
Table of Contents

Chapter 1	Introduction.....	1
1.1	Historical Development of the Assembly Process.....	2
1.2	Choice of Assembly Method.....	6
1.3	Social Effects of Automation	10
	References	15
Chapter 2	Automatic Assembly Transfer Systems	17
2.1	Continuous Transfer	17
2.2	Intermittent Transfer.....	17
2.3	Indexing Mechanisms.....	23
2.4	Operator-Paced Free-Transfer Machine	27
	References	28
Chapter 3	Automatic Feeding and Orienting — Vibratory Feeders	29
3.1	Mechanics of Vibratory Conveying.....	29
3.2	Effect of Frequency	34
3.3	Effect of Track Acceleration	34
3.4	Effect of Vibration Angle	35
3.5	Effect of Track Angle	35
3.6	Effect of Coefficient of Friction.....	37
3.7	Estimating the Mean Conveying Velocity.....	38
3.8	Load Sensitivity	42
3.9	Solutions to Load Sensitivity	44
3.10	Spiral Elevators.....	46
3.11	Balanced Feeders.....	47
3.12	Orientation of Parts	47
3.13	Typical Orienting System.....	48
3.14	Effect of Active Orienting Devices on Feed Rate	54
3.15	Analysis of Orienting Systems.....	55
	3.15.1 Orienting System	57
	3.15.2 Method of System Analysis	58
	3.15.3 Optimization	61
3.16	Performance of an Orienting Device	63
	3.16.1 Analysis	63
3.17	Natural Resting Aspects of Parts for Automatic Handling	69

3.17.1 Assumptions	70
3.17.2 Analysis for Soft Surfaces	71
3.17.3 Analysis for Hard Surfaces	77
3.17.4 Analysis for Cylinders and Prisms with Displaced Centers of Mass	78
3.17.5 Summary of Results	78
3.18 Analysis of a Typical Orienting System	78
3.18.1 Design of Orienting Devices	85
3.19 Out-of-Bowl Tooling	87
References	89

Chapter 4 Automatic Feeding and Orienting — Mechanical Feeders.....91

4.1 Reciprocating-Tube Hopper Feeder	92
4.1.1 General Features	94
4.1.2 Specific Applications	94
4.2 Centerboard Hopper Feeder	94
4.2.1 Maximum Track Inclination	94
4.2.2 Load Sensitivity and Efficiency	99
4.3 Reciprocating-Fork Hopper Feeder	100
4.4 External Gate Hopper Feeder	102
4.4.1 Feed Rate	102
4.4.2 Load Sensitivity and Efficiency	106
4.5 Rotary-Disk Feeder	108
4.5.1 Indexing Rotary-Disk Feeder	108
4.5.2 Rotary-Disk Feeder with Continuous Drive	109
4.5.3 Load Sensitivity and Efficiency	110
4.6 Centrifugal Hopper Feeder	110
4.6.1 Feed Rate	111
4.6.2 Efficiency	114
4.7 Stationary-Hook Hopper Feeder	115
4.7.1 Design of the Hook	115
4.7.2 Feed Rate	118
4.8 Bladed-Wheel Hopper Feeder	119
4.9 Tumbling-Barrel Hopper Feeder	119
4.9.1 Feed Rate	121
4.10 Rotary-Centerboard Hopper Feeder	124
4.11 Magnetic-Disk Feeder	124
4.12 Elevating Hopper Feeder	125
4.13 Magnetic Elevating Hopper Feeder	126
4.14 Magazines	126
References	130

Chapter 5	Feed Tracks, Escapements, Parts-Placement Mechanisms, and Robots	131
5.1	Gravity Feed Tracks	131
5.1.1	Analysis of Horizontal-Delivery Feed Track	132
5.1.2	Example	137
5.1.3	On/Off Sensors	139
5.1.3.1	Theory	140
5.1.4	Feed Track Section	143
5.1.5	Design of Gravity Feed Tracks for Headed Parts	146
5.1.5.1	Analysis	146
5.1.5.2	Results	153
5.1.5.3	Procedure for Use of Figure 5.17 to Figure 5.20	158
5.2	Powered Feed Tracks	158
5.2.1	Example	160
5.3	Escapements	161
5.3.1	Ratchet Escapements	162
5.3.2	Slide Escapements	164
5.3.3	Drum Escapements	165
5.3.4	Gate Escapements	167
5.3.5	Jaw Escapements	167
5.4	Parts-Placing Mechanisms	168
5.5	Assembly Robots	171
5.5.1	Terminology	171
5.5.2	Advantages of Robot Assembly	172
5.5.3	Magazines	174
5.5.4	Types of Magazine Systems	175
5.5.5	Automatic Feeders for Robot Assembly	175
5.5.6	Economics of Part Presentation	178
5.5.7	Design of Robot Assembly Systems	182
	References	186

Chapter 6	Performance and Economics of Assembly Systems	187
6.1	Indexing Machines	187
6.1.1	Effect of Parts Quality on Downtime	187
6.1.2	Effects of Parts Quality on Production Time	188
6.1.3	Effect of Parts Quality on the Cost of Assembly	190
6.2	Free-Transfer Machines	195
6.2.1	Performance of a Free-Transfer Machine	196
6.2.2	Average Production Time for a Free-Transfer Machine	200
6.2.3	Number of Personnel Needed for Fault Correction	200
6.3	Basis for Economic Comparisons of Automation Equipment	201
6.3.1	Basic Cost Equations	202

6.4	Comparison of Indexing and Free-Transfer Machines	204
6.4.1	Indexing Machine	204
6.4.2	Free-Transfer Machine	205
6.4.3	Effect of Production Volume	205
6.5	Economics of Robot Assembly	207
6.5.1	Parts Presentation	208
6.5.2	Profile of Typical Candidate Assembly	211
6.5.3	Single-Station Systems	212
6.5.3.1	Equipment Costs	212
6.5.3.2	Personnel Costs	213
6.5.3.3	Parts Quality	213
6.5.3.4	Basic Cost Equation	214
6.5.4	Multistation Transfer Systems	215
6.5.4.1	Equipment Costs	215
6.5.4.2	Cost Equation	216
References		217

Chapter 7 Design for Manual Assembly.....219

7.1	Introduction.....	219
7.2	Where Design for Assembly Fits in the Design Process	219
7.3	General Design Guidelines for Manual Assembly	221
7.3.1	Design Guidelines for Part Handling.....	221
7.3.2	Design Guidelines for Insertion and Fastening	222
7.4	Development of a Systematic DFA Analysis Method	227
7.5	DFA Index	229
7.6	Classification System for Manual Handling	230
7.7	Classification System for Manual Insertion and Fastening.....	233
7.8	Effect of Part Symmetry on Handling Time.....	236
7.9	Effect of Part Thickness and Size on Handling Time	237
7.10	Effect of Weight on Handling Time.....	239
7.11	Parts Requiring Two Hands for Manipulation.....	240
7.12	Effects of Combinations of Factors	240
7.13	Threaded Fasteners.....	240
7.14	Effects of Holding Down	242
7.15	Problems with Manual Assembly Time Standards.....	242
7.16	Application of the DFA Method	244
7.16.1	Results of the Analysis.....	248
7.17	Further General Design Guidelines	251
References		254

Chapter 8	Product Design for High-Speed Automatic Assembly and Robot Assembly	257
8.1	Introduction.....	257
8.2	Design of Parts for High-Speed Feeding and Orienting	258
8.3	Example	263
8.4	Additional Feeding Difficulties	265
8.5	High-Speed Automatic Insertion.....	266
8.6	Example	269
8.7	Analysis of an Assembly.....	271
8.8	General Rules for Product Design for Automation	272
8.9	Design of Parts for Feeding and Orienting.....	276
8.10	Summary of Design Rules for High-Speed Automatic Assembly	280
	8.10.1 Rules for Product Design.....	280
	8.10.2 Rules for the Design of Parts.....	280
8.11	Product Design for Robot Assembly	281
	8.11.1 Summary of Design Rules for Robot Assembly	287
	References	289
Chapter 9	Printed-Circuit-Board Assembly	291
9.1	Introduction.....	291
9.2	Terminology.....	291
9.3	Assembly Process for PCBs.....	292
9.4	SMD Technology.....	301
9.5	Estimation of PCB Assembly Costs	302
9.6	Worksheet and Database for PCB Assembly Cost Analysis	303
	9.6.1 Instructions	303
9.7	PCB Assembly — Equations and Data for Total Operation Cost	305
	9.7.1 Manual.....	306
	9.7.2 Autoinsertion Machine	306
	9.7.3 Robot Insertion Machine.....	306
9.8	Glossary of Terms	308
	References	310
Chapter 10	Feasibility Study for Assembly Automation.....	311
10.1	Machine Design Factors to Reduce Machine Downtime	
	Due to Defective Parts	312
10.2	Feasibility Study	313
	10.2.1 Precedence Diagrams	314
	10.2.2 Manual Assembly of Plug.....	317

10.2.3	Quality Levels of Parts.....	318
10.2.4	Parts Feeding and Assembly	319
10.2.5	Special-Purpose Machine Layout and Performance.....	321
10.2.5.1	Indexing Machine.....	321
10.2.5.2	Free-Transfer Machine.....	324
10.2.6	Robot Assembly of the Power Plug.....	326
	References	332

Problems	333
-----------------------	-----

Appendix A	Simple Method for the Determination of the Coefficient of Dynamic Friction	363
-------------------	---	-----

A.1	The Method	363
A.2	Analysis	365
A.3	Precision of the Method	366
A.4	Discussion.....	366
	Reference.....	368

Appendix B	Out-of-Phase Vibratory Conveyors	369
-------------------	--	-----

B.1	Out-of-Phase Conveying	370
B.2	Practical Applications.....	372
	Reference.....	373

Appendix C	Laboratory Experiments	375
-------------------	------------------------------	-----

C.1	Performance of a Vibratory-Bowl Feeder.....	375
C.1.1	Objectives	375
C.1.2	Equipment.....	375
C.1.3	Procedure	375
C.1.4	Theory.....	376
C.1.5	Presentation of Results	378
C.2	Performance of a Horizontal-Delivery Gravity Feed Track.....	379
C.2.1	Objectives	379
C.2.2	Equipment (Objective 1)	379
C.2.3	Theory (Objective 1)	380
C.2.4	Procedure (Objective 1).....	381
C.2.5	Results (Objective 1).....	381
C.2.6	Equipment (Objective 2)	381
C.2.7	Theory (Objective 2)	382
C.2.8	Procedure (Objective 2).....	382
C.2.9	Results (Objective 2).....	383
C.2.10	Conclusions.....	383

Appendix D Feeding and Orienting Techniques for Small Parts.....385

D.1 Coding System385

 D.1.1 Introduction to the Coding System.....386

 D.1.2 Coding Examples390

 D.1.3 Sample Parts for Practice392

 D.1.4 Analysis of the Coding of the Sample Parts393

 D.1.5 Coding System for Small Parts.....395

D.2 Feeding and Orienting Techniques408

D.3 Orienting Devices for Vibratory-Bowl Feeders474

D.4 Nonvibratory Feeders492

Nomenclature.....501

Index507
