FOREWORD.....	6
INTRODUCTION.....	8
1 Scope.....	10
2 Normative references.....	11
3 Terms and definitions	12
4 General requirements	18
4.1 General.....	18
4.2 Selection of electrical equipment	19
4.3 Electrical power supply.....	20
4.3.1 General	20
4.3.2 Voltage characteristics	20
4.3.3 On-board power supply	20
4.4 Physical environment and operating conditions	20
4.4.1 General	20
4.4.2 Electromagnetic compatibility (EMC)	20
4.5 Transportation and storage.....	21
4.6 Provisions for handling.....	21
4.7 Installation	21
4.7.1 General	21
4.7.2 Assembly and mounting	21
5 Incoming supply conductor terminations and devices for disconnecting and switching off	21
5.1 Incoming high-voltage conductor terminations.....	21
5.2 Earthing terminal of high-voltage equipment	21
5.3 Supply disconnecting devices and means for earthing.....	22
5.3.1 General	22
5.3.2 Type	22
5.3.3 Requirements for disconnectors	23
5.3.4 Requirements for earthing and short-circuiting	23
5.3.5 Arrangement of disconnecting and earthing devices.....	24
5.4 Devices for switching off for prevention of unexpected start-up.....	24
5.5 Devices for disconnecting and means for earthing HV equipment	24
5.6 Protection against unauthorized, inadvertent and/or mistaken operation	25
6 Protection against electric shock.....	25
6.1 General.....	25
6.2 Protection against direct contact.....	26
6.3 Protection against indirect contact	26
6.3.1 General	26
6.3.2 Measures to prevent the occurrence of a hazardous touch voltage for an unlimited time of fault duration.....	26
6.3.3 Protection by automatic disconnection of supply within a limited time of fault duration.....	27
6.3.4 Protection for mobile machines.....	27
7 Protection of HV equipment	28
7.1 General.....	28
7.2 Overcurrent protection.....	28

7.2.1	General	28
7.2.2	Supply conductors	28
7.2.3	Power circuits	28
7.2.4	Transformers	28
7.2.5	Overcurrent protective devices	29
7.2.6	Rating and setting of overcurrent protective devices	29
7.3	Protection of motors against overheating	29
7.4	Protection against abnormal temperature	29
7.5	Protection against the effects of supply interruption or voltage reduction and subsequent restoration	29
7.6	Motor overspeed protection	29
7.7	Earth fault protection	30
7.8	Protection against overvoltage due to lightning and switching surges	30
7.9	Protection against hazards due to arc faults	30
7.10	Protection against overpressure and leakage	30
7.11	Protection against fire	30
8	Equipotential bonding	30
8.1	General	30
8.2	Protective bonding circuit	33
8.2.1	General	33
8.2.2	Protective conductors	34
8.2.3	Continuity of the protective bonding circuit	34
8.2.4	Mobile machines	35
8.2.5	Protective bonding circuit connecting points	35
8.2.6	Supplementary protective bonding conductors	36
9	Control systems, control circuits and control functions	36
10	Operator interface and machine-mounted control devices	36
11	Electronic equipment	36
12	Controlgear: location, mounting, and enclosures	36
12.1	General requirements	36
12.2	Location and mounting	37
12.2.1	Accessibility and maintenance	37
12.2.2	Physical separation	37
12.3	Degrees of protection	37
12.4	Enclosures, doors and openings	38
12.5	Access to HV equipment	39
13	Conductors and cables	39
13.1	General requirements	39
13.2	Conductors	39
13.3	Insulation and sheath materials	40
13.4	Current-carrying capacity in normal service	40
13.5	Conductor and cable voltage drop	40
13.6	Minimum cross-sectional area	40
13.7	Flexible cables	40
13.7.1	General	40
13.7.2	Mechanical rating	41
13.7.3	Current-carrying capacity of cables wound on drums	41
13.8	Conductor wires, conductor bars and slip-ring assemblies	41

13.8.1	Protection against direct contact.....	41
13.8.2	Protective bonding circuit	42
13.8.3	Protective conductor current collectors	42
13.8.4	Clearances in air.....	42
13.8.5	Creepage distances	42
13.8.6	Conductor system sectioning.....	43
13.8.7	Construction and installation of conductor wire, conductor bar systems and slip-ring assemblies.....	43
14	Wiring practices.....	44
14.1	Connections and routing.....	44
14.1.1	General requirements.....	44
14.1.2	Cable runs	44
14.2	Identification of conductors.....	45
14.3	Flexible cables	45
14.4	Plug-socket combinations.....	46
14.5	Dismantling for shipment	46
14.6	Cable trays	46
15	Electric motors and associated equipment.....	46
15.1	General.....	46
15.2	Motor connection boxes	46
16	Means to protect persons working on electrical installations	47
16.1	General.....	47
16.2	Equipment for isolating installations or apparatus	47
16.3	Devices to prevent reclosing of isolating devices.....	47
16.4	Devices for determining the de-energized state.....	47
16.5	Devices for earthing and short-circuiting	47
16.6	Equipment acting as protective barriers against adjacent live parts	47
16.7	Storage of personal protection equipment.....	47
17	Marking, warning signs and reference designations	47
17.1	General.....	47
17.2	Warning signs	47
18	Technical documentation	48
18.1	General.....	48
18.2	Instructions for use.....	48
18.2.1	General	48
18.2.2	Provisions for handling.....	48
18.2.3	Assembly and mounting	48
18.2.4	Connections.....	49
18.2.5	Final installation inspection	49
18.2.6	Warning sign.....	49
19	Testing and verification.....	49
19.1	General.....	49
19.2	Earthing system tests	49
19.3	Insulation resistance tests	50
19.4	Voltage tests	50
19.5	Functional tests.....	50
19.6	IP tests for HV equipment outside electrical operating areas	50
19.7	Retesting	50

Annex A (informative) Examples of machines covered by IEC 60204-11	51
Annex B (informative) Inquiry form for the HV equipment of machines	52
Annex C (informative) Relationship between cable rated voltages and highest voltage for HV equipment	56
Bibliography	57
Figure 1 – Block diagram of a machine containing HV equipment	9
Figure 2 – Example of equipotential bonding for electrical equipment of a machine	33
Figure 3 – Symbol for protective earth (protective ground)	35
Figure 4 – Warning sign “high voltage”	48
Figure 5 – DANGER hazard severity panel	48
Table 1 – Maximum allowable conductor temperatures under normal and short-circuit conditions	39
Table 2 – De-rating factors for cables wound on drums	41
Table 3 – Selection of the pollution level depending on the degree of protection and insulator material	43
Table 4 – Minimum creepage distance of conductor lines and slip ring assemblies	43
Table B.1 – Overvoltage protection for HV equipment of machinery	54
Table C.1 – Rated voltages of cable and highest voltage for HV equipment	56
