

Table of Contents

Preface	xiii
1 Fundamentals	1
1.1 What Is Topology?	1
1.2 First Definitions	2
1.3 Mappings	9
1.4 The Separation Axioms	12
1.5 Compactness	18
1.6 Homeomorphisms	24
1.7 Connectedness	28
1.8 Path-Connectedness	32
1.9 Continua	34
1.10 Totally Disconnected Spaces	36
1.11 The Cantor Set	38
1.12 Metric Spaces	41
1.13 Metrizable Spaces	46
1.14 Baire's Theorem	48
1.15 Lebesgue's Lemma and Lebesgue Numbers	52
EXERCISES	53
2 Advanced Properties of Topological Spaces	57
2.1 Basis and Sub-Basis	57
2.2 Product Spaces	59
2.3 Relative Topology	62
2.4 First Countable, Second Countable, and So Forth	62

2.5	Compactifications	65
2.6	Quotient Topologies	68
2.7	Uniformities	70
2.8	Morse Theory	73
2.9	Proper Mappings	79
2.10	Paracompactness	80
2.11	An Application to Digital Imaging	83
	EXERCISES	90
3	Basic Algebraic Topology	95
3.1	Homotopy Theory	95
3.2	Homology Theory	108
3.2.1	Fundamentals	109
3.2.2	Singular Homology	110
3.2.3	Relation to Homotopy	120
3.3	Covering Spaces	127
3.4	The Concept of Index	138
3.5	Mathematical Economics	142
	EXERCISES	151
4	Manifold Theory	157
4.1	Basic Concepts	157
4.2	The Definition	159
	EXERCISES	166
5	Moore-Smith Convergence and Nets	173
5.1	Introductory Remarks	173
5.2	Nets	173
	EXERCISES	176
6	Function Spaces	179
6.1	Preliminary Ideas	179
6.2	The Topology of Pointwise Convergence	180
6.3	The Compact-Open Topology	181

6.4	Uniform Convergence	182
6.5	Equicontinuity and the Ascoli-Arzelà Theorem	185
6.6	The Weierstrass Approximation Theorem	188

EXERCISES	193
---------------------	-----

7 Knot Theory 197

7.1	What Is a Knot?	197
7.2	The Alexander Polynomial	200
7.3	The Jones Polynomial	206
7.3.1	Knot Projections	206
7.3.2	Reidemeister Moves	210
7.3.3	Bracket Polynomials	214
7.3.4	Creation of a New Polynomial Invariant	216

EXERCISES	220
---------------------	-----

8 Graph Theory 225

8.1	Introduction	225
8.2	Fundamental Ideas of Graph Theory	227
8.3	Application to the Königsberg Bridge Problem	231
8.4	Coloring Problems	235
8.4.1	Modern Developments	240
8.4.2	Denouement	242
8.5	The Traveling Salesman Problem	242

EXERCISES	245
---------------------	-----

9 Dynamical Systems 249

9.1	Flows	249
9.1.1	Dynamical Systems	252
9.1.2	Stable and Unstable Fixed Points	255
9.1.3	Linear Dynamics in the Plane	257
9.2	Planar Autonomous Systems	262
9.2.1	Ingredients of the Proof of Poincaré-Bendixson	263

9.3 Lagrange's Equations	273
EXERCISES	278

Appendices 283

Appendix 1: Principles of Logic 285

A1.1 Truth	286
A1.2 "And" and "Or"	287
A1.3 "Not"	290
A1.4 "If - Then"	291
A1.5 Contrapositive, Converse, and "Iff"	294
A1.6 Quantifiers	298
A1.7 Truth and Provability	302

Appendix 2: Principles of Set Theory 307

A2.1 Undefinable Terms	307
A2.2 Elements of Set Theory	308
A2.3 Venn Diagrams	312
A2.4 Further Ideas in Elementary Set Theory	313
A2.5 Indexing and Extended Set Operations	315
A2.6 Countable and Uncountable Sets	318

Appendix 3: The Real Numbers 333

A3.1 The Real Number System	333
A3.1 Construction of the Real Numbers	339

Appendix 4: The Axiom of Choice and Its Implications 343

A4.1 Well Ordering	343
A4.2 The Continuum Hypothesis	344
A4.3 Zorn's Lemma	344
A4.4 The Hausdorff Maximality Principle	345
A4.5 The Banach-Tarski Paradox	345

Appendix 5: Ideas from Algebra	347
A5.1 Groups	347
A5.2 Rings	348
A5.3 Fields	349
A5.4 Modules	349
A5.5 Vector Spaces	350
 Solutions of Selected Exercises	 351
 Bibliography	 389
 Index	 393
