

TABLE OF CONTENTS

Preface	vii
CHAPTER I. HOMOLOGICAL METHODS IN FIXED POINT THEORY	1
1. Coincidence theory D. L. GONÇALVES	3
2. On the Lefschetz fixed point theorem L. GÓRNIOWICZ	43
3. Linearizations for maps of nilmanifolds and solvmanifolds E. C. KEPPELMANN	83
4. Homotopy minimal periods W. MARZANTOWICZ	129
5. Periodic points and braid theory T. MATSUOKA	171
6. Fixed point theory of multivalued weighted maps J. PEJSACHOWICZ, R. SKIBA	217
7. Fixed point theory for homogeneous spaces – a brief survey P. WONG	265
CHAPTER II. EQUIVARIANT FIXED POINT THEORY	285
8. A note on equivariant fixed point theory D. L. FERRARIO	287
9. Equivariant degree J. IZE	301
10. Bifurcations of solutions of $SO(2)$ -symmetric nonlinear problems with variational structure S. RYBICKI	339

CHAPTER III. NIELSEN THEORY	373
11. Nielsen root theory	
R. BROOKS	375
12. More about Nielsen theories and their applications	
R. F. BROWN	433
13. Algebraic techniques for calculating the Nielsen number on hyperbolic surfaces	
E. L. HART	463
14. Fibre techniques in Nielsen theory calculations	
PH. R. HEATH	489
15. Wecken theorem for fixed and periodic points	
J. JEZIERSKI	555
16. A primer of Nielsen fixed point theory	
B. JIANG	617
17. Nielsen fixed point theory on surfaces	
M. R. KELLY	647
18. Relative Nielsen theory	
X. ZHAO	659
CHAPTER IV. APPLICATIONS	685
19. Applicable fixed point principles	
J. ANDRES	687
20. The fixed point index of the Poincaré translation operator on differentiable manifolds	
M. FURI, M. P. PERA, M. SPADINI	741
21. On the existence of equilibria and fixed points of maps un- der constraints	
W. KRYSZEWSKI	783
22. Topological fixed point theory and nonlinear differential equations	
J. MAWHIN	867
23. Fixed point results based on the Ważewski method	
R. SRZEDNICKI, K. WÓJCIK, P. ZGLICZYŃSKI	905
Authors	945
Index	949
