

TABLE OF CONTENTS

Preface	8
Chapter 1. Regulard and chaotic vibrations of an airfoil in supersonic flow	10
1.1. Introduction	10
1.2. Equations of motion	11
1.3. Analysis of stability	12
1.4. Numerical analysis of stability and nonlinear vibrations of the airfoil	13
1.5. Concluding remarks	36
References	36
Chapter 2. Nonlinear, regular and chaotic vibrations of an airfoil with a trailing edge flap in supersonic flow	37
2.1. Introduction	37
2.2. Equations of motion	38
2.3. Equations of motion	40
2.4. Numerical analysis of stability and nonlinear vibrations of the airfoil	41
2.5. Concluding remarks	46
References	47
Chapter 3. Nonlinear, regular and chaotic flutter in incompressible flow	48
3.1. Introduction	48
3.2. Transformation of the equations	49
3.3. Numerical analysis of stability and nonlinear vibrations of the airfoil	50
References	57

Chapter 4. Nonlinear, regular and chaotic vibrations of a plate in supersonic flow	58
4.1. Introduction	58
4.2. Equations of motion	58
4.3. Solution of the equation of motion	60
4.4. Numerical analysis of vibrations	61
4.5. Conclusions	72
References	73
Chapter 5. Vibrations and stability of a biself-excited surface structure in supersonic flow subjected to a follower force	74
5.1. Introduction	74
5.2. Statement of the problem	74
5.3. Solution of the problem	77
5.4. Numerical analysis of the frequency equation	79
Reference	87
Chapter 6. Regular and chaotic oscillations of the helicopter	89
6.1. Introduction	89
6.2. Physical and mathematical models of the helicopter	90
6.2.1. Physical model	90
6.2.2. Systems of coordinates	91
6.2.3. Determination of the equations of motion	93
6.2.4. The absolute velocity of helicopter elements	96
6.2.5. The absolute acceleration of helicopter elements	99
6.2.6. The final form of formulas describing motion of the helicopter	104
6.3. Forces and moments acting on the helicopter	108
6.3.1. Mass forces and moments	108
6.3.2. Aerodynamic forces and moments	110
6.3.3. Landing gear forces and moments	114
6.4. Aerodynamic loads of the blade element	115
6.4.1. General form of expressions describing aerodynamic loads	115
6.4.2. Method of taking into account nonstationary effects	118
6.5. Thrust of the tail rotor	122
6.6. Final expressions for forces and moments	124
6.7. Oscillations during flight	125
6.8. Elements of chaos in helicopter dynamics	130

6.9. Ground resonance of the helicopter	135
6.9.1. Introduction	135
6.9.2. Stability of the helicopter staying on the ground	136
6.9.3. Ground resonance of the helicopter staying on the ground	138
6.9.4. Ground resonance during a take off run of the helicopter	141
6.9.5. Ground resonance – concluding remarks	144
6.10. Flutter of helicoper blades	145
6.10.1. Introduction	145
6.10.2. Flutter equations	145
6.10.3. Flutter simulation	150
6.10.4. Flutter – concluding remarks	159
References	159
Chapter 7. Numerical simulation of stall of the main rotor	161
7.1. Introduction	161
7.2. A snatch up phenomenon	161
7.3. A reversal-roll phenomenon	165
7.4. Concluding remarks	168
References	168
Final remarks	169
