I. INTRODUCTION 1

PART I

ELASTIC WAVES

II. PROPAGATION IN AN EXTENDED ELASTIC MEDIUM

Components of stress and strain	4
Generalized form of Hooke's law	7
Equations of motion in an elastic medium	10
Integration of the wave equation	15
Rayleigh waves	16
Reflection of elastic waves at a free boundary	24
Reflection and refraction at an interface between two media	31
Total reflection	36
Propagation in an aeolotropic medium	38

III. PROPAGATION IN BOUNDED ELASTIC MEDIA

Longitudinal vibrations of rods	41
Torsional vibrations of rods	47
Flexural vibrations of rods	48
The Pochhammer equations for cylindrical bars	54
(a) Longitudinal waves	56
(b) Torsional waves	65
(c) Flexural waves	68
Propagation of an elastic pulse along a cylindrical bar	73
Propagation along bars of non-circular cross-section	74
Propagation along a conical bar	75
Propagation of longitudinal waves in an infinite plate	79
Summary of the theory of elastic waves in solids given in Chapters II and III	84

IV. EXPERIMENTAL INVESTIGATIONS WITH ELASTIC MATERIALS

Hopkinson pressure bar	87
Davies bar	91
Torsional pressure bar	95
Ultrasonic measurements	95

PART II

STRESS WAVES IN IMPERFECTLY ELASTIC MEDIA

V. INTERNAL FRICTION

Definitions	99
Methods of measurement	104
The behaviour of 'visco-elastic' solids	106
The superposition principle	112
Propagation of stress waves in a 'visco-elastic' solid	116
Mechanism of internal friction	122

VI. EXPERIMENTAL INVESTIGATION OF DYNAMIC ELASTIC PROPERTIES

Free vibrations	130
Resonance method	136
Wave propagation methods	141
Dynamic stress-strain measurements	150
Discussion of experimental results	158

VII. PLASTIC WAVES AND SHOCK WAVES

Plastic waves by the Lagrangian method	164
Plastic waves by the Eulerian method	167
Waves of unloading	170
Plastic waves in specimens of finite length	173
Experiments on plastic waves	175
Shock waves in solids	178

VIII. FRACTURES PRODUCED BY STRESS WAVES

J. Hopkinson's experiments	183
Fractures produced by explosives	186
Experiments with specimens of different shapes	189
Fractures in conical specimens	193
Type of fracture surface produced by stress pulses	194
Brittle and ductile fracture	195

APPENDIX

Notations for stress, strain, and elastic constants; Vector form of wave equations; Curvilinear orthogonal coordinates	197
