

CZ00070041

TABLE OF CONTENTS

1. Analytical Signatures and Properties of Solutions <i>N. Bárcenas and Q. Morales Mejía</i>	
2. Existence, Uniqueness and Decay Estimates on Mild Solutions to Fractional Chemotaxis-Fluid Systems <i>K. Jiang, Z. Ling, Z. Liu and L. Zhou</i>	25
3. Equivalent Forms of the Brouwer Fixed Point Theorem II <i>A. Idzik, W. Kulpa and P. Maćkowiak</i>	57
4. Minimal Periodic Problem for Brake Orbits of First-Order Hamiltonian Systems <i>X. Zhang, C. Liu and X. Lu</i>	73
5. Volterra-Choquet Nonlinear Operators <i>S.G. Gal</i>	89
6. Semiclassical States for Critical Choquard Equations with Critical Frequency <i>F. Gao and J. Zhou</i>	107
7. Multiplicity and Concentration Results for a Class of Singularly Perturbed Critical Quasilinear Schrödinger Equation <i>Y. Chen and Z. Tang</i>	135
8. Lower Semicontinuity of the Pullback Attractors of Non-Autonomous Damped Wave Equations with Terms Concentrating on the Boundary <i>F.D.M. Bezerra and G.S. Aragão</i>	173
9. Ground-State Solutions to a Kirchhoff-Type Transmission Problem <i>F. Li, Y. Zhang, X. Zhu and Z. Liang</i>	201
10. Singular Reaction Diffusion Equations where a Parameter Influences the Reaction Term and the Boundary Conditions <i>N. Fonseca, A. Muthunayake, R. Shivaji and B. Son</i>	221
11. Sign-Changing Solutions for Coupled Schrödinger Equations with Mixed Coupling <i>Y. Sato and Z.-Q. Wang</i>	243
12. Fractional Kirchhoff-Schrödinger Equation with Critical Exponential Growth in $\mathbb{R}^N$ <i>Y. Liu and L. Yin</i>	275
13. Infinitely Many Periodic Solutions of Dutfing Equations under Integral Condition <i>N. Zheng and Z. Wang</i>	297

Continued on the inside back cover

Zeszyt nr: 74

14. Quasilinear Schrödinger Equations with Singular and Vanishing Potentials Involving Nonlinearities with Critical Exponential Growth
Y.L. Araújo, G. Carvalho and R. Clemente 317
15. Extension of Lipschitz-Type Operators on Banach Function Spaces
W.V. Cavalcante, P. Rueda and E.A. Sánchez-Pérez 343
16. Attractor for a Model of Extensible Beam with Damping on Time-Dependent Space
F.Meng, Y. Wang and C. Zhao 365

TABLE OF CONTENTS

Biblioteka Politechniki Poznańskiej

2021

Vol. 54 no. 2

Gz 5410

CZ00070241

397

1. Space-Time Decay Estimates of Solutions to the Viscous Camassa–Holm Equations <i>X. Zhao</i>	397
2. Non-Local to Local Transition for Ground States of Fractional Schrödinger Equations on Bounded Domains <i>B. Bieganowski and S. Secchi</i>	413
3. Positive Solutions for Schrödinger–Poisson–Slater System with Coercive Potential <i>Y. Jiang, Z. Wang and H.-S. Zhou</i>	427
4. On a Class of Polynomial Differential Systems of Degree 4: Phase Portraits and Limit Cycles <i>J. Llibre and T. Sallhi</i>	441
5. Dissipative Solvability of Jeffreys–Oldroyd- α Model <i>D.M. Polyakov and A. Zvyagin</i>	465
6. On Nonlinear Schrödinger Equations with Attractive Inverse-Power Potentials <i>V.D. Dinh</i>	489
7. Higher Homotopic Distance <i>A. Borat and T. Vèrgili</i>	525
8. Uniqueness of Solutions for Nonlinear Dirichlet Problems with Supercritical Growth <i>R. Molle and D. Passaseo</i>	535
9. Generalized Tonnetz and Discrete Abel–Jacobi Map <i>F.D. Jevtić and R.T. Živaljević</i>	547
10. Positive Radial Solutions of a Quasilinear Problem in an Exterior Domain with Vanishing Boundary Conditions <i>J.C. Guajardo, S. Lorca and R. Mahadevan</i>	569
11. Sign-Changing Solutions for the Boundary Value Problem Involving the Fractional p -Laplacian <i>P. Wu and Y. Zhou</i>	597
12. On the Existence of Fixed Points for Typical Nonexpansive Mappings on Spaces with Positive Curvature <i>Ch. Bargetz, M. Dymond, E. Medjic and S. Reich</i>	621
13. Bounded Resonant Problems Driven by Fractional Laplacian <i>Y. Chen and J. Su</i>	635

Continued on the inside back cover

Zeszyt nr: 75

14. Small Perturbations of Robin Problems Driven by the p -Laplacian Plus a Positive Potential
A. Bahrouni, V.D. Rădulescu and P. Winkert 663
15. Characterization of Regularity Sets for Families of Sequences of Matrices
L. Barreira and C. Valls 675
16. Second-Order Boundary Estimates for Large Positive Solutions to an Elliptic System of Competitive Type
H. Jia, F. Ma and W. Wo 695
