Author Bio	xi
Preface	xiii
Suggested Course Outlines	xvii
Acknowledgements	xix
List of Symbols	xxi
1 TOPOLOGICAL SPACES	1
1.1 Metric Spaces	1
1.2 Topologies	7
1.3 Derived Concepts	12
1.4 Bases	19
1.5 Subspaces	30
2 CONTINUITY AND PRODUCTS	35
2.1 Continuity	35
2.2 Product Topology	45
3 CONNECTEDNESS	63
3.1 Connected Spaces	63
3.2 Components	72
3.3 Path-connected Spaces	77
3.4 Local Connectivity	82
4 CONVERGENCE	93
4.1 Sequences	93

4.2	Nets	96
4.3	Filters	103
4.4	Hausdorff Spaces	106
5	COUNTABILITY AXIOMS	113
5.1	1st and 2nd Countable Spaces	113
5.2	Separable and Lindelöf Spaces	119
6	COMPACTNESS	125
6.1	Compact Spaces	125
6.2	Countably Compact Spaces	136
6.3	Compact Metric Spaces	140
6.4	Locally Compact Spaces	148
6.5	Proper Maps	155
7	TOPOLOGICAL CONSTRUCTIONS	159
7.1	Quotient Spaces	159
7.2	Identification Maps	173
7.3	Cones, Suspensions and Joins	180
7.4	Wedge Sums and Smash Products	188
7.5	Adjunction Spaces	195
7.6	Coinduced and Coherent Topologies	202
8	SEPARATION AXIOMS	211
8.1	Regular Spaces	211
8.2	Normal Spaces	216
8.3	Completely Regular Spaces	229
8.4	Stone–Čech Compactification	235
9	PARACOMPACTNESS AND METRISABILITY	241
9.1	Paracompact Spaces	241
9.2	A Metrisation Theorem	252

10 COMPLETENESS	257
10.1 Complete Spaces	257
10.2 Completion	265
10.3 Baire Spaces	269
11 FUNCTION SPACES	275
11.1 Topology of Pointwise Convergence	275
11.2 Compact-Open Topology	283
11.3 Topology of Compact Convergence	301
12 TOPOLOGICAL GROUPS	313
12.1 Examples and Basic Properties	313
12.2 Subgroups	324
12.3 Isomorphisms	331
12.4 Direct Products	341
13 TRANSFORMATION GROUPS	347
13.1 Group Actions	347
13.2 Orbit Spaces	365
14 THE FUNDAMENTAL GROUP	371
14.1 Homotopic Maps	371
14.2 The Fundamental Group	383
14.3 Fundamental Groups of Spheres	397
14.4 Some Group Theory	408
14.5 The Seifert–van Kampen Theorem	424
15 COVERING SPACES	439
15.1 Covering Maps	439
15.2 The Lifting Problem	448
15.3 The Universal Covering Space	459
15.4 Deck Transformations	468
15.5 The Existence of Covering Spaces	480

A Set Theory	483
A.1 Sets	483
A.2 Functions	485
A.3 Cartesian Products	488
A.4 Equivalence Relations	491
A.5 Finite and Countable Sets	492
A.6 Orderings	500
A.7 Ordinal Numbers	507
A.8 Cardinal Numbers	512
B Fields $\mathbb{R}$, $\mathbb{C}$ and $\mathbb{H}$	519
B.1 The Real Numbers	519
B.2 The Complex Numbers	521
B.3 The Quaternions	523
Bibliography	525
Index	527
