Contents	iii
Abstract	v
Streszczenie	vii
List of symbols and abbreviations	ix
1 Introduction	1
1.1. Motivation	1
1.2. Thesis	3
1.2.1. Preface	3
1.2.2. Objectives	5
1.2.3. Hardware and software	5
2 Problems observed in vascular interventions	7
2.1. Fundamentals of vascular interventions	7
2.1.1. Anatomical and physiological considerations	7
2.1.2. Endovascular diseases and treatment	11
2.1.3. Technical and medical aspects of devices	14
2.2. Selected problems	23
2.2.1. Mechanical characteristics of calcifications	23
2.2.2. Balloon stiffness	26
2.2.3. Migration of intra-aortic balloons	28
3 Computational models	31
3.1. Indentation model of calcium deposits	31
3.1.1. Preface	31
3.1.2. Model geometry	34
3.1.3. Material modelling	39

3.1.4.	Boundary conditions, loading and contact	41
3.2.	Model of vascular interventions	48
3.2.1.	Preface	48
3.2.2.	Geometry modelling	50
3.2.3.	Material modelling	54
3.2.4.	Boundary conditions, load and contact	78
4	Computational solutions for selected problems	85
4.1.	Mechanical identification of calcifications	85
4.1.1.	Inverse analysis setup	85
4.1.2.	Results and discussion	105
4.2.	Nylon balloon with modified stiffness	118
4.2.1.	Model setup	118
4.2.2.	Results and discussion	120
4.3.	Migration of intra-aortic balloons	130
4.3.1.	Model setup	130
4.3.2.	Results and discussion	131
4.4.	Verification of computations	148
4.4.1.	Preface	148
4.4.2.	Model setup	148
4.4.3.	Results and discussion	150
5	Conclusions	155
5.1.	Research summary and novelty	155
5.2.	Future research	157
	Bibliography	159
