Large Wavelength Disturbances in Two-Fluid
Bénard–Marangoni Convection and Their Control

R.E. Kelly 1

1 Introduction 1

2 Two-Fluid Bénard–Marangoni Instability 3

2.1 The Basic State of Conduction 3

2.2 The Governing Linearized Stability Equations
and Boundary Conditions 4

2.3 Analysis and Results 8

3 Active Control of the Two-Fluid Bénard–Marangoni Instability 15

4 Discussion 17

References 20

Convective Instabilities in Layered Systems

*A.A. Nepomnyashchy, I.B. Simanovskii, T. Boeck, A.A. Golovin,
L.M. Braverman, A. Thess* 21

1 Introduction 21

2 Mechanisms of Convective Instabilities in a Single Layer 22

3 Mathematical Models 23

4 Two-Layer Systems 27

4.1 Marangoni Instabilities 29

4.2 Combined Rayleigh–Marangoni Convection 32

4.3 Anticonvection 33

4.4 Influence of Lateral Walls 36

5 Three-Layer Systems 38

5.1 Combined Rayleigh–Marangoni Convection 39

5.2 Marangoni Convection in Systems with Deformable Interfaces ... 40

References 43

Salt-Finger Instability Generated by Surface-Tension
and Buoyancy-Driven Convection in a Stratified Fluid Layer

C.F. Chen, Cho Lik Chan 45

1 Introduction 45

2 Experiments 47

2.1 Apparatus and Procedure 47

2.2 Experimental Results 48

3 Parallel Flow Model 53

4 Discussion 55

5 Conclusions 57

References 58

Observations on Interfacial Convection in Multiple Layers without and with Evaporation

<i>O. Ozen, D. Johnson, R. Narayanan</i>	59
1 Introduction	59
2 The Physics of Buoyancy and Interfacial-Gradient-Driven Convection in the Absence of Evaporation	60
2.1 Pure Rayleigh Convection or Buoyancy-Driven Convection	60
2.2 Pure Marangoni Convection or Interfacial Tension Gradient-Driven Convection	61
2.3 Physical Effects of Multiple Fluid Layers	63
3 Physics of Evaporative Instability without Convection	64
4 The Physics of Evaporation with Convection	66
5 The Model	67
5.1 The Base State Solution and the Perturbed Equations	69
5.2 Results and Discussion	71
6 Scope for Future Work	76

General Approach to the Linear Stability of Thin Spreading Films

<i>Jeffrey M. Davis, Benjamin J. Fischer, Sandra M. Troian</i>	79
1 Introduction	79
1.1 Linear Stability Theory – Modal Approach	82
1.2 Generalized Linear Stability Theory	82
2 Autonomous Operator – Thermocapillary Spreading	84
2.1 Steady Traveling Wave Solutions	85
2.2 Linear Stability of Traveling Waves	85
2.3 Asymptotic Behavior	86
2.4 Optimal Amplification Ratio	87
2.5 Pseudospectra	89
2.6 Optimal Perturbations – SVD	91
2.7 Summary of Thermocapillary Spreading Problem	92
3 Non-autonomous Operator: Marangoni Spreading from a Finite Surfactant Source	93
3.1 Surfactant Driven Flow	94
3.2 Base State Flow Profiles	95
3.3 Linear Stability of Time Dependent Base State Profiles	98
3.4 Transient Growth Analysis	100
3.5 Mechanism for Large Transient Growth	100
3.6 Summary of Marangoni Driven Spreading	102
4 Conclusion	103
