

# TABLE OF CONTENTS

Preface	xiii
Most Commonly Used Symbols	xx
<b>Chapter 1      Introduction</b>	<b>3</b>
1.1      General	3
1.2      Miller Park Stadium with Convertible Roof	4
1.3      Milwaukee Art Museum Addition with Movable Sun Screen	6
1.4      Al McGuire Center with Cylindrical Roof	9
1.5      Raynor Library, Marquette University	12
1.6      Fox Tower, Portland	13
References	15
<b>Chapter 2      Steels</b>	<b>17</b>
2.1      Introduction	17
2.2      Production of Steels and Steel Products	17
2.3      Rolled Steel Sections	21
2.4      Heat Treatment of Steel	29
2.5      Classification of Structural Steels	30
2.6      Physical Properties	34
2.7      Economics	43
2.8      Built-Up Sections	47
2.9      Corrosion, Painting, and Galvanizing	53
References	55
Problems	56
<b>Chapter 3      Structures</b>	<b>59</b>
3.1      Introduction	59
3.2      Classification of Structures and Members	60
3.3      Framed Multistory Buildings	71
3.4      Industrial Buildings	83
3.5      Components of Buildings	88
3.6      Fabrication and Erection of Steel Buildings	97
References	102
Problems	103

<b>Chapter 4</b>	<b>Design Loads and Design Philosophy</b>	<b>105</b>
4.1	Introduction	105
4.2	Specifications	105
4.3	Building Codes	107
4.4	Loads	108
4.5	Dead Loads, $D$	109
4.6	Floor Live Loads, $L$ , and Roof Live Loads, $L_r$	110
4.7	Wind Loads	115
4.8	Snow Loads, $S$ , and Rain Loads, $R$	122
4.9	Earthquake Loads, $E$	124
4.10	Design Philosophies	125
4.11	Design Process	133
	References	136
	Problems	137
<b>Chapter 5</b>	<b>Structural Analysis and Computation of Required Strengths</b>	<b>139</b>
5.1	Introduction	139
5.2	Braced Frames with Simple Beam-to-Column Connections	141
5.3	Unbraced Portal Frames	165
5.4	Unbraced Frames	173
	References	174
	Problems	175
<b>Chapter 6</b>	<b>Connectors</b>	<b>179</b>
6.1	Introduction	179
6.2	High-Strength Bolts	181
6.3	Bolt Loading Cases	191
6.4	Behavior of Shear Loaded, Bolted Joints	192
6.5	Slip-Critical Joints and Bearing-Type Joints	197
6.6	Failure Modes and Limit States	199
6.7	Design Shear Strength of a Bolt (Bearing-Type Joint)	201
6.8	Design Bearing Strength at Bolt Holes	205
6.9	Design Strength of a Bolt in Tension	210
6.10	Design Strength of a Bolt in Combined Shear and Tension	211
6.11	Behavior and Design of Bolts in Slip-Critical Joints	213
6.12	Ordinary Bolts	213
6.13	Bolt Design	214
6.14	Welding and Welding Processes	224

6.15	Weld Classifications	233
6.16	Welding Definitions and Geometry	239
6.17	Welding Symbols	248
6.18	Behavior of Fillet Welds	251
6.19	Design Strength of Welds	251
6.20	Design Aids for Welding	255
6.21	Pins	258
	References	259
	Problems	260
<b>Chapter 7</b>	<b>Tension Members</b>	<b>267</b>
7.1	Introduction	267
7.2	Types of Tension Members	267
7.3	Behavior of Tension Members	270
7.4	Strength Limit States of a Tension Member	276
7.5	Gross Area, $A_g$	281
7.6	Net Area, $A_n$	282
7.7	Effective Net Area, $A_e$	290
7.8	Block Shear Rupture Strength	308
7.9	Slenderness Limitations	315
7.10	Design of Tension Members	318
7.11	Built-Up Tension Members	328
7.12	Tension Rods	334
	References	342
	Problems	342
<b>Chapter 8</b>	<b>Axially Loaded Columns</b>	<b>351</b>
8.1	Introduction	351
8.2	Types of Sections for Columns	353
8.3	Stable, Neutral, and Unstable States of Equilibrium	355
8.4	Elastic Flexural Buckling of a Pin-Ended Column	358
8.5	Effective Length of Columns in Structures	368
8.6	Inelastic Stability of Axially Loaded Columns	400
8.7	Design Strength of Axially Loaded Columns	403
8.8	Inelastic Effective Length Factors	412
8.9	Local Buckling of Rectangular Plate Elements	418
8.10	Design of Axially Loaded Columns	431
	References	442
	Problems	443

<b>Chapter 9</b>	<b>Adequately Braced Compact Beams</b>	<b>453</b>
9.1	Introduction	453
9.2	Yield Moment, $M_y$ , and Plastic Moment, $M_p$	459
9.3	Shear Stresses in Beam Elements	474
9.4	Plastic Analysis of Beams	478
9.5	Introduction to Buckling Phenomenon in Beams	479
9.6	Serviceability Limit States	490
9.7	Design of Adequately Braced Compact Section Beams	493
9.8	Open Web Steel Joists and Joist Girders	512
9.9	Beam Bearing Plates	512
9.10	Column Base Plates	519
	References	527
	Problems	528
<b>Chapter 10</b>	<b>Unbraced Beams</b>	<b>535</b>
10.1	Introduction	535
10.2	Elastic Lateral-Torsional Buckling of Beams of I-Shaped Sections	535
10.3	Inelastic Stability of Beams of I-Shaped Sections	544
10.4	LRFD of Beams of Compact I-Shaped Sections	550
10.5	Additional Topics	581
10.6	Flexural Strength of Compact Beams Other Than I-Shapes	588
	References	588
	Problems	589
<b>Chapter 11</b>	<b>Members under Combined Forces</b>	<b>593</b>
11.1	Introduction	593
11.2	Strength of Sections under Combined Loading	595
11.3	Second-Order Moments in Beam-Columns	599
11.4	Elastic Lateral-Torsional Buckling of Beam-Columns	603
11.5	Planar Strength of Beam-Columns	605
11.6	Inelastic Lateral-Torsional Buckling of Steel Beam-Columns	607
11.7	Strength of Biaxially Bent Steel Beam-Columns	608

11.8	Moment Amplification Factor, $B_2$	609
11.9	LRFD Interaction Formulas for Beam-Column Design	611
11.10	Plate Local Buckling in Beam-Columns	620
11.11	Structures with Transversely Loaded Members	624
11.12	Members Subjected to Tension and Bending	626
11.13	Analysis Examples	627
11.14	Design of Beam-Columns	635
11.15	Design Examples	641
11.16	Biaxial Bending and Asymmetrical Bending of Beams	673
	References	683
	Problems	684
<b>Chapter 12</b>	<b>Joints and Connecting Elements</b>	<b>691</b>
12.1	Introduction	691
12.2	Joint Loading Cases	691
12.3	Bolted Joints in Direct Shear (Loading Case $P_x P_y$ )	695
12.4	Bolted Joints in Eccentric Shear (Loading Case $P_x P_y M_{xy}$ )	698
12.5	Bolted Joints in Direct Tension (Loading Case $P_z$ )	709
12.6	Bolted Joints in Shear and Tension (Loading Case $P_y P_z$ )	710
12.7	Bolted Joints in Shear and Bending (Loading Case $P_y M_{yz}$ )	714
12.8	Welded Joints in Direct Shear (Loading Case $P_x P_y$ )	727
12.9	Welded Joints in Eccentric Shear (Loading Case $P_x P_y M_{xy}$ )	734
12.10	Welded Joints in Shear and Tension (Loading Case $P_y P_z$ )	752
12.11	Welded Joints in Shear and Bending (Loading Case $P_y M_{yz}$ )	753
12.12	Connecting Elements	759
12.13	Bracket Plates	763
12.14	Gusset Plates	763
12.15	Beam Splices	765
12.16	Splicing of Compression Members	772
	References	776
	Problems	777

<b>Chapter 13</b>	<b>Connections</b>	<b>785</b>
13.1	Introduction	785
13.2	Connection Behavior	790
13.3	Simple Shear Connections	795
13.4	Double-Angle Connections	797
13.5	Shear End-Plate Connections	811
13.6	Single-Plate Framing Connections	816
13.7	Single-Angle Framing Connections	822
13.8	Unstiffened Seated Connections	823
13.9	Stiffened Seated Connections	837
13.10	Rigid-Frame Knees	847
13.11	Fully Restrained Moment Connections	855
13.12	Flange-Plated Moment Connections	859
13.13	Extended End-Plate FR Moment Connections	866
13.14	Column Stiffening at Moment Connections	876
	References	877
	Problems	880
	<b>Appendix to Chapter 5</b>	<b>883</b>
A5.1	Introduction to Second-Order Moments ( $P\delta$ Effect and $P\Delta$ Effect)	883
	<b>Index</b>	<b>893</b>
