

Contents

Dedication	v
Preface	xi
Acknowledgments	xiii
Chapter 1. Introduction	1
Chapter 2. Comparing Real and Artificial Neural Systems	3
2.1. Simplified Neuron	3
2.2. Formal Artificial Neural System Definition	3
2.3. Brain Versus Computer Processing	5
2.3.1. Processing Speed	5
2.3.2. Processing Order	5
2.3.3. Abundance and Complexity	5
2.3.4. Knowledge Storage	6
2.3.5. Fault Tolerance	6
2.3.6. Processing Control	6
Chapter 3. Foundations of Artificial Neural Systems	7
3.1. Processing Elements	7
3.2. Threshold Functions	7
3.3. Topology Characteristics	9
3.3.1. Connection Types	9
3.3.2. Interconnection Schemes	10
3.3.3. Field Configurations	10
3.4. Memory	11
3.4.1. Pattern Types	11
3.4.2. Memory Types	11
3.4.3. Mapping Mechanisms	11
3.5. Recall	11
3.6. Learning	13
3.6.1. Error-Correction Learning	14
3.6.2. Reinforcement Learning	14
3.6.3. Stochastic Learning	15
3.6.4. Hardwired Systems	15
3.6.5. Hebbian Learning	15
3.6.6. Competitive and Cooperative Learning	17
3.6.7. Randomly Connected Systems	18
3.7. Stability and Convergence	18
3.7.1. A Definition of Global Stability	18
3.7.2. Three General Stability Theorems	20
3.7.3. A Definition of Convergence	22
Chapter 4. Artificial Neural System Implementations	23
4.1. Historical Perspective	23

4.2. ANS Implementations	25
4.2.1. Computer ANS Implementations	25
4.2.2. Electronic ANS Implementations	26
4.2.3. Optical/Electro-Optical ANS Implementations	29
Chapter 5. Artificial Neural System Paradigms and their Applications and Implementations	30
5.1. Unsupervised Learning and Feedback Recall Artificial Neural Systems	30
5.1.1. Additive Grossberg (AG)	30
5.1.2. Shunting Grossberg (SG)	33
5.1.3. Binary Adaptive Resonance Theory (ART1)	36
5.1.4. Analog Adaptive Resonance Theory (ART2)	41
5.1.5. Discrete Autocorrelator (DA)	46
5.1.6. Continuous Hopfield (CH)	54
5.1.7. Discrete Bidirectional Associative Memory (BAM)	58
5.1.8. Adaptive Bidirectional Associative Memory (ABAM)	64
5.1.9. Temporal Associative Memory (TAM)	69
5.2. Unsupervised Learning and Feedforward Recall Artificial Neural Systems	72
5.2.1. Learning Matrix (LM)	72
5.2.2. Drive-Reinforcement (DR)	74
5.2.3. Sparse Distributed Memory (SDM)	76
5.2.4. Linear Associative Memory (LAM)	78
5.2.5. Optimal Linear Associative Memory (OLAM)	80
5.2.6. Fuzzy Associative Memory (FAM)	83
5.2.7. Learning Vector Quantizer (LVQ)	85
5.2.8. Counterpropagation (CPN)	90
5.3. Supervised Learning and Feedback Recall Artificial Neural Systems	94
5.3.1. Brain-State-in-a-Box (BSB)	94
5.3.2. Fuzzy Cognitive Map (FCM)	96
5.4. Supervised Learning and Feedforward Recall Artificial Neural Systems	100
5.4.1. Perceptron	100
5.4.2. Adaline/Madaline	106
5.4.3. Backpropagation (BP)	112
5.4.4. Boltzmann Machine (BM)	120
5.4.5. Cauchy Machine (CM)	126
5.4.6. Adaptive Heuristic Critic (AHC)	128
5.4.7. Associative Reward-Penalty (ARP)	131
5.4.8. Avalanche Matched Filter (AMF)	133
Appendix: History of Artificial Neural Systems	136
McCulloch and Pitts—1943	136
Hebb—1949	136
Minsky—1951	137
Uttley—1956	137
Rosenblatt—1957	137
Widrow—1959	138
Steinbuch—1961	138

Grossberg and the Center for Adaptive Systems—1964	138
Amari—1967	139
Anderson—1968	140
Longuet-Higgins, Willshaw, and Buneman—1968	140
Fukushima—1969	141
Klopf—1969	141
Kohonen—1971	141
Cooper, Elbaum, and Nestor Associates—1973	142
Sejnowski—1976	142
McClelland, Rumelhart, and the PDP Group—1977	143
Sutton and Barto—1978	143
Feldman, Ballard, and the Connectionist Group—1980	144
Hecht-Nielsen—1982	144
Hopfield and Tank—1982	144
Mead—1985	145
Kosko—1985	145
 Bibliography	 147
Author Index	185
Subject Index	193
Applications Index	205
Implementations Index	209
About the Author	210
