

# Table of Contents

## INTRODUCTION

### 1 INTRODUCTION TO MASS AND BALANCE

1.1 Mass and Weight | 1-1

1.2 Importance of Mass | 1-2

1.3 Effects of Excessive Weight | 1-3

1.4 Centre of Gravity | 1-5

1.5 Centre of Gravity forward of Limits | 1-6

1.6 Centre of Gravity aft of Limits | 1-7

1.7 Aeroplane Operations Manual | 1-8

## 2 MASSES

2.1 Aeroplane Mass Definitions | 2-1

2.2 Standard Masses | 2-5

2.3 Relationship between Mass, Volume and Density | 2-10

2.4 Aircraft Mass Calculation | 2-10

## 3 CENTRE OF GRAVITY

3.1 Calculation of Centre of Gravity Position | 3-1

3.2 The Importance of Centre of Gravity Location with Respect to Longitudinal Stability | 3-14

## 4 REFERENCE SYSTEM

4.1 Datum | 4-1

4.2 Mean Aerodynamic Chord (MAC) | 4-1

4.3 Index | 4-3

## 5 AIRCRAFT MASS CHECK

5.1 Establishing the Basic Empty Mass | 5-1

5.2 Fleet Masses | 5-1

5.3 Aircraft Weighing | 5-3

## 6 FLOOR LOADS

6.1 Securing of Loads | 6-1

6.2 Load and Load Security | 6-1

6.3 Floor Loading | 6-2

6.4 Load Security | 6-4

## 7 CALCULATION OF TRAFFIC LOAD

7.1 Introduction to Structural Limitations | 7-1

7.2 Determination of Traffic Load | 7-2

7.3 Worked Examples to Calculate Traffic Load | 7-2

7.4 Last Minute Changes (LMC): Aircraft Underload and Overload | 7-7

## 8 MASS AND BALANCE CALCULATION FOR A SMALL AEROPLANE (SEP1)

8.1 Aeroplane Description and Data | 8-1

8.2 Procedure for Mass and Balance Calculation | 8-3

## 9 MASS AND BALANCE CALCULATION FOR A LIGHT TWIN AEROPLANE (MEP1)

9.1 Aeroplane Description and Data | 9-1

9.2 Procedure for Mass and Balance Calculations | 9-3

## 10 MASS AND BALANCE CALCULATION FOR A MEDIUM RANGE TWIN JET (MRJT1)

10.0 Introduction | 10-1

10.1 Aircraft Data Constants | 10-1

10.2 Miscellaneous Systems Affecting Mass and Balance Calculations | 10-3

10.3 Mass and Balance Limitations | 10-6

10.4 Loading Manifest and Centre of Gravity Limitation Envelope | 10-8

10.5 Load and Trim Sheet | 10-12

10.6 Last Minute Change (LMC) | 10-21

## EASA SYLLABUS INDEX
