichowska, Piotr Król, Paweł Chmielarz	175
Acrylic bone cements modified with PEG/chitosan systems: Klaudia Król, Paulina Chylińska, Kinga Pielichowska	183

Attainment and physicochemical analysis of chitosan/beetosan based hydrogel matrices incorporated with caffeine: Sonia Kudłacik, Anna Drabczyk, Katarzyna Bialik-Wąs, Bożena Tylińczak.....	191
Synthesis and characterization of hydrogels with chitosan containing caffeine: Sonia Kudłacik, Anna Drabczyk, Katarzyna Bialik-Wąs, Bożena Tylińczak	199
The influence of bio-components on the flammability of porous polyurethane materials Maria Kurańska, Aleksander Prociak, Ugis Cabulis, Mikelis Kirpluks ..	207
The influence of water absorption on PA 10.10/flax composites: Paulina Kuźniar, Stanisław Kuciel, Anna Kufel	213
Modification of Oligoetherols with Carbazole and Adenine Rings for Obtaining of Polyurethane Foams with Reduced Flammability: Renata Lubczak, Dominik Szczęch	219
Flexible polyurethane foams synthesized with different bio-polyols: Elżbieta Malewska, Paulina Budny, Aleksander Prociak.....	231
Chitosan based composites reinforced with silver modified hydroxyapatite: Dagmara Malina, Klaudia Pluta, Agnieszka Sobczak-Kupiec	239
Solar irradiation effects on the properties of ethylene-norbornene composites containing solvent dyes and stabilizers: Anna Marzec, Marian Zaborski, Zygmunt Boruszcak	245
Elastomeric nanocomposites for sensors and actuators application: Mária Omastová	255
The influence of POSS nanoparticles on poly(tetramethylene ether) glycol crystallization: Jan Ozimek, Edyta Hebda, Krzysztof Pielichowski	263
Processing and characterisation of modern polyurethane powder clear coatings: Barbara Pilch-Pitera.....	275
Characteristics and properties of polymer-ceramic based dispersions: Klaudia Pluta, Dagmara Malina, Agnieszka Sobczak-Kupiec, Bożena Tylińczak, Katarzyna Bialik-Wąs	283
Possibilities of PLA as food packaging material- nano-reinforcement and electrospinning as future perspective: Tanja Radusin, Aleksandra Miletić, Ivan Ristić, Branka Pilić	289
Architecture effects on the morphology and segmental dynamics in Polyurethane – POSS organic inorganic hybrids: Konstantinos N. Raftopoulos, Stefanos	

Koutsoumpis, Edyta Hebda, Christine M. Papadakis, Krzysztof Pielichowski, Polycarpus Pissis	297
Epoxy-polyurethane materials - novel products as an answer for growing awareness for environmental issues and consumers expectations: Anna Sienkiewicz, Piotr Czub.....	307
Attainment and properties of composites based on polymeric matrices reinforced with bioactive calcium phosphates: Agnieszka Sobczak-Kupiec, Klaudia Pluta, Katarzyna Bialik-Wąs, Dagmara Malina, Bożena Tyliśszczak	317
Structure-property relationships in thermoplastic polyurethane nanocomposites containing POSS molecules: Krzysztof Stafin, Agnieszka Leszczyńska, Krzysztof Pielichowski	325
Carbon nanofibers as reinforcing filler in elastomer technology: Bolesław Szadkowski, Martyna Pingot, Marian Zaborski	335
Starch as a Substrate for Synthesis of Oligoetherols and Rigid Polyurethane Foams: Dominik Szczęch, Renata Lubczak	341
Evaluation of cytotoxicity and physicochemical properties of chitosan based hydrogels modified with gold nanoparticles: Bożena Tyliśszczak, Katarzyna Bialik-Wąs, Dorota Walczyk, Dagmara Malina, Agnieszka Sobczak-Kupiec	349
Synthesis and characterization of self-healing polymer matrices based on A6ACA monomers: Bożena Tyliśszczak, Katarzyna Bialik-Wąs, Jolanta Jaśkowska, Anna Drabczyk, Sonia Kudłacik, Agnieszka Sobczak-Kupiec	355
Structure-properties relationships in vegetable oil based polyurethane coating materials: Joanna Wojturska	361
Dose rate effects of gamma irradiation in ethylene-propylene terpolymer: T. Zaharescu, E.M. Lungulescu, A. M. Luchian	369
Radiation processing - a versatile procedure for the modification of polymers: Traian Zaharescu	377
Magnetic liquids for polymeric pipe tightness: T. Zaharescu, L. Vékás, I. Borbath, A. M. Luchian	399
Author index	405
Subject index	407
