CHAPTER I. AN INTRODUCTION TO TELEOPERATION SYSTEMS AND HAPTIC INTERFACES	9
1. WHAT IS A TELEOPERATION SYSTEM?	9
1.1. General set-up of a teleoperation system	9
1.2. Definition of terms	10
2. APPLICATIONS OF TELEOPERATION SYSTEMS	11
2.1. Benefits of the industrial employment of teleoperation systems	12
2.2. Current challenges in the industrial employment of teleoperation systems	12
3. THE HUMAN-MACHINE INTERFACE	15
3.1. Multi-modal interfaces	16
3.2. Haptic human-machine interfaces	17
3.2.1. What exactly is “haptics”?	17
3.2.2. The physiological basis of haptic perception	18
3.3. The role of haptic feedback in human-machine interaction	19
3.4. Haptic human-machine interfaces: an overview	21
3.4.1. The origins of haptic human-machine interfaces for teleoperation systems	21
3.4.2. Classifications of haptic interfaces	22
3.5. Current approaches to haptic interface research and development	27
3.5.1. System-centred research and development	28
3.5.2. User-centred research and development	29
3.5.3. Application-centred research and development	30
4. MOTIVATION OF THE PRESENT WORK	33
CHAPTER II. THE EFFECT OF HAPTIC FEEDBACK FROM THE REMOTE ENVIRONMENT ON TASK PERFORMANCE	35
1. AN INVESTIGATION OF VIBRATORY SIGNALS AND THEIR EFFECTS ON TASK PERFORMANCE DURING TELEOPERATED MICRO-ASSEMBLY	37
1.1. The effect of directional vibrotactile feedback on force application and performance speed	37
1.2. The effect of non-directional vibrotactile feedback on force application and performance speed	38
1.3. The effect of non-directional vibrotactile feedback on performance error and task completion times	39
1.4. Research aim	41
1.5. Research hypotheses	41
1.6. Method	42
1.6.1. Participants	42
1.6.2. Experimental apparatus	42
1.6.3. Experimental design	44
1.6.4. Procedure	45
1.7. Results	45
1.7.1. Pick-and-place performance	46
1.7.2. Task completion time	46
1.7.3. Excessive force application	47
1.7.4. Survey results	48
1.8. Discussion	49

2. AN INVESTIGATION OF FORCE FEEDBACK DISPLAYS AND THEIR EFFECT ON TASK PERFORMANCE DURING A TELEOPERATED ABRASION TASK	51
2.1. The effect of force feedback on force application	51
2.2. The effect of force feedback on other performance aspects	52
2.3. Force sensory substitution displays.....	53
2.3.1. Theory on the effects of force feedback and force sensory substitution displays on task performance.....	54
2.3.2. Empirical findings on the effects of force feedback and force sensory substitution displays on task performance.....	55
2.4. Research aim	56
2.5. Research hypotheses	57
2.6. Method	58
2.6.1. Participants.....	58
2.6.2. Experimental apparatus.....	58
2.6.3. Experimental design.....	59
2.6.4. Procedure	60
2.7. Results.....	61
2.7.1. Excessive force application.....	61
2.7.2. Regulation of applied forces	62
2.7.3. Force application precision	63
2.7.4. The relationship between task completion time and measures of force	64
2.7.5. Survey results.....	65
2.8. Discussion	65
3. GUIDELINES FOR THE IMPLEMENTATION AND EFFECTIVE USE OF HAPTIC FEEDBACK FROM THE REMOTE ENVIRONMENT.....	68
CHAPTER III. THE EFFECT OF HAPTIC GUIDANCE ON TASK PERFORMANCE	69
1. AN INVESTIGATION INTO THE EFFECT OF HAPTIC EXPERT DEMONSTRATIONS ON THE TASK PERFORMANCE OF NOVICE USERS WITH A TELEOPERATED MICRO-ASSEMBLY SYSTEM	70
1.1. Theoretical approaches to motor skill training	70
1.2. Haptic feedback in training simulations.....	71
1.3. Haptic expert demonstrations.....	72
1.4. Research aim	75
1.5. Research hypotheses	76
1.6. Method	76
1.6.1. Participants.....	76
1.6.2. Experimental apparatus.....	77
1.6.3. Experimental design.....	77
1.6.4. Procedure	78
1.7. Results.....	79
1.7.1. Timing of movements	79
1.7.2. Task performance improvement	81
1.7.3. Implicit task knowledge	84
1.7.4. Survey results.....	85
1.8. Discussion	86
2. AN INVESTIGATION INTO THE EFFECT OF HAPTIC ASSISTANCE FUNCTIONS ON TASK PERFORMANCE AND USER PERCEPTION WITH A VIRTUAL TELEOPERATION SYSTEM	90
2.1. Previous studies on the effects of haptic assistance on task performance	91
2.2. Haptic assistance vs. user autonomy.....	92
2.3. Research aim	94
2.4. Research hypotheses	94
2.5. Method	95

2.5.1. Participants.....	95
2.5.2. Experimental apparatus.....	95
2.5.3. The assistance functions.....	96
2.5.4. Experimental design.....	97
2.5.5. Procedure	98
2.6. Results.....	98
2.6.1. Perceived control over TOP movements	99
2.6.2. Objective task performance measures.....	100
2.6.3. Comfort assessments.....	103
2.6.4. Subjective task performance assessments.....	104
2.7. Discussion	104
3. GUIDELINES FOR THE IMPLEMENTATION AND EFFECTIVE USE OF HAPTIC GUIDANCE...	107
CHAPTER IV. META-ANALYTIC INVESTIGATIONS INTO TASK FACILITATIVE EFFECTS OF HAPTIC SIGNALS.....	108
1. PREVIOUS EFFORTS TO SYNTHESISE RESEARCH ON HAPTIC INTERFACES.....	109
2. META-ANALYSIS AS AN INVESTIGATIVE TOOL.....	111
3. DATA SELECTION CRITERIA	112
3.1. Research quality.....	112
3.2. Construct definitions.....	113
3.2.1. Haptic applications.....	114
3.2.2. Task performance.....	114
3.3. Type of effect.....	115
4. METHOD	116
4.1. Literature search.....	116
4.2. Inclusion criteria	116
4.3. Effect size calculations.....	117
4.4. Analyses	117
4.5. Procedure	117
5. RESULTS	119
5.1. Vibrotactile feedback	119
5.2. Force feedback	120
5.3. Haptic expert demonstrations.....	121
5.4. Haptic assistance.....	121
6. DISCUSSION	123
7. GUIDELINES FOR THE IMPLEMENTATION AND EFFECTIVE USE OF HAPTIC SIGNALS	127
CHAPTER V. THE HMI DESIGN GUIDE.....	128
1. PREVIOUS COMPILATIONS OF GUIDELINES FOR THE DESIGN OF HUMAN-MACHINE INTERFACES	128
1.1. Multicriteria Assessment of Usability for Virtual Environments (MAUVE)....	130
1.2. The Presence Design Guide.....	130
2. DEVELOPMENT OF THE HMI DESIGN GUIDE	132
2.1. Collected guidelines	132
2.2. Implementation	132
2.3. Structure	132
2.3.1. Work domain.....	134
2.3.2. Prioritisation of work output requirements	135
2.3.3. Task analysis	136
2.3.4. Specification of contextual factors.....	137
2.3.5. End-user specifications	138
2.3.6. Output.....	139

2.4. An Example: Interface design for teleoperated minimally-invasive surgery according to the HMI Design Guide..... 140

3. DISCUSSION 141

CHAPTER VI. SUMMARY AND GENERAL DISCUSSION..... 142
