Volume I

<i>Preface</i>	v
<i>List of Contributors</i>	vii

Part 1: Classical Measure Theory

1. History of measure theory	1
<i>D. Paunić</i>	
2. Some elements of the classical measure theory	27
<i>E. Pap</i>	
3. Paradoxes in measure theory	83
<i>M. Laczkovich</i>	
4. Convergence theorems for set functions	125
<i>P. de Lucia and E. Pap</i>	
5. Differentiation	179
<i>B.S. Thomson</i>	
6. Radon–Nikodým theorems	249
<i>D. Candeloro and A. Volčič</i>	
7. One-dimensional diffusions and their convergence in distribution	295
<i>J.K. Brooks</i>	

Part 2: Vector Measures

8. Vector integration in Banach spaces and application to stochastic integration	345
<i>N. Dinculeanu</i>	
9. The Riesz Theorem	401
<i>J. Diestel and J. Swart</i>	
10. Stochastic processes and stochastic integration in Banach spaces	449
<i>J.K. Brooks</i>	

Part 3: Integration Theory

11. Daniell integral and related topics <i>M.D. Carrillo</i>	503
12. Pettis integral <i>K. Musiał</i>	531
13. The Henstock–Kurzweil integral <i>B. Bongiorno</i>	587
14. Set-valued integration and set-valued probability theory: An overview <i>C. Hess</i>	617

Part 4: Topological Aspects of Measure Theory

15. Density topologies <i>W. Wilczyński</i>	675
16. FN-topologies and group-valued measures <i>H. Weber</i>	703
17. On products of topological measure spaces <i>S. Grekas</i>	745
18. Perfect measures and related topics <i>D. Ramachandran</i>	765

Volume II

<i>Preface</i>	v
<i>List of Contributors</i>	vii

Part 5: Order and Measure Theory

19. Riesz spaces and ideals of measurable functions <i>M. Văth</i>	787
20. Measures on quantum structures <i>A. Dvurečenskij</i>	827
21. Probability on MV-algebras <i>B. Riečan and D. Mundici</i>	869
22. Measures on clans and on MV-algebras <i>G. Barbieri and H. Weber</i>	911
23. Triangular norm-based measures <i>D. Butnariu and E.P. Klement</i>	947

Part 6: Geometric Measure Theory

24. Geometric measure theory: Selected concepts, results and problems <i>M. Chlebík</i>	1011
--	------

25. Fractal measures	1037
<i>K.J. Falconer</i>	

Part 7: Relation to Transformation and Duality

26. Positive and complex Radon measures in locally compact Hausdorff spaces	1055
<i>T.V. Panchapagesan</i>	
27. Measures on algebraic-topological structures	1091
<i>P. Zakrzewski</i>	
28. Liftings	1131
<i>W. Strauss, N.D. Macheras and K. Musiał</i>	
29. Ergodic theory	1185
<i>F. Blume</i>	
30. Generalized derivatives	1237
<i>E. Pap and A. Takači</i>	

Part 8: Relation to the Foundations of Mathematics

31. Real valued measurability, some set-theoretic aspects	1261
<i>A. Jovanović</i>	
32. Nonstandard analysis and measure theory	1295
<i>P.A. Loeb</i>	

Part 9: Non-Additive Measures

33. Monotone set-functions-based integrals	1329
<i>P. Benvenuti, R. Mesiar and D. Vivona</i>	
34. Set functions over finite sets: Transformations and integrals	1381
<i>M. Grabisch</i>	
35. Pseudo-additive measures and their applications	1403
<i>E. Pap</i>	
36. Qualitative possibility functions and integrals	1469
<i>D. Dubois and H. Prade</i>	
37. Measures of information	1523
<i>W. Sander</i>
