

# *Table of Contents*

## INTRODUCTION

### **1 INSTRUMENTS - GENERAL**

1.1 Introduction | 1-1

1.2 Definition | 1-2

1.3 Instrument Panels | 1-3

1.4 Ergonomics | 1-3

1.5 Electronic Displays | 1-9

1.6 Transmission Systems | 1-13

### **2 AIR DATA INSTRUMENTS AND RADIO ALTIMETER**

2.1 Environment | 2-1

2.2 Pitot-Static System | 2-4

2.3 Altimetry | 2-13

2.4 The Pressure Altimeter | 2-15

2.5 Vertical Speed Indicator (VSI) | 2-25

2.6 Airspeed Indicator (ASI) | 2-31

2.7 Mach Meter | 2-43

2.8 TAS Meter | 2-48

2.9 Air Temperature Measurement | 2-49

2.10 Angle-of-Attack Measurement | 2-53

2.11 Air Data Computer (ADC) | 2-56

2.12 Radio Altimeter (R/A) | 2-60

## 3 GYROSCOPES

3.1 Gyroscopic Theory | 3-1

3.2 Power Sources for Gyros | 3-10

3.3 The Directional Gyro | 3-13

3.4 Turn and Balance Indicator (TBI) | 3-20

3.5 Artificial Horizon | 3-29

3.6. Vertical Gyro Unit (VGU) | 3-39

## 4 MAGNETIC COMPASSES

4.1 General | 4-1

4.2 Theory of Magnetism | 4-1

4.3 Direct Reading Magnetic Compass | 4-9

4.4 Remote Reading Magnetic Compass | 4-19

## 5 INERTIAL NAVIGATION SYSTEMS (INS)

5.1 Principles and Practical Application | 5-1

5.2 INS Alignment Procedure | 5-21

5.3 Flight Deck Equipment and Operation | 5-24

5.4 INS Operation | 5-28

## 6 INTEGRATED INSTRUMENT SYSTEM & ELECTRONIC FLIGHT INSTRUMENT SYSTEM

6.1 Introduction | 6-1

6.2 Integrated Instrument System | 6-1

6.3 Electronic Flight Instrument System | 6-6

6.4 EFIS Control Panel | 6-9

6.5 Display Units | 6-11

## 7 FLIGHT MANAGEMENT SYSTEMS (FMS)

7.1 Introduction | 7-1

7.2 Description of FMS | 7-1

7.3 Control and Display Unit (CDU) | 7-6

7.4 The Flight Management Computer (FMC) | 7-9

7.5 CDU and FMC Terminology | 7-12

7.6 CDU Operation | 7-14

7.7 FMS Route Management | 7-17

## 8 ENGINE INSTRUMENTATION

8.1 Engine Instrumentation General | 8-1

8.2 Engine Instrumentation | 8-3

8.3 Engine Indicating, Crew Alerting and System Synoptic Display Systems | 8-33

## **9 AUTOMATIC FLIGHT CONTROL AND AUGMENTATION SYSTEM (AFCAS)**

9.1 Introduction | 9-1

9.2 Basic Control Theory | 9-2

9.3 Automatic Pilot | 9-3

9.4 Flight Director (FD) | 9-17

9.5 Automatic Throttle System (ATS) | 9-20

9.6 Flight Augmentation | 9-24

9.7 Practical Use of the Automatic Flight Control and Augmentation System | 9-29

## **10 ALERTING SYSTEMS**

10.1 General | 10-1

10.2 Flight Warning System | 10-3

10.3 Stall Warning & Protection System | 10-10

10.4 Over-Speed Warning System | 10-14

10.5 Configuration Warning System | 10-15

10.6 Altitude Alert System | 10-15

10.7 Airborne Collision Avoidance System | 10-17

10.8 Terrain Awareness & Warning System (TAWS) | 10-26

## **11 RECORDING AND MAINTENANCE SYSTEMS**

11.1 Introduction | 11-1

11.2 Crash Recorders | 11-1

11.3 EU-OPS Requirements | 11-1

11.4 Cockpit Voice Recorder (CVR) | 11-2

11.5 (Digital) Flight Data Recorder | 11-3

11.6 Maintenance Recorder | 11-4

## **12 COMPUTERS**

12.1 Introduction | 12-1

12.2 Analogue Computer | 12-1

12.3 Integrated Circuits (IC) | 12-2

12.4 Bit and Byte | 12-3

12.5 Software | 12-4

12.6 Hardware | 12-5

12.7 Memory | 12-12

12.8 Interfaces | 12-13

## **13 DATA COMMUNICATION SYSTEMS**

13.1 General | 13-1

13.2 Satellite Communication (Satcom) | 13-3

13.3 Future Air Navigation System (FANS) | 13-8

13.4 Aircraft Communication, Addressing and Reporting System (ACARS) | 13-10

13.5 Aeronautical Telecommunications Network (ATN) | 13-13

13.6 Example: FANS on the Airbus A330 | 13-17

## **ABBREVIATIONS**

## **EASA SYLLABUS INDEX**
