

CONTENTS

1.	Improvement of grinding technology with vortex cooling of steels that are liable to crack propagation T. N. Ivanova, W. Biały, V. Nordin	9
2.	Computational equation discovery of relationships between container ship fuel consumption and hull and propeller fouling phenomena T. Cepowski, A. Drozd	24
3.	Application of selected methods of multicriterial assessment in the selection process of equipment used at the extraction face – case study Z. Korban	31
4.	Diagnostic benchmarks on dynamic characteristics of thin-walled marine damaged structures A. Szeleziński, L. Murawski, A. Muc	38
5.	Analysis of ergonomic work equipment lowering the static load based on trend of development of work activities B. Horváthová, Ľ. Dulina, E. Bigošová, M. Barbušová, M. Gašo	53
6.	Embedded image processing on Raspberry Pi connected to the industrial control system J. Hrbček, E. Bubeníková	62
7.	Analysis of selected technologies of precious metal recovery processes J. Sitko	72
8.	Comparative analysis of soil magnetic susceptibility and concentration of rare earth elements in soil of problematic areas J. Zawadzki, P. Fabijańczyk	81
9.	Analysis of the similarity of hard coal mines in terms of the number of dangerous incidents caused by the activation of natural hazards M. Tutak	91
10.	Assessment of the physical load of the waterjet operator using the G. Lehmann method M. Pałęga	101
11.	Influences on plasma cutting quality on CNC machine L. Kudrna, J. Fries, M. Merta	108
12.	Chain of events application in workplaces in safety engineering J. Ignac-Nowicka	118
13.	General overview of maintenance strategies – concepts and approaches P. Gackowiec	126
14.	Smart City idea: use of people's opinions on the environmental threats for intelligent management of the city J. Ignac-Nowicka, D. Zarebinska, W. Kaniak	140
15.	Integrated sustainable freight transport system for city multi-floor manufacturing clusters B. Wiśnicki, T. Dzhuguryan	151
16.	Hydrogen fuel in transportation J. Machač, M. Majer	161

17.	Engineer 4.0 in a metallurgical enterprise W. Biały, B. Gajdzik, C. L. Jimeno, L. Romanyszyn	172
18.	Inter gases as one of the ways to reduce the risk of endogenous fires in hard coal mines D. Szurgacz, L. Sobik, J. Brodny	183
19.	Solutions for supporting the management of network technical systems in the aspect of the Smart City concept A. Loska, R. Wyczółkowski, D. R. Barrionuevo	191
20.	The analysis of shaft sinking progress as a function of technical and organizational parameters Ł. Bołoz	203
21.	Patterning as a way to identify and assessment of the exploitation policy of selected technical systems A. Loska	213
22.	Implementation of the SMED method in a production enterprise M. Kuczyńska-Chałada	224
23.	The conception of selected Technology Assessment method and the possibilities of TS application A. Wieczorek	234
24.	The impact of implemented management systems on the safety culture of work in production K. Nowacki	243
25.	Impact of selected lean management tools on work safety J. Furman	253
26.	Methodology of conformity assessment with the essential requirements for electrotechnical products T. Małyś	265
27.	Work ergonomics in a service enterprise – case study A. Kuboszek	274
28.	The importance of prediction methods in industry 4.0 on the example of steel industry B. Gajdzik	283
29.	The method of improvement of quality of life of older people as users and maintainers of technical means in Smart City A. Wieczorek, D. Zarebinska, W. Kaniak	296
30.	SME's versus "Industry 4.0": extended case study based on results of initial research in Polish conditions J. Kaźmierczak	305
31.	Prospects for development movement in the industry concept 4.0 D. Palka, J. Ciukaj	315
32.	The concept of hard coal mine in the perspective of Industry 4.0 D. Palka, T. Rizaoglu	327

33.	Statistical process control and CAQ systems as a tools assuring quality in the automotive industry Ł. Wiecha, G. Ćwikła	336
34.	Evaluation of Tooth No. 2674 and ESCO Tooth 3D models V. Moni, P. Klouda, T. Miletič, F. Helebrant, L. Donát, J. Blata, M. Řehoř	345
35.	Research of overburden rocks geological parameters impact to the excavators cutting bodies abrasion in the Most basin conditions M. Řehoř, V. Moni, F. Helebrant, J. Blata	356
36.	Mathematical model for calculating fuel consumption in real effect weather for a vehicle vessel T. Szelangiewicz, K. Żelazny	367
37.	Properties of alloys in the crystallization interval J. Ružbarský	375
38.	Hazard analysis and risk assessment in metal cutting process M. Kotus, R. Drlička, R. Mikuš, J. Žarnovský	382
