

# Contents

<b>INTRODUCTION . . . . .</b>	<b>5</b>
Chapter 1	
<b>FINITE ELEMENT METHOD IN CONTINUUM MECHANICS . . . . .</b>	<b>9</b>
1.1 Continuum Mechanics. Statement of the Initial Boundary Value Problem . . . . .	9
1.2 About the Finite Element Method . . . . .	12
1.3 Governing Equations of Finite Element Method . . . . .	14
1.4 Linear Elastic Materials . . . . .	19
1.5 Solving Nonlinear Problems . . . . .	21
Chapter 2	
<b>MODELS OF CONCRETE PLASTICITY . . . . .</b>	<b>27</b>
2.1 Strength of Concrete . . . . .	27
2.2 Deformational Model of Isotropic Concrete . . . . .	34
2.3 Orthotropic Model of Concrete . . . . .	40
2.4 Model of Reinforced Concrete . . . . .	48
2.5 Variant of the Associative Flow Theory of Concrete Plasticity . . . . .	54
2.6 Implementation Models for Unreinforced and Reinforced Concrete . . . . .	58
Chapter 3	
<b>CREEP OF CONCRETE . . . . .</b>	<b>69</b>
3.1 Long-term and Thermal Loadings . . . . .	69
3.2 Concrete under Long-term Loadings . . . . .	73
3.3 Implementation into the Finite Element Method . . . . .	84

Chapter 4

**MODELS FOR TIMBER AND MASONRY STRUCTURES . . . . . 87**

4.1 Elastic Moduli of Orthotropic Materials . . . . . 87

4.2 Elastic-Plastic Orthotropic Model for Timber Structures . 93

4.3 Elastic-Plastic Orthotropic Continuum Model for Masonry 98

4.4 Implementation into Finite Element Systems . . . . . 102

Chapter 5

**THEORY OF SOIL PLASTICITY . . . . . 109**

5.1 Development of the Flow Theory of Soil Plasticity . . . . 109

5.2 The Flow Plasticity Theory of Porous Soils . . . . . 118

5.3 Implementation of the Flow Theory of Soil Plasticity . . . 126

**BIBLIOGRAPHY . . . . . 133**

**NOTATION . . . . . 149**
