

Contents

Topic 1: Mechatronics in Manufacturing (CIM/Logistics)

Modelling of a mobile gantry crane system as a basis for control <i>M.P. Cartmell, L. Morrish & A.J. Taylor</i>	3
Computer control and storage logistical system <i>J. Cselenyi</i>	9
On designing tool wear monitoring systems using supervised and unsupervised neural networks <i>D.A. Dornfeld & A. Sokolowski</i>	17
Measurement of helical surfaces in CIM-system <i>I. Dudas & Z. Bajaky</i>	23
Profiling devices of grinding wheel for geometrically correct manufacturing of helicoid surfaces <i>I. Dudas</i>	29
Computer aided measurement technic of experiments performed by tools with defined geometry <i>I. Dudas, T. Csermely & Gy. Varga</i>	35
The control of tension in textile filament winders <i>S. Gergely, A.H. Falkner, M.F. Yeung & G.N. Sandor</i>	43
Cell-controller design for a flexible PCB drilling station <i>G. Haidegger & G. Nagy</i>	49
Adaptive control of servo-hydraulic materials-testing machines <i>C.E. Hinton & D.W. Clarke</i>	53
A practical solution for fabric data collection in garment length assembly line <i>H.R. Khakbiz & M.E. Preston</i>	59
Global synthesis and detail synthesis of FMS/FAS <i>F.W. Kovacs</i>	65
Grinding of tool materials of high hardness <i>J. Kundrak, P. Lovei & Z. Szabo</i>	71

Job shop scheduling using multiple criteria <i>S.J. Liang & J.M. Lewis</i>	77
Integration of intelligent multisensory elements into the CIM-class of INSA Rennes <i>I. Lovanyi, A. Nagy, R. Prat, S. Monchaud & V. Metchev</i>	83
A mechatronic solution to a packaging application using an 'open' control integration platform <i>P.R. Moore & A.S. Goh</i>	91
Pressure feedback control of the nip load on a paper cutter <i>K. Nevala</i>	97
Application experiences of an integration project for implementing an assembly cell with multivendor robots, laser sensor and intelligent, MAP-based networking <i>G. Nagy</i>	103
Mechatronics in the shoe industry - the achievements and the challenge <i>J.E.L. Simmons, C. Preece & D.C. Reedman</i>	109
Precision microcutting by means of superhard abrasive tools of elastic bond <i>O. Szabo</i>	115
Development of ultraprecisional turing <i>O. Szabo</i>	121
Analysis of pushing operations in industrial automation <i>I. Uzmay, S. Sukru & M. Yilmaz</i>	127
Optimization of technological programs for robot finishing centre with CNC-control system <i>A. Vatzkitchev</i>	133
 Topic 2: Robotic Aspects in Mechatronics (Robotics/Assembly/Control)	
Robotics usage for belt-grinding for parts with complicated shapes <i>A. Ananiev</i>	141
Dynamics of in-plane motion of a robot arm <i>T.M. Atanackovic & L.J. Cveticanin</i>	147

Accuracy features measurements of industrial robots <i>A. Bencsik & G. Suszter</i>	153
Robo sapiens: a personal assistant robot <i>A. Bradshaw, D.W. Seward & F.N. Nagy</i>	159
The design and performance of a pneumatic robot limb for a walking/climbing vehicle <i>D.S. Cooke, A.A. Collie, E.V. Puttkamer & A. Preumont</i>	165
Approaches to robust control of manipulators: a case study <i>C.A. Czarnecki</i>	171
Experiments on some flexible joint mechanisms applied in industrial robot manufacturing <i>V. Dolga</i>	177
A mechatronic approach to identification of the robot-environment system <i>K.E. Georgiev</i>	183
Some problems of the grinding robots' choice and application <i>D. St.Ingatova</i>	187
Educational robot with parallel structure 'PARRO' <i>D. Chakarov & K. Kostadinov</i>	193
Antropomorphous personal robot <i>S. Meszaros</i>	199
New strategy for design of robot-manipulators <i>J. Merenyi</i>	205
Displacements and oscillations of the characteristic point at the point to point command at industrial robots <i>C. Radulescu</i>	213
Global optimization technique for velocity control of redundant robots <i>S. Tzafestas, A. Zagorianos & P. Dimou</i>	219
Low level motion control of hydraulic manipulators <i>P. Vaha & K. Nevala</i>	225

Topic 3: Sensors in Mechatronics

(Sensors/Quality Control/Monitoring/Diagnostics)

Registration of product surfaces using 3D laser scanning <i>M.A. Atherton, I.M. Kennedy & K.R.G. Rotter</i>	233
Real-time perception planning for an autonomous vehicle <i>A.M. de Campos</i>	241
Analysis of a laser beam deflecting mechatronics system <i>L. Enyedi, Zs. Illyefalvi-Vitez & M. Ruzinko</i>	247
Application of arc-sensor for seam tracking <i>A. Farkas</i>	253
Teleoperation of an experimental mobile vehicle via a free space optical laser line of sight and repeater communication link for use in semi-hazardous structured environments <i>K. Girach, D. Kerr, K. Bouazza-Marouf & J.R. Hewit</i>	259
Optoelectronic micro transducer for displacement measuring <i>A. Halmai & L. Molnar</i>	267
Miniaturised optoelectronic torque sensor <i>A. Halmai & A. Huba</i>	273
Use of perception based navigation for autonomously guided vehicles <i>D.J. Harwood, P. Baptiste, E. Bideaux & C.C.B. Day</i>	279
Vision based aspects of high speed printing machinery design <i>P.D. King & T.C. West</i>	285
The design of mechatronic anthropometric sensor platforms <i>G.M. Mair, J. Heng & R.J. Fryer</i>	291
Calibration of a 3D localization sensor for application in flexible cells <i>V. Metchev, R. Prat, S. Monchaud, I. Lovanyi & A. Nagy</i>	297
Autogenerative nodal memory model (ANM) based autonomously responsive system description of the audio sense pre-processor <i>F.A. Monaco</i>	305
Two dimensional laser thread counter <i>G.J. Monkman</i>	311

An ultrasonic sensor for phased transmission and beamforming <i>D.W. Purcell & J.P. Huissoon</i>	317
Obtaining organic shapes by machine vision for pictorial representation and machine reproduction <i>E. Reed, T. Spamer, N. Cope & R. Carnaghan</i>	323
Practical application of laser Doppler vibrometry for machinery vibration measurement <i>S.J. Rothberg & N.A. Halliwell</i>	327
A flowmeter for application in medicine <i>G. Schnell</i>	335
Developments in surface roughness measurements using eddy currents <i>R.L. Ward</i>	341
The software design and implementation of an intelligent 3D laser range finder <i>B. Varkonyi</i>	347

Topic 4: Actuators in Mechatronics (Actuators/Grippers/Tools)

Piezomechanics: a new sub-system in mechatronics and its applications in precision engineering <i>R. Bansevicius, A. Jebb, J.A.G. Knight & R. Parkin</i>	361
Position control of an electric actuator with backlash <i>P. Blazevic & J.C. Cadiou</i>	367
An intelligent soft-start system for large induction machines <i>D.A. Bradley & P. Sivasundarasan</i>	373
A 'smart' tool mounting system to enable the robotic deflashing of moulded products in flexible manufacturing <i>D. Dawson & B. Heudorfer</i>	379
A new PCM-PWM combined technique for pneumatic flow-regulating valves <i>C. Ferraresi</i>	385
Applications of electrorheological fluids <i>D.J. Jendritza & H. Janocha</i>	391

Piezoelectric and magnetostrictive materials for use in smart actuators <i>D.J. Jandritza, H. Janocha & J. Schafer</i>	397
Total mechatronic design: electro-rheological traverse gear <i>A.R. Johnson, J. Makin & W.A. Bullough</i>	405
A piezoelectric harmonic motor <i>T. King, W. Xu & J. Thornley</i>	411
Integrated electrodynamic multi-coordinate drive - a modern component for intelligent motions <i>E. Kallenbach, Chr. Schaffel, U. Schober, K. Konig & M. Eccarius</i>	419
Control of beam dynamics using ER-fluids <i>C.A. Papadopoulos & P.G. Nikolakopoulos</i>	425
Experimental mechatronics: an aspect of the motion control in fluid power systems <i>E. Ravina</i>	431
Integrated electro-pneumatic servoactuator <i>M. Sorli</i>	437
Sensory devices for tool monitoring and component positioning <i>R. Ziarati & B. Shirvani</i>	443
Topic 5: Mechatronical Systems (Modelling/Design/Safety & Reliability)	
Computer aided design of mechanisms based on some mechatronics ideas <i>I. Avramov, Vi. Michailov & V. Galabov</i>	451
Microstructuring technologies, handling and testing (The State of the Art) <i>W. Brenner, H. Detter & G. Popovic</i>	461
Simulation of a vehicle traction control system at the conceptual design stage <i>K.D. Dotchev & R.V. Chaplin</i>	467
A mechatronic strategy for the control of contamination in hydraulic control system fluid <i>P. Dransfield & L. Chao</i>	475
Self-diagnostics in pneumatic systems using programmable logic controllers <i>D.S. Evans & P. Underwood</i>	481

Eigenstrain analysis of smart beam-type structures <i>H. Irschik, K. Schlacher & A.K. Belyaev</i>	487
A mechatronic approach to lace scalloping <i>M.R. Jackson, M.E. Preston, S. Yang, L. Tao & T.G. King</i>	493
Computer aided design of the combinational pneumatic controls <i>Z. Kaposvari, T. Szabo & J. Ban</i>	501
The use of function mapping in the design of mechatronic systems <i>M. Li & J.E.E. Sharpe</i>	505
Some interdisciplinary aspects of prosthetics and orthotics design <i>D. Mandru & F. Racasanu</i>	511
A generic framework for the description of components in the design and simulation of mechatronic products <i>V.K. Oh, R.V. Chaplin, X.T. Yan & J.E.E. Sharpe</i>	515
Distributed control systems within a mechatronic environment <i>R. Parkin & S.J. Yaxley</i>	521
Survey of mechatronical structures <i>O. Petrik</i>	527
Basis for the integration of sensors and actuators into autonomous production cells <i>T. Pfeifer & H. Thrum</i>	533
The importance of dependability in mechatronic systems <i>C. Preece & G.A.S. Wingate</i>	539
Object oriented design method for mechatronic products <i>W.H.J. van Schaik</i>	545
On fluid power control by switching techniques <i>R. Scheidl, A.S. Abo El Lail & D. Schindler</i>	551
Fault detection and diagnosis in industrial systems <i>P. Urwin</i>	557
Inventive engineering as basis of design methodology for mechatronics <i>M. Valasek</i>	563

Topic 6: Advanced Approaches in Mechatronics

(Theory/Software/Artificial Intelligence/Parallel Architectures)

Kinematic modelling of plan flexible robot <i>P. Andre, J-P. Taillard & P. Mitrouchev</i>	569
A compensation method for elastic deformation of driving wheels in navigation of wheeled robot <i>A. Arakawa, T. Emura & T. Furuya</i>	577
A task oriented neural network solution to the inverse kinematics of manipulators <i>N. Aspragathos, E. Dermatas & A. Nearchou</i>	583
Robotic assisted orthopaedic surgery <i>K. Bouazza-Marouf, J.R. Hewit & I. Browbank</i>	589
The use of bond graph reasoning for function-means analysis and scheme generation in an integrated interdisciplinary design system <i>R.H. Bracewell & J.E.E. Sharpe</i>	595
Potential fields for controlling redundant robots in 3D. Will they ever be used for surgery? <i>R. Buckingham</i>	601
Cooperation between a fuzzy simulator and an optimising program <i>T. Csaki</i>	607
A controller and a steering simulator for electrically powered steering systems <i>T. Emura, L. Wang & A. Arakawa</i>	613
DSP based field-oriented control of asynchronous motors <i>D. Fodor & Z. Katona</i>	619
Modelling of complex mechatronic systems using finite network models <i>G. Gerlach, M. Quickert & A. Schroth</i>	625
Artificial neural networks for locating eyes in facial images <i>J.R. Hewit & P.M. Hagelin</i>	631
Design by manufacturing simulation: concurrent engineering meets virtual reality <i>M.W.S. Jaques, P. Strickland & T.J. Oliver</i>	637

Adaptive control of a magnetically levitated structure <i>M.S. Ju & L.T. Chang</i>	643
Fuzzy control for micro robot servo drive with field-oriented stepping motor <i>A. Kelemen, M. Imecs, C. Rusu & R. Marschalko</i>	649
A hybrid simulation-scheduler-quality control system for FMS <i>G. Kovacs, I. Mezgar, S. Kopacsi, J. Nacsá & P. Groumpos</i>	655
Identification and adaptive control of robots <i>B. Lantos</i>	663
The adaptive control for translation modulus with continuous current linear engines <i>V. Maties & F. Pop</i>	675
UMC: software for machine control system integration, configuration and programming <i>P.R. Moore, A.J. Carrott, R.H. Weston & R. Harrison</i>	679
Automation of the recognition process by neural networks <i>Z. Nagy</i>	687
Effectiveness of adaptive and learning control strategies for robot manipulators <i>H.R. Ozcalik, I. Uzmay & M. Yilmaz</i>	693
Artificial intelligence in the control of cone crushers <i>R. Purkin, D.C. Bayliss & R.A. Bearman</i>	699
Custom microelectronic circuits for cycloconverter drives <i>B. Patterson & D. Morley</i>	705
Design consideration for fuzzy robot controllers <i>I.J. Rudas, J. Larmouth & F. N-Nagy</i>	711
Model-reference adaptive control for coupled-drive systems <i>I. Samarjai & P. Urwin</i>	717
Accuracy of robot trajectory realization when using the maximum cruising speed method for planning <i>J. Somlo, G. Lipovszki & H. Doghiem</i>	727
Task orientated design of automation <i>P. Strickland & M.W.S. Jaques</i>	737

PC based robot controller for advanced control algorithms <i>G. Tevesz & I. Bezi</i>	743
Simulation of mechatronic systems as systems with different physical nature <i>M. Valasek</i>	749
Software for mechatronic devices <i>C. Zielinski & T. Zielinska</i>	755
Topic 7: Mechatronics in Education (Education - Secondary and Higher Education)	
Mechatronics engineering education in the UK <i>M. Acar</i>	763
Mechatronics and engineering education at the Technical University of Cluj <i>V. Csibi & V. Maties</i>	771
A college/company collaboration model for programmable logic controller (PLC) training <i>C.C.B. Day & E.W. Breeze</i>	775
Mechatronics oriented, modernized education in the Jedlik Anyos Technical Middle School, Gyor <i>E. Hajdu</i>	781
Design and development of a postgraduate mechatronics course <i>M.R. Jackson, M.E. Preston & P.D. King</i>	785
Computer integrated manufacturing educational system in the national vocational training institute <i>O.Z. Jakubisz</i>	791
A hypertext documentation system for Schemebuilder: the 'mechatronics' book <i>P.M. Langdon & H.F. Cheung</i>	797
On the training on mechatronics engineers in the design of small real-time embedded microprocessors systems <i>J.H. Milner</i>	803
Efficiency of robottechnics education <i>I. Morocz</i>	807

The teaching of electronic design automation techniques for modern machine control systems in Romania	813
<i>E.B. Patterson, M.N. Cirstea & D. Morley</i>	
A four year BEng. (Hons) mechatronic degree programme	819
<i>G.G. Rogers, D.G. Whitehead & S.R. Owen</i>
