
CONTENTS

PREFACE

xiii

1 Introduction

1

- 1.1 Optimization Fundamentals / 2
 - 1.1.1 Elements of Problem Formulation / 4
 - 1.1.2 Mathematical Modeling / 10
 - 1.1.3 Nature of Solution / 16
 - 1.1.4 Characteristics of the Search Procedure / 20
- 1.2 Introduction to MATLAB / 25
 - 1.2.1 Why MATLAB? / 25
 - 1.2.2 MATLAB Installation Issues / 26
 - 1.2.3 Using MATLAB the First Time / 27
 - 1.2.4 Using the Editor / 33
 - 1.2.5 Creating a Code Snippet / 37
 - 1.2.6 Creating a Program / 40
- Problems / 44

2 Graphical Optimization

45

- 2.1 Problem Definition / 45
 - 2.1.1 Example 2.1 / 46
 - 2.1.2 Format for the Graphical Display / 47
- 2.2 Graphical Solution / 48
 - 2.2.1 MATLAB High-Level Graphics Functions / 48
 - 2.2.2 Example 2.1—Graphical Solution / 50
 - 2.2.3 Displaying the Graphics / 53
 - 2.2.4 Customizing the Figure / 54
- 2.3 Additional Examples / 56

vii

2.3.1	Example 2.2 / 56
2.3.2	Example 2.3 / 64
2.3.3	Example 2.4 / 73
2.4	Additional MATLAB Graphics / 79
2.4.1	Handle Graphics / 80
2.4.2	Graphical User Interface / 81
2.4.3	GUI Code / 84
	References / 91
	Problems / 92

3 Linear Programming

93

3.1	Problem Definition / 94
3.1.1	Standard Format / 94
3.1.2	Modeling Issues / 98
3.2	Graphical Solution / 107
3.2.1	Example 3.1 / 110
3.2.2	Characteristics of the Solution / 111
3.2.3	Different Solution Types / 114
3.3	Numerical Solution—the Simplex Method / 115
3.3.1	Features of the Simplex Method / 115
3.3.2	Application of Simplex Method / 117
3.3.3	Solution Using MATLAB / 120
3.3.4	Solution Using MATLAB'S Optimization Toolbox / 123
3.4	Additional Examples / 124
3.4.1	Example 3.2—Transportation Problem / 124
3.4.2	Example 3.3—Equality Constraints and Unrestricted Variables / 130
3.4.3	Example 3.4—A Four-Variable Problem / 134
3.5	Additional Topics in Linear Programming / 138
3.5.1	Primal and Dual Problem / 138
3.5.2	Sensitivity Analysis / 148
	References / 151
	Problems / 152

4 Nonlinear Programming

154

4.1	Problem Definition / 155
-----	--------------------------

4.1.1	Problem Formulation—Example 4.1 / 155
4.1.2	Discussion of Constraints / 157
4.2	Mathematical Concepts / 159
4.2.1	Symbolic Computation Using MATLAB / 159
4.2.2	Basic Mathematical Concepts / 162
4.2.3	Taylor's Theorem/Series / 169
4.3	Graphical Solutions / 171
4.3.1	Unconstrained Problem / 171
4.3.2	Equality Constrained Problem / 172
4.3.3	Inequality Constrained Problem / 173
4.3.4	Equality and Inequality Constraints / 174
4.4	Analytical Conditions / 175
4.4.1	Unconstrained Problem / 176
4.4.2	Equality Constrained Problem / 179
4.4.3	Inequality Constrained Optimization / 186
4.4.4	General Optimization Problem / 191
4.5	Examples / 194
4.5.1	Example 4.2 / 194
4.5.2	Example 4.3 / 196
	References / 200
	Problems / 201

5 Numerical Techniques—The One-Dimensional Problem 203

5.1	Problem Definition / 204
5.1.1	Constrained One-Dimensional Problem / 204
5.2	Solution to the Problem / 205
5.2.1	Graphical Solution / 205
5.2.2	Newton-Raphson Technique / 206
5.2.3	Bisection Technique / 209
5.2.4	Polynomial Approximation / 211
5.2.5	Golden Section Method / 214
5.3	Importance of the One-Dimensional Problem / 217
5.4	Additional Examples / 219
5.4.1	Example 5.2—Illustration of General Golden Section Method / 219
5.4.2	Example 5.3—Two-Point Boundary Value Problem / 220
5.4.3	Example 5.4—Root Finding with Golden Section / 223

References / 225

Problems / 225

6 Numerical Techniques for Unconstrained Optimization 227

6.1 Problem Definition / 227

6.1.1 Example 6.1 / 228

6.1.2 Necessary and Sufficient Conditions / 228

6.1.3 Elements of a Numerical Technique / 229

6.2 Numerical Techniques—Nongradient Methods / 230

6.2.1 Random Walk / 230

6.2.2 Pattern Search / 234

6.2.3 Powell's Method / 238

6.3 Numerical Techniques—Gradient-Based Methods / 241

6.3.1 Steepest Descent Method / 241

6.3.2 Conjugate Gradient (Fletcher-Reeves) Method / 244

6.3.3 Davidon-Fletcher-Powell Method / 246

6.3.4 Broydon-Fletcher-Goldfarb-Shanno Method / 249

6.4 Numerical Techniques—Second Order / 251

6.5 Additional Examples / 253

6.5.1 Example 6.2—Rosenbrock Problem / 253

6.5.2 Example 6.3—Three-Dimensional Flow near a Rotating Disk / 255

6.5.3 Example 6.4—Fitting Bezier Parametric Curves / 258

References / 262

Problems / 263

7 Numerical Techniques for Constrained Optimization 265

7.1 Problem Definition / 266

7.1.1 Problem Formulation—Example 7.1 / 266

7.1.2 Necessary Conditions / 267

7.1.3 Elements of a Numerical Technique / 269

7.2 Indirect Methods for Constrained Optimization / 270

7.2.1 Exterior Penalty Function (EPF) Method / 271

7.2.2 Augmented Lagrange Multiplier (ALM) Method / 276

7.3 Direct Methods for Constrained Optimization / 281

7.3.1 Sequential Linear Programming (SLP) / 284

7.3.2 Sequential Quadratic Programming (SQP) / 289

- 7.3.3 Generalized Reduced Gradient (GRG) Method / 297
- 7.3.4 Sequential Gradient Restoration Algorithm (SGRA) / 302

7.4 Additional Examples / 307

- 7.4.1 Example 7.2—Flagpole Problem / 307
- 7.4.2 Example 7.3—Beam Design / 310
- 7.4.3 Example 7.4—Optimal Control / 313

References / 316

Problems / 316

8 Discrete Optimization 318

8.1 Concepts in Discrete Programming / 320

- 8.1.1 Problem Relaxation / 321
- 8.1.2 Discrete Optimal Solution / 322

8.2 Discrete Optimization Techniques / 324

- 8.2.1 Exhaustive Enumeration / 326
- 8.2.2 Branch and Bound / 329
- 8.2.3 Dynamic Programming / 336

8.3 Additional Examples / 341

- 8.3.1 Example 8.4—I Beam Design / 341
- 8.3.2 Zero–One Integer Programming / 343

References / 348

Problems / 348

9 Global Optimization 350

9.1 Problem Definition / 351

- 9.1.1 Global Minimum / 351
- 9.1.2 Nature of the Solution / 354
- 9.1.3 Elements of a Numerical Technique / 356

9.2 Numerical Techniques and Additional Examples / 357

- 9.2.1 Simulated Annealing (SA) / 358
- 9.2.2 Genetic Algorithm (GA) / 366

References / 377

Problems / 378

10 Optimization Toolbox from MATLAB 379

10.1 The Optimization Toolbox / 380

10.1.1	Programs /	380
10.1.2	Using Programs /	382
10.1.3	Setting Optimization Parameters /	384
10.2	Examples /	385
10.2.1	Linear Programming /	385
10.2.2	Quadratic Programming /	386
10.2.3	Unconstrained Optimization /	388
10.2.4	Constrained Optimization /	389
	Reference /	391
