## CONTENTS

|     |                                                                                                                                                                                                                                         |     |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1.  | Blerina BEQAJ, Entela ÇOBANI: Groundwater quality and risk of pollution from natural, human and urban transport activities in the Drini basin .....                                                                                     | 5   |
| 2.  | Erdem DOĞAN: Performance analysis of LSTM model with multi-step ahead strategies for a short-term traffic flow prediction.....                                                                                                          | 15  |
| 3.  | Paweł FABIŚ, Marek FLEKIEWICZ: Optimisation of the SI engine timing advance fueled by LPG.....                                                                                                                                          | 33  |
| 4.  | Jan GALIK, Robert KOHAR, Frantisek BRUMERCIK, Juraj HUDEC, Branislav PATIN: Increasing the safety of a device using the TRIZ methodology .....                                                                                          | 43  |
| 5.  | Piotr GORZELANCZYK, Maja WOJTASIK: Research on air pollutant emissions from transport sources in Pila .....                                                                                                                             | 57  |
| 6.  | Kamil KRASUSKI, Mieczysław BAKUŁA: Operation and reliability of an onboard GNSS receiver during an in-flight test .....                                                                                                                 | 75  |
| 7.  | Andrzej KUBIK, Zbigniew STANIK, Damian HADRYŚ, Csaba CSISZÁR: Impact of selected operational parameters on measures of technical condition of rolling bearings in means of transport built based on analysis of vibration signals ..... | 89  |
| 8.  | Elżbieta MACIOSZEK, Agata KUREK: International road cargo transport in Poland and other EU countries .....                                                                                                                              | 99  |
| 9.  | Peter B. OLADEJI, Hafeez Idowu AGBABIAKA: Intra-urban mobility: the place of para-transit operations in the ancient town of Ile-Ife, Nigeria.....                                                                                       | 109 |
| 10. | Sylvia OLSZAŃSKA, Iryna PROKOPIUK: Balanced scorecard as an effective method for process management in a transport company.....                                                                                                         | 119 |
| 11. | Michal PUŠKÁR, Melichar KOPAS, Marieta ŠOLTÉSOVÁ, Matúš LAVČÁK: System for analysis and correction of motor management.....                                                                                                             | 129 |

|     |                                                                                                                                                                                     |     |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 12. | Piotr SOCZÓWKA, Marcin Jacek KŁOS, Renata ŻOCHOWSKA,<br>Aleksander SOBOTA: An analysis of the influence of travel time on access<br>time in public transport.....                   | 137 |
| 13. | Ondrej STOPKA, Maria STOPKOVA, Iwona RYBICKA, Patrik GROSS,<br>Karel JEŘÁBEK: Use of activity-based costing approach for cost management<br>in a railway transport enterprise ..... | 151 |
| 14. | Aleksandra ŚLIWIŃSKA: Providing on board aircraft security .....                                                                                                                    | 161 |
| 15. | Anjali TARAR, Deotima MUKHERJEE, Kalaga Ramachandra RAO:<br>Development of bus transit system control measures with open transit data .....                                         | 169 |
| 16. | Igor Alex VAKULENKO, Sergey PLITCHENKO, Bulent KURT,<br>Svetlana PROYDAK, Hangardas ASKEROV: Transformation of structure<br>during friction stir welding .....                      | 181 |
| 17. | Andrzej N. WIECZOREK: Ensuring appropriate conditions for<br>lubrication of gear transmissions as a priority for maintenance services in<br>industrial transport .....              | 193 |

## CONTENTS

|     |                                                                                                                                                                                                                   |     |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1.  | Ali Payıdar AKGÜNGÖR, Elif Zahide MERCAN: An analysis of Type I dilemma zone at signalised intersections.....                                                                                                     | 5   |
| 2.  | Jacek CABAN: Traffic congestion level in 10 selected cities of Poland .....                                                                                                                                       | 17  |
| 3.  | Saif Eddine CHETTAH, Nadra NAIT AMAR: Towards a sustainable transport in Algeria: the requisite of energy transition in the road transport sector .....                                                           | 33  |
| 4.  | Mirosław CZECH: PAN – European transport corridors in the policy of the European Union .....                                                                                                                      | 51  |
| 5.  | Piotr GORZELANCZYK, Bartłomiej SEWERYN: Analysis of telematics techniques in logistic transport management in cities .....                                                                                        | 63  |
| 6.  | Maciej IRLIK: Train headway optimisation using virtual blocks .....                                                                                                                                               | 75  |
| 7.  | Tomasz KĄDZIOŁKA, Kazimierz OPOKA: Forecasting the number of failures of the steering system components with the use of the grey system theory method .....                                                       | 85  |
| 8.  | Mohammad Mehdi Khabiri, Pooya Afkhamy Meybodi, Ali Mohammad Montazeri: Evaluation of the effect of various surficial pollutants and environmental condition on surface friction performance of road pavement..... | 99  |
| 9.  | Iwona Krzyżewska: Problems in the organisation of the transport process on the international market .....                                                                                                         | 113 |
| 10. | Krzysztof Labisz: Reflectivity of anodised Al-Si alloy surface of belt pulleys used in combustion engines .....                                                                                                   | 125 |
| 11. | Elżbieta Macioszek: Functioning of selected airports in Poland.....                                                                                                                                               | 135 |
| 12. | Tomasz Matyja: Safety of transport operations performed using pallet load units.....                                                                                                                              | 145 |
| 13. | Grzegorz Motrycz, Karolina J. Helnarska, Piotr Stryjek: Continuing a vehicle fitted with run flat tyres .....                                                                                                     | 157 |

|     |                                                                                                                                                                                                                    |     |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 14. | Obioma R. NWAOGBE, Somtochukwu P. ODIOBULU, Victor OMOKE:<br>Study of a category one airport operational safety and security in Abuja,<br>Nigeria .....                                                            | 171 |
| 15. | Bożena SZCZUCKA-LASOTA, Tomasz WĘGRZYN, Bogusław ŁAZARZ,<br>Adam JUREK, Krzysztof I. WILCZYŃSKI: Welding of S355J+N low alloy<br>steel elements in railway carriages structures.....                               | 191 |
| 16. | Janak TRIVEDI, Mandalapu Sarada DEVI, Dave DHARA:<br>Vehicle classification using the convolution neural network approach .....                                                                                    | 201 |
| 17. | Igor Alex VAKULENKO, Sergey PLITCHENKO, Bulent KURT,<br>Hangardas ASKEROV, Svetlana PROYDAK, Ahmet Emrah ERDOĞDU:<br>Influence of plastic deformation carbon steel on the process of<br>burning electric arc ..... | 211 |
