Foreword	vii
About the Editorial Team	ix
Introduction	xiii

Personal Progress Table

Attitude Flight

1. Introduction to Instrument Flight	3
2. Instrument Scanning Techniques	17
3. The Instruments	29
4. Straight-and-Level Flight	79
5. The Straight Climb and Descent	99
6. Turning	115
7. Unusual Attitudes	135
8. Normal Instrument Flight on a Partial Panel	145
9. Suggested Training Maneuvers	167

Text	Review

Navigation Aids

10. Radar	183
11. The NDB and the ADF	217
12. VOR	271
13. Instrument Landing System (ILS)	309
14. Distance Measuring Equipment (DME)	351
15. Area Navigation (RNAV)	359
16. Global Positioning System (GPS)	365

Text	Review

IFR Meteorology

17. Wind, Air Masses, and Fronts	387
18. Visibility	405
19. Clouds	415
20. Icing	431
21. Thunderstorms	439
22. High-Level Meteorology	453
23. Weather Reports and Forecasts	457

Text	Review

IFR Procedures and Operations

24. Regulations Important to the Instrument Pilot	491
25. Preparation for Flight	517
26. Instrument Departures	539
27. En Route	553
28. Holding Patterns, Procedure Turns, and DME Arcs	561
29. Instrument Approaches	585
30. Visual Maneuvering	613

Text	Review

Appendices

Appendix 1: Abbreviations	627
Appendix 2: Answers to Review Questions	631

Index	659
