

Contents

Introduction	xi
I An Early History of the Soliton	1
Chapter 1. A Century and a Half Ago	3
Beginning of Wave Theory	8
The Brothers Weber Study Waves in Water	10
From Waves in Water to Waves in Ether	10
Scientific Discoveries — Mainstream and Ahead of Time	12
Science and Society	19
Chapter 2. The Great Solitary Wave of John Scott Russell	22
Before the Fateful Encounter	23
John Russell Meets The Solitary Wave	25
That is Impossible!	27
All the Same it Exists!	29
The Solitary Wave in Solitude	33
Wave or Particle?	34
Chapter 3. Relatives of the Soliton	37
Hermann Helmholtz and the Nerve Pulse	40
Further Adventures with the Nerve Pulse	43
Hermann Helmholtz and Eddies	44

Lord Kelvin's "Vortex Atoms"	51
Lord Ross and Vortices in Space	53
About Linearity and Nonlinearity	54
II Nonlinear Oscillations and Waves	59
Chapter 4. A Portrait of the Pendulum	61
The Equation of the Pendulum	61
Small Oscillations of the Pendulum	63
Galileo Galilei's Pendulum	64
About Similarity and Dimensions	67
Energy Conservation	70
Language of Phase Diagrams	74
Digression on Celestial Mechanics, Perturbations, and Stability	78
Phase Portraits	79
Phase Portrait of the Pendulum	81
The "Soliton" Solution of the Pendulum Equation	84
Motions of the Pendulum and the "Tame" Soliton	86
Concluding Remarks	89
Chapter 5. From Pendulum to Waves and Solitons	94
Waves in Chains of Bound Particles	95
Finding Modes in Chains of Particles – Important Mathematical Exercise	100
A Historic Digression. Bernoulli Family and Waves	104
D'Alembert's Waves and Debates about them	105
On Discrete and Continuous	108
The Speed of Sound and How it was Measured	111
Dispersion in Chains of Atoms	114
On How to "Perceive" the Fourier Expansion	116
Dispersion of Waves on Water Surface	118
On the Speed of a Pack of Waves	121
How Much Energy is Stored in a Wave?	125
III The Present and Future of the Soliton	129
Chapter 6. Frenkel's Solitons	131
What is Theoretical Physics?	131
Ya.I. Frenkel's Ideas	134
Atomic Model of the Moving Dislocation after Frenkel and Kontorova .	135
Interactions Between Dislocations	138
"Live" Solitonic Atom	139
Dislocations and the Pendulum	141
The Fate of the Waves of Sound	145

Let Us Have a Look at Dislocations	148
Desktop Solitons	150
Other Close Relatives of Dislocations: the Mathematical Branch	152
Magnetic Solitons	157
Chapter 7. Rebirth of the Soliton	160
Can Men be on Friendly Terms with the Computer?	162
Many-faceted Chaos	166
Enrico Fermi is Astonished by the Computer	171
Russell's Soliton Returns	175
Ocean Solitons: Tsunami, the Tenth Wave	184
Three Solitons	188
Soliton Telegraph	191
The Nerve Pulse — Elementary Particle of Thought	194
Vortices — Everywhere	199
Chapter 8. Modern Solitons	204
Vortices in Superfluids	207
Josephson Solitons	212
Elementary Particles and Solitons	218
Appendix I. Lord Kelvin <i>On Ship Waves</i>	232
Appendix II. Skyrme's Soliton	240
Mathematics Appendix	245
Glossary of Names	249
Subject Index	259
